## History Maker:

Living For Today Only Dionne Fields, 2011-12-03 Life is more than hard it's really impossible some times Especially when you have people hatters on you even when you haven't fulfilled your dreams If you have a hundred haters with no money Guess what you will have a thousand with 2 00 to your name Living just for today is about moving forward with a million hatters pushing you into your destiny *Unlimited "God's Favor"*. Dionne Fields, The Director Dionne Fields, 2014-04-17 The Director Dionne Fields Author Director Publisher I enjoy being the director of my very own movies on paper I have created a new line of books for children's and young adults I wanted to encourage kids of all ages to read more movies

*Movies On Paper !* Dionne Fields, 2010-02-15 Movies on Paper Coming soon to a shelf near you My book fans always ask me what are movies on paper Well the big screens in Hollywood always make movies and box office hits from books So I decided to reverse and create beautiful movies on paper To see all the movies I personally publish and written on paper Visit my Movies on Paper book store today [www.selfpublishwebs.com](http://www.selfpublishwebs.com) *Big and Little Histories* Marnie Hughes-Warrington, Anne Martin, 2021-08-19 This book introduces students to ethics in historiography through an exploration of how historians in different times and places have explained how history ought to be written and how those views relate to different understandings of ethics No two histories are the same The book argues that this is a good thing because the differences between histories are largely a matter of ethics Looking to histories made across the world and from ancient times until today readers are introduced to a wide variety of approaches to the ethics of history including well known ethical approaches such as the virtue ethics of universal historians and utilitarian approaches to collective biography writing while also discovering new and emerging ideas in the ethics of history Through these approaches readers are encouraged to challenge their ideas about whether humans are separate from other living and non living things and whether machines and animals can write histories The book looks to the fundamental questions posed about the nature of history making by Indigenous history makers and asks whether the ethics at play in the global variety of histories might be better appreciated in professional codes of conduct and approaches to research ethics management Opening up the topic of ethics to show how historians might have viewed ethics differently in the past the book requires no background in ethics or history theory and is open to all of those with an interest in how we think about good histories **Artificial Historians** Marnie Hughes-Warrington, Anne Martin, Lewis Yarlupurka O'Brien, 2025-08-08 This book offers readers an introduction to the world of artificial histories and historians It looks behind the interfaces of AI and explores everyday platforms and prize winning history books to identify how people and algorithms make histories and how they might make histories in the future Every moment around the globe histories are made about ordinary people who use digital devices These histories are not made by professional historians or even by humans but by artificial intelligence that scours our digital footprints for patterns AI histories not only shape recommendations about what we might buy or stream but also our access to education healthcare

and justice The outcomes of recommendation systems are not just a technology problem or an ethics problem This book argues that this is also a history problem and it needs to be understood as one if we are to make fairer or more just systems It shows us that the deep history of history making including Australian Aboriginal and First Nations histories can help us to navigate the future of history in AI Presenting readers with a range of familiar and accessible examples Artificial Historians is a valuable resource for students scholars and all those interested in global historiography technology and artificial intelligence
