Feminist Practice and Poststructuralist Theory Chris Weedon, 1996-12-23 Feminist Practice and Poststructuralist Theoryd offers a clear and accessible introduction to poststructuralist theory focusing on questions of language subjectivity and power

Feminist Practices Lori A. Brown, 2016-04-15 Women continue to be extremely under represented in the architectural profession Despite equal numbers of male and female students entering architectural studies there is at least 17 25% attrition of female students and not all remaining become practicing architects In both the academic and the professional fields of architecture positions of power and authority are almost entirely male and as such the profession is defined by a heterosexual Eurasian male perspective This book argues that it is vital for all architectural students and practitioners to be exposed to a diversity of contemporary architectural practices as this might provide a first step into broadening awareness and transforming architectural engagement It considers the relationships between feminist methodologies and the various approaches toward design and their impact upon our understanding and relationship to the built environment In doing so this collection challenges two conventional ideas firstly the definition of architecture and secondly what constitutes a feminist practice This collection of up and coming female architects and designers use a wide range of local and global examples of their work to question different aspects of these two conventional ideas While focusing on feminist perspectives the book offers insights into many different issues concerns and interpretations of architecture proposing through these types of engagement architecture can become more culturally politically and environmentally relevant This next generation of architects claim feminism as their own and through doing so help define what feminism means and how it is evolving in the 21st century

Accounting for Feminism Kathryn Haynes, 2025-04-25 Although gender challenges in accounting are widely acknowledged research often addresses the position of men and women in relation to various issues without necessarily challenging the underlying structures and social constructions of gender In contrast this book takes a much more overtly feminist position informed by feminist theory feminist methodology and feminist activism to challenge these constructs and resulting inequalities The book addresses contemporary global feminisms and their potential emancipatory implications for accounting as a profession and as a tool or technology It explores feminist theorisations of accounting offering new insights into their relevance and provides a rich theoretical and practical resource to advance knowledge in the discipline and stimulate further interdisciplinary research Rather than being issue driven with chapters organised to address particular concerns that relate to gender and accounting such as parenthood career progression accountability etc the structure of this book is such that the feminist theoretical position is the starting point for each chapter The book highlights the range of ways that feminism in its various forms and from numerous theoretical perspectives can contribute to an understanding of the challenges relating to gender race and class occurring within accounting and the ways of overcoming them In this way the book provides an integrated discussion of feminist theories and

the emancipatory potential of applying them to accounting that will appeal to readers whatever their orientation to feminism

Feminism Beside Itself Diane Elam, 2013-10-28 This book brings together a distinguished group of scholars from several generations of feminists asking them to reflect on the history and identity of feminism Explores feminism in history and the conflict within feminism *An Introductory Guide to Post-structuralism and Postmodernism* Madan Sarup, 1993 Madan Sarup has now revised his accessible and popular introduction to post structuralist and postmodern theory A new introductory section discusses the meaning of such concepts as modernity postmodernity modernization modernism and postmodernism A section on feminist criticism of Lacan and Foucault has been added together with a new chapter on French feminist theory focusing on the work of Hélène Cixous Luce Irigaray and Julia Kristeva The chapter on postmodernism has been significantly expanded to include a discussion of Lyotard's language games and his use of the category sublime This chapter ends with a discussion of the relationship between feminism and postmodernism A further chapter has been added on the work of Jean Baudrillard a cult figure on the current postmodernist scene whose ideas have attained a wide currency The chapter includes a new section on postmodern cultural practices as revealed in architecture TV video and film Suggestions for further reading are now listed at the end of each chapter and are upgraded and annotated In tracing the impact of post structuralist thought not only on literary criticism but on such disciplines as philosophy politics psychoanalysis the social sciences and art this book will be essential reading for those who want a clear and incisive introduction to the theories that continue to have widespread influence Back cover **Essays on Ethics and Feminism** Sabina Lovibond, 2015 *Essays on Ethics and Feminism* is a selection of the shorter writings of Sabina Lovibond one of the most distinctive voices in contemporary philosophy since the 1980s This work lays claim to a broad thematic unity based on its affiliation to the realist or rationalist traditions in moral philosophy Some of the essays seek to clarify the relation of feminism to these traditions and to current anti rationalist tendencies especially important here are the status and prospects of normativity autonomy purposive action and other conceptual resources for critical thinking which were called into question over roughly the last third of the twentieth century not least by feminist writers heedful of continental European developments All of the essays are concerned with fundamental ethical questions including but not restricted to questions of feminist ethics such as the nature of value and the good life moral requirements and their associated epistemology character formation and the ideological critique of the processes by which this is effected The essays deploy ideas drawn both from Platonic Aristotelian and from Kantian ethics as well as from the later philosophy of Wittgenstein However they also attempt to respond to the destabilizing impact of Nietzschean and postmodernist thought The writing is addressed to those engaged in or with some interest in academic philosophy and draws on a wide range of philosophical source materials but avoids unnecessary technicality In the same way it should appeal to those with a pre existing interest in academic feminism and in some forms of feminist activism but could also serve to draw new readers into the domain of feminist thought [Encyclopedia of Feminist](#)
