Lexicography Annette Kloss-Hogrefe, 2024-11-04 The Internet has become the central publication platform for dictionaries This profound change in the dictionary landscape gives rise to a whole range of new questions for lexicographic practice and dictionary research This volume provides for the first time an introduction to the central fields of work in Internet lexicography and presents the current state of scientific research and lexicographic practice The chapters cover key aspects of dictionary creation such as the technical framework data modeling and lexicographic process linking dictionary content access and navigation structures automatic extraction of lexicographic information user participation and research on dictionary use The aim of this volume is to provide students and teachers at universities with an introductory and easy to read overview on Internet lexicography thus anchoring this important and innovative field of research and practice in university teaching All chapters convey the basic concepts and methods in a comprehensible way and are enriched by references to further and more in depth reading The Cambridge History of Linguistics Linda R. Waugh, Monique

Monville-Burston, John E. Joseph, 2023-08-10 The establishment of language as a focus of study took place over many centuries and reflection on its nature emerged in relation to very different social and cultural practices Written by a team of leading scholars this volume provides an authoritative chronological account of the history of the study of language from ancient times to the end of the 20th century i e recent history when modern linguistics greatly expanded Comprised of 29 chapters it is split into 3 parts each with an introduction covering the larger context of interest in language especially the different philosophical religious and or political concerns and socio cultural practices of the times At the end of the volume there is a combined list of all references cited and a comprehensive index of topics languages major figures etc

Comprehensive in its scope it is an essential reference for researchers teachers and students alike in linguistics and related disciplines **Studies on Multilingual Lexicography** María José Domínguez Vázquez, Mónica Mirazo Balsa, Carlos

Valcárcel Riveiro, 2019-12-16 Given the new technological advances and their influence and imprint in the design and development of dictionaries and lexicographic resources it seems important to put together a series of publications that address this new situation dealing in particular with multilingual and electronic lexicography in an increasingly digital multilingual and multicultural society This is the main objective of this volume which is structured in two central aspects In the first of them the concept of multilingual lexicography is discussed in regard to the influence that the Internet and the application of digital technologies have exercised and continue to exercise both in the conception and design of dictionaries and new lexicographic application tools as well as the emergence of new types of users and forms of consultation The role of the dictionary must necessarily be related to social development and changes In the second thematic section different dictionaries and resources that focus on a multilingual and electronic approach to the linguistic data for their lexicographical treatment and consultation are presented **Dictionary Use and Dictionary Teaching** Annette Kloss-Hogrefe, Martina

Nied Curcio, 2024-10-07 Foreign language learners often use electronic dictionaries or other information from the Internet to solve language problems. However, they seem to have great difficulty using dictionaries and online resources appropriately, profitably and successfully. Their teachers also seem unfamiliar with the current dictionary landscape and sometimes insist on using a single monolingual print dictionary in class. As a result, dictionaries are often banned from the classroom altogether. However, in today's digital, global and multilingual world, appropriate competence in the use of dictionaries is an essential communicative strategy. Dictionary didactics should thus be integrated into foreign language teaching. Against this background, the contributions in this volume discuss how dictionary use can be promoted and integrated into the classroom. They also consider how modern lexical resources and dictionaries should be designed to support learners. Last but not least, they present ideas for educational policies that could promote the use of dictionaries and lexicographic online resources. This volume offers important insights to language teachers, authors of language teaching materials, practical lexicographers and other applied linguists.

From Formal Linguistic Theory to the Art of Historical Editions Natascha Pomino, Eva-Maria Remberger, Julia Zwink, 2023-03-06 Romance is a fertile ground for linguistic research. Instead of limiting their studies to one specialised area, some Romance scholars have managed to combine different aspects of the broad field of Romance linguistics in an impressive way. This volume is dedicated to the multifaceted research interests of Guido Mensching. Part 1 focusses on different aspects of the architecture of grammar and linguistic theory covering Italian, Portuguese, French, Sardinian and Romance. The focus of Part 2 is on historical linguistics, discussing Old Occitan lexicography and Romance in Hebrew scripts. Part 3 is dedicated to aspects relating to plurilingualism, language contact and sociolinguistics. Part 4 explores research arguments that go beyond Romance philology but are nonetheless intertwined with it.

Genre Analysis of Online Encyclopedias Anna Tereszkievich, 2013-05 The book is the first complete discussion of the genre of online encyclopedias. The first part of the book, preceded by a theoretical introduction into the concept of webgenres, gives a detailed overview of the types of encyclopedic websites, presenting the characteristics of their content, form and functionality. The second part of the publication concerns Wikipedia, the most popular online encyclopedia. The presentation of the structure of the portal is followed by an in-depth discussion of Wikipedia discourse features, describing the most conspicuous properties of the stylistic layer of this encyclopedia. The value of the book is additionally enhanced by many illustrations reproducing the analyzed websites.

The theory and practice of examples in bilingual dictionaries Alfonso Rascón Caballero, 2024-07-22 The dictionary example is the culminating component of the information presented in articles of dictionaries intended for language learning. This study analyses the example comprehensively: its provenance, its theoretical status, its distinction from multiword lexical units, to be presented as infralemmas, types and specific functions. The example not only illustrates the data provided by the definition, the equivalent, the grammatical, collocational and pragmatic items, but also provides valuable complementary information on the use of each lexical unit described. Examples are models with which users can form other

sentences but are also instantiations of the language that escape systematicity and reflect unpredictable but real uses
Theoretical reflection on the theory of the example with special emphasis on the bilingual analysis of how especially bilingual dictionaries present examples and what kind of information each type of example provides can assist lexicographers in planning their dictionaries and making theoretically based choices when it comes to the selection and presentation of examples
