History Of Military Mobilization In The U:

Edward M. Almond and the US Army Michael E. Lynch, 2019-10-15 This study presents a comprehensive look at a complex man who exhibited an unfaltering commitment to the military and to his soldiers but whose career was marked by controversy. As a senior Army officer in World Wars I and II Lt Gen Edward M Almond lived by the adage that units don't fail leaders do. He was chosen to command the 92nd Infantry Division one of only two African American divisions to see combat during WWII but when the infantry performed poorly in Italy in 1944-1945 he asserted that it was due to their inferiority as a race and not their maltreatment by a separate but unequal society. He would later command the X Corps during the Inchon invasion that changed the course of the Korean War but his accomplishments would be overshadowed by his abrasive personality and tactical mistakes. This book addresses how Almond's early education at the Virginia Military Institute with its strong Confederate and military influences shaped his military prowess. Presented is a thorough assessment of Almond's military record, how he garnered respect for his aggressiveness, courage in combat, strong dedication and leadership, and how he was affected by the loss of his son and son-in-law in combat during WWII. Following the war Almond would return to the US to assume command of the US Army War College but would find himself unprepared for a changing world. This volume asserts that since his death his bigoted views have come to dominate his place in history and undermine his military achievements.

Volume 3, The Second World War Allan R. Millett, Williamson Murray, 2010-08-09 This three volume study examines the questions raised by the performance of the military institutions of France, Germany, Russia, the United States, Great Britain, Japan, and Italy in the period from 1914 to 1945. Leading military historians deal with the different national approaches to war and military power at the tactical, operational, strategic, and political levels. They form the basis for a fundamental re-examination of how military organizations have performed in the first half of the twentieth century. Volume 3 covers World War II. Volumes 1 and 2 address World War I and the interwar period respectively. Now in a new edition with a new introduction by the editors, these classic volumes will remain invaluable for military historians and social scientists in their examination of national security and military issues. They will also be essential reading for future military leaders at Staff and War Colleges.

The Writing of American Military History U. S. Department of the Army, 2001-06 The Writing of American Military History A Guide should stimulate intelligent probing into the past with an eye to the future. This in turn should lead to increased wisdom and therefore to wiser decisions and better execution throughout the Army in peace and war. The primary purpose of this text is to bring order out of chaos in the fields of historical study and research in the United States Army. In line with the views of Clausewitz, the principal object of the text is to stimulate a progressive and scientific study of United States military history and leadership with the hope that it will produce searching rather than inventive minds and cool rather than hot heads to which the safety of our country can be most advantageously entrusted in time of

emergency or war All officers of the United States Army but particularly those having historical assignments and undergoing instruction at the service schools and colleges or civilian educational institutions will find the text helpful Scholars and others interested in American military affairs may also find it very useful The Writing of American Military History A Guide was originally published by the Department of the Army in June 1956 *The Writing of American Military History* United States.

Mobilization in the United States Army, 1775-1945 Marvin A. Kreidberg,Merton G. Henry,2005 This monograph is essentially a treatment of the manpower aspects of military mobilization Its primary object is to provide a more comprehensive record of military mobilizations in the United States for the use of General Staff officers and students in the Army school system than has been available before in a single work Since it is undoubtedly true that mobilization errors have been repeated because the lessons of previous mobilizations have not been readily available it is hoped that this study will assist the mobilization planners of the future in eliminating such errors The material will also assist the thoughtful civilian in understanding some of the basic problems of national security The study ends with the mobilization for World War II Because of the swift flow of events since 1945 it is merely background for the rearmament of the United States culminating in the Korean operations and an additional monograph will be necessary to record the mobilization developments and lessons up to the present time *The Field Artillery Journal* ,1916 **Military Review** ,2006 **Monthly List of Military**
