stunning and thrilling work **Flames of Extinction** John Pickrell, 2021-04-15 Over Australia's 2019-20 Black Summer bushfire season, scientists estimate that more than three billion native animals were killed or displaced. Many species, koalas, the regent honeyeater, glossy black cockatoo, the platypus, are inching towards extinction at the hands of mega blazes and the changing climate behind them. In *Flames of Extinction*, award-winning science writer John Pickrell investigates the effects of the 2019-2020 bushfires on Australian wildlife and ecosystems. Journeying across the firegrounds, Pickrell explores the stories of creatures that escaped the flames, the wildlife workers who rescued them, and the conservationists, land managers, Aboriginal rangers, ecologists, and firefighters on the front line of the climate catastrophe. He also reveals the radical new conservation methods being trialled to save as many species as possible from the very precipice of extinction. **Outback**

Flames Burn Raina Mooncrest, 2025-02-27 *Outback Flames Burn* explores the ancient fire management practices of Aboriginal Australians and their relevance to modern land management. Faced with increasingly destructive wildfires, this book argues that integrating traditional burning practices is both a matter of cultural preservation and an ecological necessity. For tens of thousands of years, Aboriginal people have shaped the Australian landscape through carefully calibrated fire regimes promoting biodiversity and preventing large-scale wildfires. The book examines the cultural significance of fire, the science behind traditional burning, and its practical applications today. It uncovers how frequent low-intensity burns differ drastically from the high-intensity wildfires that plague many regions, improving soil health and carbon sequestration. Through ethnographic studies, ecological surveys, and firsthand accounts, *Outback Flames Burn* highlights successful collaborations between Aboriginal communities, scientists, and land managers. The book progresses from introducing diverse cultural perspectives on fire to analyzing the ecological impacts and showcasing contemporary applications. Ultimately, it addresses the challenges and opportunities in scaling up these practices, considering policy implications and the need for cultural sensitivity. It emphasizes a collaborative and respectful approach to landscape management, making it invaluable for environmental scientists, policymakers, and anyone interested in sustainable land management and Indigenous knowledge.

The Tibetan Book of the Dead Karma Lingpa, Sambhava Padma, Coleman Graham, 2023-12-12 One of the greatest works created by any culture and overwhelmingly the most significant of all Tibetan Buddhist texts in the West, *The Tibetan Book of the Dead* has had a number of distinguished translations, but none encompassed the work in its entirety. Now, in one of the year's most important publishing events, the entire text has not only been made available in English but in a translation of quite remarkable clarity and beauty. With an introductory commentary by His Holiness The Dalai Lama, who calls this translation an extraordinary accomplishment undertaken with great care over many years, this complete edition faithfully presents the insights and intentions of the original work. It includes one of the most detailed and compelling descriptions of the after-death state in world literature, exquisitely written practices that can transform our experience of daily life, guidance on helping those who are dying, and an inspirational perspective on coping with bereavement. Translated with the close
