Fertility Decline In Indonesia Analysis And Interpretation:

Fertility Decline in Indonesia Geoffrey McNicoll, 1982 Fertility Decline in Indonesia II. Geoffrey McNicoll, Masri Singarimbun, Population Council. Center for Policy Studies, 1982 **Indonesia Assessment** Gavin W. Jones, Terence H. Hull, 1997 Indonesia's population the fourth largest in the world is expected to pass the 200 million mark in 1997 It has sustained high rates of economic growth over the past two decades This has undoubtedly been related to its success in moderating earlier high rates of population growth and to its significant accomplishments in human resource development This volume is therefore timely It presents a comprehensive evaluation of the current situation and assesses future prospects

The Fertility Transition in Iran Mohammad Jalal Abbasi-Shavazi, Peter McDonald, Meimanat Hosseini-Chavoshi, 2009-09-30 Confounding all conventional wisdom the fertility rate in the Islamic Republic of Iran fell from around 7.0 births per woman in the early 1980s to 1.9 births per woman in 2006 That this the largest and fastest fall in fertility ever recorded should have occurred in one of the world's few Islamic Republics demands explanation This book based upon a decade of research is the first to attempt such an explanation The book documents the progress of the fertility decline and displays its association with social and economic characteristics It addresses an explanation of the phenomenal fall of fertility in this Islamic context by considering the relevance of standard theories of fertility transition The book is rich in data as well as the application of different demographic methods to interpret the data All the available national demographic data are used in addition to two major surveys conducted by the authors Demographic description is preceded by a socio political history of Iran in recent decades providing a context for the demographic changes The authors conclude with their views on the importance of specific socio economic and political changes to the demographic transition Their concluding arguments suggest continued low fertility in Iran The book is recommended to not only demographers social scientists and gender specialists but also to policy makers and those who are interested in social and demographic changes in Iran and other Islamic countries in the Middle East It is also a useful reference for demography students and researchers who are interested in applying fertility theories in designing surveys and analysing data **Basic Needs in Indonesia** Bambang Suharnoko Sjahir, 1986 This study attempts to look at the basic needs condition in Indonesia from 1969 to 1984 using economics politics and public policy approaches It synthesizes the macro and micro orientations the studies on the sectoral issues of basic needs and the calculation of basic needs by single indicators The politics of basic needs points to the importance of participation for future agenda while the public policy approach stresses the importance of economic incentives for the future success of the basic needs programme **Statistical Reference Index**, 1986 *Kingsley Davis* David M. Heer, 2017-12-02 Kingsley Davis 1908-1997 was one of the pioneers in social demography and was particularly identified with the theory of the demographic transition This holds that the process of industrialization first causes mortality to decline leading to a substantial rate of population growth and only later causes fertility to fall leading eventually to the

cessation of population growth Kingsley Davis is especially remembered for his arresting and forceful critique of family planning programs intended to achieve zero population growth Before he devoted his major attention to social demography Davis had distinguished himself through influential articles on the structure of family and kinship including the topics of jealousy and sexual property the sociology of prostitution and illegitimacy He had an early interest in structural functional analysis which resulted in his famous and controversial article on stratification co authored with Wilbert Moore and his equally famous presidential address to the American Sociological Association in 1959 David Heer s biography of Kingsley Davis is based on material contained in the Kingsley Davis Archive at the Hoover Institution Library at Stanford University the Kingsley Davis graduate file at Harvard University the interview of Kingsley Davis by Jean van der Tak in Demographic Destinies 1990 and David Heer s personal relationship with Kingsley Davis The book also contains thirty of the most important writings by Kingsley Davis These were chosen in part for the number of citations received in the Cumulative Social Science Citation Index and in part to ensure that readers would be able to assess the continuity of Kingsley Davis s ideas at all stages of his career

ISRL 2020 Yusuf Durachman, Akmal Ruhana, Ida Fitri Astuti, 2021-03-22 We are delighted to introduce Proceedings of the 3rd International Symposium On Religious Life ISRL 2020 This conference has brought academicians researchers developers and practitioners around the world In collaboration with Indonesian Consortium for Religious Studies ICRS and Indonesian Institute of Sciences LIPI the Agency for Research Development and Training of the Ministry of Religious Affairs MoRA convened bi annual symposium with the following main theme Religious Life Ethics and Human Dignity in the Disruptive Era The 3rd ISRL highlighted the role of religion and ethics in the disruptive era that erode human values civility and dignity In the processes of development and technological revolution religion can play an essential role in providing spiritual moral and ethical guidance In the context of the Covid 19 pandemic religion is perceived in two ways on the one hand some faith communities have been willfully negligent and become super spreaders of the dangerous virus by defying stay at home orders Yet on the other hand religion has also galvanized its adherents to support economically vulnerable and marginalized communities affected by the lockdown and social restrictions Likewise in democratization religion gives society the necessary dynamic thrust to maintain its vibrancy resiliency and sustainability This Symposium is therefore expected to delve into the complexity of how religion religious values and faith communities confront the contemporary challenges to uphold ethics and human dignity We strongly believe that ISRL conference provides a good forum for all academicians researcher developers and practitioners to discuss all religious Life ethics and human dignity We also expect that the future ISRL conference will be as successful and stimulating as indicated by the contributions presented in this volume

Micro-Approaches to Demographic Research John Caldwell, Allan Hill, Valerie J. Hull, 2023-10-02 Originally published in 1988 this collection of essays was the first attempt by population scientists to incorporate some of the methods and materials of anthropologists into their work The essays bridge the gap in the conceptualisation and organisation of field

research by 2 sets of social scientists demographers and social anthropologists who share an interest in the explanation of particular patterns of population composition and change From Death to Birth National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, 1998-01-12 The last 35 years or so have witnessed a dramatic shift in the demography of many developing countries Before 1960 there were substantial improvements in life expectancy but fertility declines were very rare Few people used modern contraceptives and couples had large families Since 1960 however fertility rates have fallen in virtually every major geographic region of the world for almost all political social and economic groups What factors are responsible for the sharp decline in fertility What role do child survival programs or family programs play in fertility declines Casual observation suggests that a decline in infant and child mortality is the most important cause but there is surprisingly little hard evidence for this conclusion The papers in this volume explore the theoretical methodological and empirical dimensions of the fertility mortality relationship It includes several detailed case studies based on contemporary data from developing countries and on historical data from Europe and the United States **Two is Enough** A. Niehof, 2022-07-04 This book was written with basically two objectives in mind The first one was to provide a comprehensive description of the Indonesian family planning program during the New Order regime of Suharto The second to explain the fertility transition that took place in Indonesia during the same period The rationale behind the first objective is the rather unique character of the Indonesian family planning program as a national program being part of both the New Order's development effort and rhetoric and peoples everyday life The extent to which it became part of peoples and especially womens everyday life in various ways sets the Indonesian family planning program apart from comparable programs in Asia The second objective is an ambitious one From all the theoretical and anecdotal literature on fertility transition particularly in Asia it is clear that it is a complex phenomenon that cannot be captured in a simple model Nevertheless the dramatic fertility decline that took place in Indonesia during 1968-1998 begs for an attempt at explanation In this book fertility decline is placed against a background of social cultural and economic change and is related to the way the family planning program was designed and implemented The question of the exact contribution of the family planning program to fertility decline is addressed but can never be fully answered This is because the impact of the family planning program cannot be isolated from the influence of other factors such as for example cultural change leading to a rise of age at marriage womens higher levels of educational attainment increased family income and so on As the book shows Indonesia provides a rich context for studying fertility decline and its determinants The contributors come from several countries and have different backgrounds They have in common their professional involvement with family planning fertility and social change in Indonesia and their love for the country and its people **National Academy Press ... Publications Catalog** , 1985 *Economic Change in Modern Indonesia* Anne Booth, 2016-02-11 Indonesia is often viewed as a country with substantial natural resources which has

achieved solid economic growth since the 1960s but which still faces serious economic challenges In 2010 its per capita GDP was only nineteen per cent of that of the Netherlands and twenty two per cent of that of Japan In recent decades per capita GDP has fallen behind that of neighbouring countries such as Malaysia and Thailand and behind China In this accessible but thorough new study Anne Booth explains the long term factors which have influenced Indonesian economic performance taking into account the Dutch colonial legacy and the reaction to it after the transfer of power in 1949 The first part of the book offers a chronological study of economic development from the late nineteenth to the early twenty first century while the second part explores topics including the persistence of economic nationalism and the ongoing tensions between Indonesia s diverse regions

Historical Dictionary of Indonesia R. B. Cribb,Audrey Kahin,2004 Indonesia is Asia s third largest country in both population and area a sprawling tropical archipelago of some 180 million people from hundreds of ethnic groups with a complex and turbulent history One of Asia s newly industrializing countries it is already a major economic powerhouse In over 800 clear and succinct entries the dictionary covers people places and organizations as well as economics culture and political thought from Indonesia s ancient history up until the recent past Includes a comprehensive bibliography maps chronology list of abbreviations and appendix of election results and major office holders This second edition has been thoroughly updated and expanded to cover the events that have occurred in Indonesia s history in the past fifteen years

Development, Demography, And Family Decision-making Linda B Williams,2019-03-04 The shift toward the small nuclear family and the emergence of new roles for women have been among the conspicuous changes accompanying economic development and social modernization The importance of changing autonomy for women in the reduction of control over women s lives by the extended family in the process of development raises questions abo

A Demographic History of the Indonesian Archipelago H. Gooszen,2021-12-06 The author offers a reconstruction of regional variations in the growth of the indigenous population of Indonesia from 1880 till the Japanese invasion in 1942 The demographic components of population growth migration fertility and mortality are not only presented as demographic statistics but also interpreted as the aggregate effects of major events in the lives of indigenous people Hence migration is described in relation to employment opportunities the social structure and tradition fertility is examined in the light of aspects of family formation including marriage customs and birth control practices and mortality is linked to epidemics and Western health care

Reproductive Rights and Wrongs Betsy Hartmann,2016-11-21 Those involved in women s health issues Third World studies and economic development should find food for thought Kirkus Reviews This is an updated edition of the influential study Publishers Weekly of issues surrounding childbirth and the history of population control programs Challenging

conventional wisdom about overpopulation and uncovering the deeper roots of poverty environmental degradation and gender inequalities the author uses data and vivid case studies to explore how population control programs came to be promoted by powerful governments foundations and international agencies as an instrument of Cold War development and security policy Mainly targeting poor women these programs were designed to drive down birth rates as rapidly and cheaply as possible with coercion often a matter of course In the war on population growth birth control was deployed as a weapon rather than a tool of reproductive choice Threaded throughout is the story of how international women s health activists fought to reform population control and promote a new agenda of sexual and reproductive health and rights for all While their efforts bore fruit obstacles remain On one side is the anti choice movement that wants to deny women access not only to abortion but to most methods of contraception On the other is a resurgent well funded population control lobby that often obscures its motives with the language of women s empowerment Despite declining birth rates worldwide average global family size is now 2.5 children overpopulation alarm is on the rise tied now to the threats of climate change and terrorism Reproductive Rights and Wrongs reveals how these developments are rooted in the longer history and politics of population control In this book a new generation of readers will find knowledge and inspiration for the ongoing struggle to achieve reproductive rights and social environmental and gender justice
