Female Power Power Is Doing For Not Doing To:

Women and Power Olutoyin Mejiuni, 2013-05-15 Education is an important tool for the development of human potential. Organizations and individuals interested in development consider knowledge, skills, and attitudes obtained through formal, non-formal, and incidental learning as invaluable assets. Therefore, it is necessary to reflect on fundamental elements that shape the process through which education is attained. How do people learn, and what are the conditions that facilitate effective learning? Answers to these questions demonstrate that no education can be politically neutral because there is no value-free education. The traditional or indigenous education systems in Nigeria, which covered and still cover physical training, development of character, respect for elders and peers, development of intellectual skills, specific vocational trainings, developing a sense of belonging and participation in community affairs, and understanding, appreciating, and promoting the cultural heritage of the community, were and are not value-free. In other words, the goals and purpose of education, the content, the entire process, and the procedures chosen for evaluation in education are all value-laden. This book attempts to show that the teaching-learning process in higher education and religion taught and learned through non-formal and informal education or the hidden curriculum and other socialization processes within and outside the formal school system all interface to determine the persons that women become. This education enhances or limits women's capabilities, whether in the civic-political sphere or in their attempts to resist violence. Hence, education and religion have ways of empowering or disempowering women.

Women of power Skard, Torild, 2014-07-30 Do women national leaders represent a breakthrough for the women's movement, or is women's leadership weaker than the numbers imply? This unique book is the first to provide a comprehensive overview of how and why women in 53 countries rose to the top in the years since World War II. It presents all 73 female presidents and prime ministers from around the world from 1960, when the first was elected, to 2010, organised by chronology and geography. Written by an experienced politician and academic, the introduction outlines the five forerunners on different continents from 1960 to 1975, then goes on to discuss world developments, concepts, and methodological issues. The motives, achievements, and life stories of the female top leaders, including findings from interviews carried out by the author, are then described and analysed to provide a nuanced picture of women in power. A series of regional chapters provide a global overview, and conclusions are drawn and discussed. This fascinating reader will have wide international appeal to students, academics, government officials, women's and political activists, as well as anyone interested in international affairs, politics, social issues, gender, and equality.

The Witch and the Clown Ann, Barry Ulanov, 1987-02-01 The Ulanovs examine the images of the witch and the clown not only as mere literary, anthropological, or historical themes but as determining much of the complexity of human sexual life. The common notions of male sexuality based upon strength and aggression and female sexuality upon weakness and submission are thoroughly undone in this analysis.

The Congressional globe, 1867 *Girls in Power* Laura Fingerson, 2012-02-01 *Girls in Power* offers a

fascinating and unique look at the social aspects of menstruation in the lives of adolescent girls and also in the lives of adolescent boys Although there has been much research on other aspects of gender and the body this is one of the few books to examine menstruation and the first to explore how it plays a part in power interactions between boys and girls Talking openly in single and mixed gender settings individuals and groups of high school age girls and boys share their interpretations and experiences of menstruation Author Laura Fingerson reveals that while teens have negative feelings about menstruation teen girls use their experiences of menstruation as a source of embodied power in their interactions with other girls and with boys She also explores how boys deal with their own reduced power The book extends our theoretical and analytical understanding of youth gender power and embodiment by providing a more balanced view of adolescent social life

Power, Legal Education, and Law School Cultures Meera Deo, Mindie Lazarus-Black, Elizabeth Mertz, 2019-10-10 There is a myth that lingers around legal education in many democracies That myth would have us believe that law students are admitted and then succeed based on raw merit and that law schools are neutral settings in which professors also selected and promoted based on merit use their expertise to train those students to become lawyers Based on original empirical research this book investigates this myth from myriad perspectives diverse settings and in different nations revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education Embedded within law school cultures are assumptions that also stymie efforts at reform The book examines hidden pedagogical messages showing how presumptions about theory s relation to practice are refracted through the obfuscating lens of curricula The

contributors also tackle questions of class and market as they affect law training Finally this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open revealing common dynamics across cultural and institutional forms The chapters speak to similar issues and to one another about the influence of context images of law and lawyers the political economy of legal education and the agency of students and faculty

The Symbolic Representation of Gender Emanuela Lombardo, Petra Meier, 2016-02-24 What is symbolic representation Since Hanna Pitkin's seminal *The Concept of Representation* the symbolic has been the least studied dimension of political representation Innovatively adopting a discursive approach this book the first full length treatment of symbolic representation focuses on gender issues to tackle important questions such as What are women and men symbols of and how is gender constructed in policy discourse It studies what functions symbolic representation fulfils in the construction of gender what social roles get legitimized in policy discourse and how this affects power constellations ultimately revealing much about the relation between symbolic descriptive and substantive representation Emanuela Lombardo and Petra Meier draw on theories of symbolic representation and gender as well as rich primary material about political debates on labour and care issues partnership and reproductive rights gender violence and quotas Using this original data the authors show that reconsidering symbolic representation from a discursive perspective makes explicit issues of inequality embedded within particular constructions as well as their consequences for political representation and gender equality This important exploration raises relevant new questions regarding the representation of gender that form valuable contributions to the fields of political science political theory sociology and gender studies
