explores the theoretical foundations of Inductive Bible Study as an approach which focuses on the meaning of biblical texts in their final form by incorporating insights from multifarious methodologies Based on the final form of the letter and its compositional unity he prioritizes the literary context as consequential evidence for interpretation Hiramatsu argues that there are two major components of the literary structure the division of the letter and the identification of major structural relationships within and between the divided parts Thus he proposes that 2 Corinthians consists of seven major segments which coherently develop Paul s discourse pertaining to ministry and discusses the implications regarding his theology of theocentric ministry and that of weakness that arise from a literary investigation Hiramatsu demonstrates that an inductive and integrative approach not only presents a more suitable and helpful literary structure for 2 Corinthians but also illustrates the relevance of such study when seeking to gain understanding of the theological implications of the letter
