Feedback Ramp Metering in Intelligent Transportation Systems Pushkin Kachroo, Kaan Ozbay, 2011-06-27

Feedback Ramp Metering in Intelligent Transportation Systems is the first book on the topic of using feedback control also called real time traffic control or adaptive control by some traffic engineers in ramp metering. It provides traffic theory fundamentals and then the design of feedback controllers for isolated and coordinated ramp metering problems. Software simulation code in Matlab and Paramics is provided in the book so that the reader can get a hands on feel for the various algorithms. With a large number of examples, illustrations and original problems, this book is excellent as a textbook or reference book for a senior or graduate level course on the subject as well as a reference for researchers in related fields.
