Laws of Inheritance Elizabeth Brodersen, 2015-08-14 Instilled in interdisciplinary cross cultural perspectives of mythical socio economic literary pedagogic and psychoanalytic representations two archetypal creative inheritance laws interact as twins Eros fusion containment safety and Thanatos division separation risk Hypothesising these twin laws as matrilineal Eros and patrilineal Thanatos this book explores why cross cultural forms including gender traits are not fixed but are instead influenced by earlier flexible matrilineal forms Through a study of twins on macro and micro levels Elizabeth Brodersen argues that a psychological twin dilemma is implicit in inheritance laws and offers a unique forum to show how each law competes for primacy as the first and other Chapters begin by looking at twins in creation myths and the historical background to the laws of inheritance as well as literary representations The book then moves on to the developmental structures imbued in twin research and educational systems to explore how past cultural forms have been re defined to fit a modern landscape and the subsequent movement away from the importance of patrilineal primogeniture Laws of Inheritance will be of key value to academics researchers and postgraduate students in the fields of psychoanalysis psychotherapy archetypal theory cross cultural depth psychology cultural anthropology sociology gender studies and twin research The book will also be of interest to practicing psychoanalysts and psychotherapists

Elegant Anatomy Marieke M.A. Hendriksen, 2015-01-27 In Elegant Anatomy Marieke Hendriksen offers an account of the material culture of the eighteenth century Leiden anatomical collections which have not been studied in detail before The author introduces the novel analytical concept of aesthesis as these historical medical collections may seem strange and undeniably have a morbid aesthetic yet are neither curiosities nor art As this book deals with issues related to the keeping and displaying of historical human remains it is highly relevant for material culture and museum studies cultural history the history of scientific collections and the history of medicine alike Unlike existing literature on historical anatomical collections this book takes the objects in the collections as its starting point instead of the

people that created them      **Snakes, People, and Spirits, Volume One** Robert Hazel, 2019-11-05 This two volume publication offers an in depth analysis of ophidian symbolism in Eastern Africa while setting the topic within its regional and historical context namely with regards to the rest of Africa ancient Egypt and Mesopotamia the Greek world ancient Palestine Arabia India and medieval and pre Christian Europe Through the ages most of those areas have connected with Eastern Africa in a broad sense where ophidian symbolism was as rampant and far reaching if not more so as anywhere else on the continent and perhaps in past civilisations Much as in the wider context snakes were held to be long lived closely related to holes caverns trees and water life and death and credited with a liking for milk Even though ophidian symbolism has always been developed out of the outstanding biological and ethological features of snakes the process of symbolisation which plays a crucial role in the elaboration of cultural systems and the shaping of human experience was inevitably at work This first volume deals with snakes as a zoological category snake symbolism as perceived by encyclopaedists and psychologists and ophidian symbolism as it occurred in ancient civilisations It explores the traditional African scene in general with a view to set the scene for a more proximate baseline for comparison The divide between animals and humans was porous and snakes had a more or less equal footing in both the animal realm and the spiritual world Key features of snake symbolism in traditional Eastern Africa are then examined in detail especially phantasmagorical snakes the rainbow serpent snake totems and snake related witches and ritual leaders among others In Eastern Africa the meanings attributed to snakes were multifaceted and paradoxical Overall the two volumes of this publication show that African snake symbolism broadly echoed the diverse representations of ancient civilisations The widely acknowledged assimilation of snakes to death and Evil is therefore unrepresentative both historically and culturally      **Transforming the Rebel Self: Quest Patterns in Fiction** by William Styron, Flannery O'Connor and Bobbie Ann Mason Sharon Therese Nemeth, 2010 Originally written as the author's dissertation      **Visible Exports / Imports** Emily-Jan Anderson, Jill Farquhar, John Richards, 2020-05-15 This interdisciplinary publication brings together new research on medieval and renaissance art culture and the critical history by established scholars early career academics and postgraduate students from the University of Glasgow Queen's University Belfast University College Cork the University of Aberdeen and the University of Warwick The majority of the articles featured are based on papers given at Gloss a postgraduate conference on medieval and renaissance art and culture held at the University of Glasgow 29 June 2007 organised by Emily Jane Anderson with Sandra Cardarelli and Joanne Anderson and or at the International Medieval Congress University of Leeds 9-12 July 2007 sessions 218-318 and 518 organised by Emily Jane Anderson and Dr Jill Farquhar Additional papers by John Richards University of Glasgow and Flavio Boggi University College Cork which were not given in Glasgow or Leeds have been added An introduction to the papers is provided by Robert Gibbs Emeritus Professor of Pre Humanist Art History and Codicology at the University of Glasgow who moderated one of the Leeds sessions as did John Richards The papers are historical and art historical in focus and concern art production wall and
