Euthanasia In The Netherlands:

Euthanasia in the Netherlands R. Cohen-Almagor, 2008-04-08 The Dutch experience has influenced the debate on euthanasia and death with dignity around the globe especially with regard to whether physician assisted suicide and euthanasia should be legitimized or legalized A review of the literature reveals complex and often contradictory views about the Dutch experience Some claim that the Netherlands offers a model for the world to follow others believe that the Netherlands represents danger rather than promise and that the Dutch experience is the definitive answer regarding why we should not make active euthanasia and physician assisted suicide part of our lives Given these contradictory views it has become clear that fieldwork is essential to developing a more informed opinion Having investigated the Dutch experience for a number of years and after thoroughly reading the vast literature published in English I went to the Netherlands for one month in the summer of 1999 to get a feel for the local situation I felt that this would provide the basis on which I could better interpret the findings of the available literature I visited the major centers of medical ethics as well as some research hospitals and spoke with leading figures in the euthanasia policy and practice The time spent was extremely beneficial and enriching I followed in the footsteps of Carlos Gomez who 1 published a book following one month of extensive research in the Netherlands

Regulating Death Carlos F. Gomez, 1991 A close up look at the issue of euthanasia integrates case studies and detailed analysis in a study of the practice of euthanasia in the Netherlands discussing problems with regulation and control and effects on patients and their families

Asking to Die: Inside the Dutch Debate about Euthanasia David C. Thomasma, 1998-08-31 In the Netherlands euthanasia is legal and doctors can openly and intentionally end the life of their patients This book addresses the debate among Dutch physicians policy makers lawyers and bioethicists as well as families

using academic papers as well as personal experiences *Physician-assisted Suicide and Euthanasia in the Netherlands*, 1996 *Negotiating a Good Death* Carlton Muson, Joan K Perry, 2014-05-01 Should human beings be allowed to decide when to die Should doctors be allowed to assist them During the last ten years there has been much international interest in euthanasia in the Netherlands In the discussion of euthanasia in the US and the UK both sides in the debate continually refer to the Dutch Experience *Negotiating a Good Death* Euthanasia in the Netherlands presents firsthand descriptions of euthanasia in practice in the Netherlands something that has never been done before This will provide a deeper understanding of the issues involved for all those interested in end of life decisions It will also help clinicians and other medical professionals better understand end of life decision making *Negotiating a Good Death* is the first inside account of how decisions about euthanasia are made in real life situations Documenting two years of observations at a Dutch hospital this valuable book describes why patients request euthanasia the social factors that influence doctors decisions about granting patients requests and how patients and doctors confer over peaceful deaths Some aspects of this delicate often hidden and socially taboo subject that *Negotiating a Good Death* frankly discusses are the emotions that lead to a wish for death the ideology of easy death the anthropology of death the role of the researcher the line between symptom alleviation and euthanasia where the responsibility lies conservative options for medical personnel how to speak to relatives of someone who has requested euthanasia euthanasia as a cultural construct Through case studies and examples *Negotiating a Good Death* Euthanasia in the Netherlands will help you understand the issues surrounding euthanasia and how life ending decisions are made by both doctors and patients **Handbook of Death and Dying** Clifton D. Bryant, 2003-10 Dying is a social as well as physiological phenomenon Each society characterizes and consequently treats death and dying in its own individual ways ways that differ markedly These particular patterns of death and dying engender modal cultural responses and such institutionalized behavior has familiar economical educational religious and political implications The *Handbook of Death and Dying* takes stock of the vast literature in the field of thanatology arranging and synthesizing what has been an unwieldy body of knowledge into a concise yet comprehensive reference work This two volume handbook will provide direction and momentum to the study of death related behavior for many years to come Key Features More than 100 contributors representing authoritative expertise in a diverse array of disciplines Anthropology Family Studies History Law Medicine Mortuary Science Philosophy Psychology Social work Sociology Theology A distinguished editorial board of leading scholars and researchers in the field More than 100 definitive essays covering almost every dimension of death related behavior Comprehensive and inclusive exploring concepts and social patterns within the larger topical concern Journal article length essays that address topics with appropriate detail Multidisciplinary and cross cultural coverage

Negotiating a Good Death Joan K Parry, Carlton Munson, 2015-12-22 *Social Work Theory and Practice with the Terminally Ill* second edition takes a compassionate look at ways that social workers can help dying people and their families

The social workers who work most effectively with terminally ill patients and their families are the ones who best understand the multifaceted nature of the dying process and its impact on the the patient the family and even on the health care professionals who work with patients at the end of life Dr Parry who specializes in dying and bereavement offers astute observations on the stages of dealing with the diagnosis of a terminal illness and the impending death that patients and their families confront This updated second edition provides valuable new information on ways that social workers can help those with AIDS and their families on traumatic death from any cause and on the grieving processes of parents Social Work Theory and Practice with the Terminally Ill second edition also includes stimulating discussions on the interdisciplinary health team the grieving process professional burnout how social workers adapt to working with dying patients euthanasia and physician assisted dying living wills and patients rights In touching case studies this volume illustrates the particular needs and concerns of the terminally ill and their families impending losses financial worries job concerns pain unfinished business and spiritual needs and reviews successful interventions used by social workers to help patients and their families work through the dying process

Assisted Death in Europe and America Guenter Lewy, 2011 Advances in medical treatment now enable physicians to prolong life to a previously unknown extent however in many instances these new techniques mean not the saving of life but prolonging the act of dying In the eyes of many medical technology has run out of control and contributes to unnecessary suffering Hence the demand has arisen that patients should be entitled to choose death when pain and physical and mental deterioration have destroyed the possibility of a dignified and meaningful life and that their doctors should help them to realize this endeavor At the present time there are seven jurisdictions in the world that with various restrictions have legalized the practice of assisted death physician assisted suicide and or voluntary euthanasia to wit the Netherlands Belgium Luxembourg Switzerland in Europe and the states of Oregon Washington and Montana in the United States Four of these regimes in the Netherlands Belgium Switzerland and the state of Oregon have been functioning for many years and we have for them a substantial body of data as well as much observational research This book is based upon this material The literature dealing with the moral legal and social aspects of assisted death is voluminous but there is a paucity of writing that provides a detailed account of the way these four regimes are actually working Many partisans on both sides of the issue cite existing data selectively or at times willfully distort the empirical evidence in order to strengthen their case Based on the documentary record and interviews with officials and scholars this book seeks to give the specialist as well as the general interested reader a reliable picture of the way assisted death functions and to draw relevant lessons While accurate factual information cannot settle a moral debate it nevertheless is a precondition of any well founded argument The author speaks authoritatively about the issues he addresses I think this book does make an important contribution to the field It will be of interest to students and scholars of PAS as a source of information and reference I definitely recommend publication Stuart Youngner Department of Bioethics Case Western Reserve University School of Medicine The information collected here

makes an important contribution to the literature on PAS because it collects a broad array of relevant information into a single volume It is interesting and enlightening This will make the book a valuable resource for anyone interested in the subject and an especially useful resource for academics who study or teach about the issues Rosamond Rhodes Director Bioethics Education Mt Sinai School of Medicine

Euthanasia and Law in the Netherlands John Griffiths,Alex Bood,Heleen Weyers,1998 The Netherlands is the only country in the world in which euthanasia under narrow defined circumstances is legally permissible Considerable attention has been paid over a number of years to the problem of regulating it and information has been systematically collected concerning actual practice Therefore the Dutch experience is of interest not only to the Dutch but to anyone who is considering whether or not to make euthanasia a legal practice This book is written for a reader without specific knowledge of law The central focus of the book is on Dutch law pertaining to euthanasia but it also considers the moral and legal principles that have played a role in the Dutch debate the available evidence bearing on actual practice and on the effectiveness of legal control It ends with some reflections on the problem of the slippery slope and the question whether the Dutch experience is exportable It includes translations of the relevant legislation including proposed reforms and of three leading cases

Physician Assisted Suicide Margaret P. Battin,Rosamond Rhodes,Anita Silvers,2015-10-15 Physician Assisted Suicide is a cross disciplinary collection of essays from philosophers physicians theologians social scientists lawyers and economists As the first book to consider the implications of the Supreme Court decisions in Washington v Glucksburg and Vacco v Quill concerning physician assisted suicide from a variety of perspectives this collection advances informed reflective vigorous public debate

Is There Any Evidence from the Netherlands Euthanasia Experience That Legalizing Euthanasia Creates a Slippery Slope? Elena Belle,2012-02 Essay from the year 2011 in the subject Philosophy Practical Ethics Aesthetics Culture Nature Right grade 10 language English abstract Euthanasia is defined as the intentional termination of the life of a person upon his or her explicit request Although in this limited sense the legislation of active euthanasia as accepted in April 2001 in The Netherlands has provoked a lot of debates It is often said once voluntary euthanasia has become legal we will have set foot on a slippery slope that will lead to tolerating other forms of euthanasia including non voluntary euthanasia If true this is a powerful argument in the battle of those who oppose to the legalization of euthanasia However as many facets of the medical practice of euthanasia remain unclear and no reliable records on the actual practice of euthanasia exist the power of any slippery slope argument is limited Experience in The Netherlands may shed light on both sides of the medal This paper consists of four parts First I explain the laws that control euthanasia in The Netherlands and elucidate the cultural

background in which they originated Second I examine more closely the argument of the slippery slope and distinguish a logical and an empirical version Thirdly I concentrate on whether experiences in The Netherlands justify any concern about the slippery slope argument Finally by addressing questions like Could euthanasia be safely regulated in other countries or Has legalizing euthanasia set off knock on effects I conclude briefly that Dutch experiences certainly justify some caution

The Inevitable Katie Engelhart, 2021-03-02 A remarkably nuanced empathetic and well crafted work of journalism The Inevitable explores what might be called the right to die underground a world of people who wonder why a medical system that can do so much to try to extend their lives can do so little to help them end those lives in a peaceful and painless way Brooke Jarvis The New Yorker More states and countries are passing right to die laws that allow the sick and suffering to end their lives at pre planned moments with the help of physicians But even where these laws exist they leave many people behind The Inevitable moves beyond margins of the law to the people who are meticulously planning their final hours far from medical offices legislative chambers hospital ethics committees and polite conversation It also shines a light on the people who help them loved ones and sometimes clandestine groups on the Internet that together form the euthanasia underground Katie Engelhart a veteran journalist focuses on six people representing different aspects of the right to die debate Two are doctors a California physician who runs a boutique assisted death clinic and has written more lethal prescriptions than anyone else in the U S an Australian named Philip Nitschke who lost his medical license for teaching people how to end their lives painlessly and peacefully at DIY Death workshops The other four chapters belong to people who said they wanted to die because they were suffering unbearably of old age chronic illness dementia and mental anguish and saw suicide as their only option Spanning North America Europe and Australia The Inevitable offers a deeply reported and fearless look at a morally tangled subject It introduces readers to ordinary people who are fighting to find dignity and authenticity in the final hours of their lives
