Self-Censorship and the Struggle for Press

Freedom in Hong Kong Anne Cheung, 2021-11-01 Ever since it was first known that Hong Kong would become China's Special Administrative Region there has been growing concern over the protection of the freedom of the press in this oriental city The anxiety is however not confined to the fear that the new sovereign might rule Hong Kong under an iron fist Rather many believe that the locals are apparently surrendering their freedom by practicing self censorship a mechanism of anticipatory avoidance of sanctions This book asks what does self censorship mean to Hong Kong at the time of political and historical juncture It argues that self censorship is a strategic game of coordination when both the ruler and the subjects are making use of the fluid boundaries in local and international politics Rich in anecdotes historical details and legal analysis this book depicts the game of Chuin shadow boxing where promises threats and bluffs are exchanged Winning for either side calls for the skilful manipulation of voice and silence at all levels

Freedom of the Press Eric Barendt, 2017-03-02

Bringing together the most seminal articles written by leading international experts this volume discusses all aspects of freedom of the press The papers in the first part of this volume discuss the meaning of press freedom and its relationship to freedom of speech while those in the second part discuss the extent to which self regulation is a satisfactory alternative to legal controls The essays in parts III and IV explore the various solutions adopted in the USA and in some Commonwealth countries to balancing the freedom of the press and other media against the laws of libel and privacy They discuss among other issues the question whether courts should apply the same constitutional principles to privacy actions as those developed in libel law and how far celebrities are entitled to claim privacy rights when they are photographed in public places

Human Rights in the Digital Age Mathias Klang, Andrew Murray, 2016-09-01 The digital age began in 1939 with the construction of the first digital computer In the sixty five years that have followed the influence of digitisation on our everyday lives has grown steadily and today digital technology has a greater influence on our lives than at any time since its development This book examines the role played by digital technology in both the exercise and suppression of human rights The global digital environment has allowed us to reinterpret the concept of universal human rights Discourse on human rights need no longer be limited by national or cultural boundaries and individuals have the ability to create new forms in which to exercise their rights or even to bypass national limitations to rights The defence of such rights is meanwhile under constant assault by the newfound ability of states to both suppress and control individual rights through the application of these same digital technologies This book gathers together an international group of experts working within this rapidly developing area of law and technology and focuses their attention on the specific interaction between human rights and digital technology This is the first work to explore the challenges brought about by digital technology to fundamental freedoms such as privacy freedom of expression access assembly and dignity It is essential reading for anyone who fears digital technology will lead to the Big Brother state

Defamation and the Right to Freedom of Speech Mariette Jones, 2024-06-28 In an effort to balance the protection of reputation and the right to free speech the UK Parliament attempted to fundamentally transform English libel law through the Defamation Act 2013 This book evaluates the success of this attempt by means of a comparative analysis of relevant law in the United States of America US Germany and the European Court of Human Rights It examines the reasons that it was deemed necessary to reform the common law of defamation in England and Wales the changes wrought by the act and the case law it has engendered As defamation often occurs internationally the book also takes a broad comparative look at the way in which other relevant jurisdictions attempt to balance reputational protection and free speech The natural starting point is the US where freedom of expression is strongly protected by the US Constitution From there the focus shifts to Germany where both competing legal interests are likewise given constitutional protection The European Court of Human Rights jurisprudence is also examined because of its highly developed balancing approach and its general reflection of European legal thinking Recent high profile defamation cases such as those concerning the actors Johnny Depp and Amber Heard decided in the UK as well as the US form interesting and informative case studies The final section of the work rates the libel reform attempted in the UK against its own benchmarks provides suggestions about the way in which it is developing and concludes that valuable lessons can still be learnt from the comparator jurisdictions The book will be essential reading for those working in the areas of human rights law and media law

Enforcement of Human Rights in Ethiopia Yohannes Eneyew Ayalew, Wondemagegen Tadesse Goshu, 2023-05-25 Enforcement has not been the most practiced business in the field of human rights in Ethiopia The absence of effective enforcement can be attributed to various factors including the absence of a normative framework insufficient political commitment inadequate institutional capacity and resources and limited awareness Despite recent legal reform initiatives

purportedly driven by human rights demands it remains uncertain whether enforcement has undergone any significant changes Effective enforcement of human rights necessitates the existence of robust multi layered institutions at the national sub regional regional and international levels However in Ethiopia concerns have been raised about the capability of numerous normative instruments and mechanisms of human rights This volume comprises a collection of papers presented at a hybrid conference held at the Hilton Hotel Addis in April 2022 The conference organized by the School of Law of Addis Ababa University in collaboration with Friedrich Ebert Stiftung Ethiopia centered around the theme Enforcement of Human Rights in Ethiopia Old and New Challenges Its primary objective was to identify and analyze both old and new challenges in human rights enforcement in Ethiopia and propose strategies to overcome them The editors of this volume intend for it to address scholarly gaps in the implementation and enforcement of human rights in Ethiopia Among the notable findings from the chapters included in this volume is a significant disparity between recently reformed laws passed by the parliament and their execution by the executive body This disconnect demonstrates a failure to prioritize and enforce human rights in the country As such the volume suggests that the Ethiopian government must take the business of human rights enforcement seriously
