*Police Detectives in History, 1750-1950* Clive Emsley, 2017-09-29 While the history of the uniformed police has prompted considerable research the historical study of police detectives has been largely neglected confined for the most part to a chapter or a brief mention in books dealing with the development of the police in general The collection redresses this imbalance Investigating themes central to the history of detection such as the inchoate distinction between criminals and detectives the professionalisation of detective work and the establishment of colonial police forces the book provides a the first detailed examination of detectives as an occupational group with a distinct occupational culture Essays discuss the complex relationship between official and private law enforcers and examine the ways in which the FBI in the U S A and the Gestapo in Nazi Germany operated as instruments of state power The dynamic interaction between the fictional and the real life image of the detective is also explored Expanding on themes and approaches introduced in recent academic research of police history the comparative studies included in this collection provide new insights into the development of both plain clothes policing and law enforcement in general illuminating the historical importance of bureaucratic and administrative

changes that occurred within the state system

**Teaching History for the Common Good** Keith C. Barton, Linda S. Levstik, 2004-07-13 In Teaching History for the Common Good Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students historical thinking In many cases disagreements about what should be taught to the nation's children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education The authors review research on students historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes and tools that influence students developing understanding of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about

teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In Teaching History for the Common Good Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and how it guides their analysis and describe research on children s and adults knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students learning explore four principal stances toward history identification analysis moral response and exhibition review research on the extent to which children and adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers knowledge and practice and argue that for teachers to embrace investigative multi perspectival approaches to history they need more than knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose Teaching History for the Common Good is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject
