History Of Human Populations Vol Ii Migration Urbanization And Structural Change:

The History of Human Populations P. M. G. Harris, 2003-08-30 Building upon models set forth in Volume I of this work Harris turns his attention to populations on the move Through examples from literature on migration the Atlantic slave trade and slave demography and urbanization this study demonstrates how all types of migration free and forced long distance and local build up and are then absorbed into populations according to the same patterns that characterize populations in general What causes these few closely related trends to reappear Harris argues is the way structures of populations alter according to a standard absorption of these migrations and react to other events via changes in births deaths and composition by age and sex Harris finds that something fundamental in the process of demographic renewal consistently imprints a few common shapes upon many kinds of demographic as well as social and economic developments Fresh perspectives on the business of the slave trade and the much discussed modern shifts from agriculture into other employments and from countryside to town or city illustrate how ubiquitously and how fundamentally demographically generated trends shape social and economic movements A future volume will identify and explain the origins of such ever present patterns of change in the dynamics of fertility mortality and demographic renewal

Casablanca Paul Puschmann, 2011 A century ago the modern metropolis of Casablanca which today houses some three million inhabitants was a small and unimportant coastal settlement At that time the Medina of Dar el Beida as Moroccans often call the city had only about 25 000 inhabitants However the arrival of the French changed Casablanca's destiny forever Foreign investment and the construction of a large artificial ocean port transformed Dar el Beida swiftly into the new economic heart of Morocco Like many other cities in the developing world Dar el Beida attracted many times more migrants than it had jobs to offer Consequently unemployment increased and slums sprang up across the city These ominous developments however did not stop hundreds of thousands of new immigrants arriving over the last century As such social disaster became inevitable The author of this book explores the causes and consequences of persistent massive rural to urban migration to Dar el Beida during the twentieth century

Early America Cathy D. Matson, 2006-01-01 In recent years scholars in a number of disciplines have focused their attention on understanding the early American economy The result has been an outpouring of scholarship some of it dramatically revising older methodologies and findings and some of it charting entirely new territory new subjects new places and new arenas of study that might not have been considered economic in the past The Economy of Early America enters this resurgent discussion of the early American economy by showcasing the work of leading scholars who represent a spectrum of historiographical and methodological viewpoints Contributors include David Hancock Russell Menard Lorena Walsh Christopher Tomlins David Waldstreicher Terry Bouton Brooke Hunter Daniel Dupre John Majewski Donna Rilling and Seth Rockman as well as Cathy Matson *Endless Holocausts* David Michael Smith, 2023 The U S Empire has relied upon an almost unimaginable loss of life from its inception during the European colonial period to the present And yet in the face of a series of endless holocausts at home and abroad the doctrine of American exceptionalism has plagued the globe for over a century In *Endless Holocausts* author David Michael Smith demolishes the myth of exceptionalism by demonstrating that manifold forms of mass death far from being unfortunate exceptions to an otherwise benign historical record have been indispensable in the rise of the wealthiest and most powerful imperium in the history of the world At the same time Smith

points to an extraordinary history of resistance by Indigenous peoples, people of African descent, people in other nations brutalized by U.S. imperialism; workers and democratic minded people around the world determined to fight for common dignity and the sake of the greater good. Back cover

Motives of Honor, Pleasure, and Profit Lorena S. Walsh, 2012-12-01

Lorena Walsh offers an enlightening history of plantation management in the Chesapeake colonies of Virginia and Maryland, ranging from the founding of Jamestown to the close of the Seven Years War and the end of the Golden Age of colonial Chesapeake agriculture. Walsh focuses on the operation of more

than thirty individual plantations and on the decisions that large planters made about how they would run their farms She argues that in the mid seventeenth century Chesapeake planter elites deliberately chose to embrace slavery Prior to 1763 the primary reason for large planters debt was their purchase of capital assets especially slaves early in their careers In the later stages of their careers chronic indebtedness was rare Walsh s narrative incorporates stories about the planters themselves including family dynamics and relationships with enslaved workers Accounts of personal and family fortunes among the privileged minority and the less well documented accounts of the suffering resistance and occasional minor victories of the enslaved workers add a personal dimension to more concrete measures of planter success or failure **America, History and Life** ,2005 Article abstracts and citations of reviews and dissertations covering the United States and Canada

Tomorrow 3.0 Michael C. Munger,2018-03-22 With the growing popularity of apps such as Uber and Airbnb there has been a keen interest in the rise of the sharing economy Michael C Munger brings these new trends in the economy down to earth by focusing on their relation to the fundamental economic concept of transaction costs In doing so Munger brings a fresh perspective on the sharing economy in clear and engaging writing that is accessible to both general and specialist readers He shows how for the first time entrepreneurs can sell reductions in transaction costs rather than reductions in the costs of the products themselves He predicts that smartphones will be used to commodify excess capacity and reaches the controversial conclusion that a basic income will be required as a consequence of this new transaction costs revolution
