**Topicalization in Asian Englishes** Sven Leuckert, 2019-01-10 Shortlisted for the 2020 ESSE Book Award in English Language and Linguistics This monograph is the first comprehensive study of topicalization in Asian second language varieties of English and provides an in depth analysis of the forms functions and frequencies of topicalization in four Asian Englishes Topicalization that is the sentence initial placement of constituents other than the subject has been found to occur frequently in the English spoken by many Asians but so far the possible reasons for this have never been scrutinized This book closes this research gap by taking into account the structures of the major contact languages the roles of second language acquisition and politeness as well as other factors in order to explain why topicalization is highly frequent in some varieties such as Indian English and much less frequent in other varieties such as Hong Kong English In addition to exploring

major and minor forces involved in explaining the frequency of topicalization the forms and functions of the feature are assessed Central questions addressed in this regard are the following Which syntactic constituents tend to be topicalized the most and the least frequently Which discourse effects does topicalization achieve How can we approach topicalization methodologically And lastly which influence do language processing and production have on topicalization      **Case Studies in Foreign Language Placement** Thom Hudson, Martyn Clark, 2008 Although most language programs make placement decisions on the basis of placement tests there is surprisingly little published about different contexts and systems of placement testing The present volume contains case studies of placement programs in foreign language programs at the tertiary level across the United States The different programs span the spectrum from large programs servicing hundreds of students annually to small language programs with very few students The contributions to this volume address such issues as how the size of the program presence or absence of heritage learners and population changes affect language placement decisions      Investigation of Illegal Or Improper Activities in Connection with 1996 Federal Election Campaigns , 1999
