Thomson, 2023-10-13 First published in 1938 A Constitutional History of England presents a comprehensive overview of various aspects and problems of English Constitutional history Divided into six major parts it discusses important themes like parliament and the King the period of the Restoration 1660-88 the revolution settlement 1689-1719 the age of conservatism 1720-1801 administrative developments 1660-1801 English local government the problem of sovereignty church and state the forces of the Crown and the press This book is a must read for scholars and researchers of British history and English Constitutional history **History of Higher Education in South Carolina** Colyer Meriwether, Edward McCrady, 1889 A History of Contemporary Korea Man-gil Kang, 2019-11-26 Now available in English this important new contribution from a distinguished Korean historian on the history of twentieth century Korea is divided into two parts first the Japanese colonial period including detailed accounts of the anti Japanese independence movements followed by the liberation of Korea the Korean War and political developments up to the late 1980s Acknowledgement is also made of the work of North Korean scholars **Intellectual History of Economic Normativities** Mikkel Thorup, 2016-06-20 The book investigates the many ways that

economic and moral reasoning interact overlap and conflict both historically and at present The book explores economic and moral thinking as a historically contingent pair using the concept of economic normativities The contributors use case studies including economic practices such as trade and finance and tax and famine reforms in the British colonies to explore the intellectual history of how economic and moral issues interrelate

Early History of the Israelite People

Thompson,2024-07-15 Through a review of historical scholarship of the past century and an analysis of data drawn from archaeological excavations and surveys and from written and historical records from the late second and early first millennium the author reconstructs the historical basis of Israel s origins within the contexts of geography anthropology and sociology Thompson argues that none of the traditional models for the origin of biblical Israel in terms of conquest peaceful settlement or revolution are viable The indigenous nature of the Israelite people has roots that lead back to the late Neolithic period The Iron I period is not the period in which the origins of Israel are to be sought Rather the geographical and regional expansion of settlements in this period reflects an economic response to drought conditions that affected the entire East Mediterranean basin The ninth and eighth century states of Samaria and Jerusalem had separate and independent origins rooted in the development of a Mediterranean economy and an expansion of trade brought about by Assyrian interests The development of the ethnic concept of biblical Israel with its roots in the United Monarchy finds its context in history first at the time of the Persian renaissance guided by the theological concepts of exile and restoration Finally Thompson argues that biblical Israel is historically the creation of the tradition itself in the Persian period and attempts to outline both a historical context and an interpretative matrix for the Bible

A History of the Laws of War: Volume 2

Alexander Gillespie,2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from

the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targetting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself **The**
