History Of Modern Epilepsy:

The History of Modern Epilepsy Walter J. Friedlander, 2001-05-30 Although the history of epilepsy one of the most common serious neurological disorders can easily be traced back to ancient times the modern understanding of the disease only began in the middle of the 19th century This history of the first fifty years of modern epileptology reflects the thinking accomplishments and failures of physicians between 1865 and 1914 This epoch presented a very bleak clinical picture diagnosis was difficult and often arbitrary treatment was poor and at times worse than the disease and patients who were usually viewed as having a progressive dementing condition were shunned by society Tradition physicians immaculate perceptions their thinking in analogies and the difficulty a doctor has in separating himself from his society are some of the important factors which led to a lack of clinical advancement during this time Nevertheless taking a longer view a foundation was being established for understanding the physiology of the brain and how that might be related to epilepsy This book should be of interest to any professional person concerned with or involved in exploring the neurophysiology of brain functions and its deviations the care and treatment of patience with epilepsy and the historical and social aspects of medicine

The End of Epilepsy? Dieter Schmidt (M.D.), Simon D. Dostoevsky and the Epileptic Mode of Being Paul Fung, 2017-07-05 For Fyodor Dostoevsky 1821 81 who lived with epileptic seizures for more than thirty years illness is an ineradicable part of existence Epilepsy in his writings denotes both a set of physical symptoms and a state of survival in which the protagonists incessantly try to articulate theorize or master what is ungraspable in their everyday experience Their attempts to deal with what they cannot control or comprehend results in disappointment or what Dostoevsky called a mystical terror Dostoevsky s heroes are unable fully to understand this state and their existence becomes epileptic in so far as self knowledge and self coincidence are never achieved Fung explores new critical pathways by reexamining five of Dostoevsky s post Siberian novels Drawing on insights from writers including Benjamin Blanchot Freud Lacan and Nietzsche the book takes epilepsy as a trope for discussing the unspeakable moments in the texts and is intended for students and scholars who are interested in the subject of modernity critique of the visual and dialogues between philosophy and literature Paul Fung is Assistant Professor in English at Hang Seng Management College Hong Kong

promotion of eugenics The rhetoric of biology and theology blended in strange ways through a common framework known as degeneration theory Degeneration a core concept of the eugenics movement served as a key conceptual nexus between theological and scientific reflection on heredity among Protestant intellectuals and social reformers in the late nineteenth century and the early twentieth century Elite efforts at social control of the allegedly unfit took the form of negative eugenics This included marriage restrictions and even sterilization for many who were identified as having a suspect heredity Speculations on heredity were deployed in identifying the feeble minded hereditary criminals hereditary alcoholics and racial minorities as presumed hindrances to the progress of civilization A few social reformers trained in biology anthropology criminology and theology eventually raised objections to the eugenics movement Still many thousands of citizens on the margins were labeled as defectives and suffered human rights violations during this turbulent time of social change
