## **Letters Of Credit A View Of Type Design:**

**Letters of Credit** Walter Tracy, 1986 The revolution in typesetting a revolution that over the past two decades has eliminated a five hundred year old system of hot metal production and replaced it with one of photo generated and computer driven composition shows no sign of winding down This book more than any other we know traces the steps that went into that revolution and simultaneously makes the argument that the letter forms themselves are in process of evolution Tracy argues that whether they are of the sixteenth or the twentieth century the forms that comprise our alphabet are subject to the same rules of good taste proportion and clarity that have always obtained But what we face today is vastly different from fifty years ago For the first time new technology has made the proliferation and as some would maintain debasement of letter forms fast and easy or quick and dirty With fifty years of professional experience on both sides of the Atlantic including thirty years as head of type design for the British Linotype Company Tracy is in a unique position to make this argument and arrive at his sad conclusion the design of distinguished contemporary typefaces is far outnumbered by the mediocre and downright bad Part of the reason for this deplorable deterioration is a lack of critical analysis of the particular esthetics involved This step by step examination of type design esthetics is precisely what Tracy provides here while avoiding both the promoter s hype and the manufacturer s claims Here are the gut issues of what makes type good or bad legible or unreadable

Extensively illustrated with both typefaces and line drawings this book belongs on the shelf of anyone interested in the history of letters or in the artistry and peculiar problems that lie behind their production

**The Typographic Medium** Kate Brideau, 2021-10-19 An innovative examination of typography as a medium of communication rather than part of print or digital media Typography is everywhere and yet widely unnoticed When we read type we fail to see type In this book Kate Brideau considers typography not as part of print media or digital media but as a medium of communication itself able to transcend the life and death of particular technologies Examining the contradiction between typographic form often overlooked and function often overpowering Brideau argues that typography is made up not of letters but of shapes and that shape is existentially and technologically central to the typographic medium After considering what

constitutes typographic form Brideau turns to typographic function and how it relates to form Examining typography's role in both the neurological and psychological aspects of reading she argues that typography's functions exceed reading typographic forms communicate but that communication is not limited to the content they carry To understand to what extent the design and operations of the typographic medium affect the way we perceive information Brideau warns we must understand the medium's own operational logic embodied in the full diversity of typographic forms Brideau discusses a range of topics from intellectual property protection for typefaces to Renaissance and Enlightenment ideal letterforms and draws on a wide variety of theoretical work including phenomenological ideas about comprehension German media archaeology and the media and communication theories of Vilém Flusser and others Hand drawn illustrations of typographic forms accompany the text
