Hearing Things Leigh Eric Schmidt, 2000-09-15 Faith cometh by hearing so said Saint Paul and devoted Christians from Augustine to Luther down to the present have placed particular emphasis on spiritual arts of listening In quiet retreats for prayer in the noisy exercises of Protestant revivalism in the mystical pursuit of the voices of angels Christians have listened for a divine call But what happened when the ear tuned to God's voice found itself under the inspection of Enlightenment critics This book takes us into the ensuing debate about hearing things an intense entertaining even spectacular exchange over the auditory immediacy of popular Christian piety The struggle was one of encyclopedic range and Leigh Eric Schmidt conducts us through natural histories of the oracles anatomies of the diseased ear psychologies of the unsound mind acoustic technologies from speaking trumpets to talking machines philosophical regimens for educating the senses and rational recreations elaborated from natural magic notably ventriloquism and speaking statues *Hearing Things* enters this labyrinth all the new disciplines and pleasures of the modern ear to explore the fate of Christian listening during the Enlightenment and its aftermath In Schmidt's analysis the reimagining of hearing was instrumental in constituting religion itself as an object of study and suspicion The mystic's ear was hardly lost but it was now marked deeply with imposture and illusion

Thomas Vaughan and the Rosicrucian Revival in Britain Thomas Willard, 2022-09-19 The first scholarly book on Thomas Vaughan 1621-1666 draws from recent studies in Western esotericism to place his famously difficult writings in their proper context It shows that they develop themes from a distinctively Rosicrucian synthesis of alchemy magic and Christian cabala Vaughan introduced Rosicrucian documents to English readers and placed them in older philosophical contexts during the breakdown of censorship that followed the English Revolution against the old order in politics and religion Willard's book will appeal to students of early modern ideas about religion science and society as they were seen by an intelligent and eloquent outsider

The Decline of Magic Michael Hunter,2020-01-07 A new history which overturns the received wisdom that science displaced magic in Enlightenment Britain In early modern Britain belief in prophecies omens ghosts apparitions and fairies was commonplace Among both educated and ordinary people the absolute existence of a spiritual world was taken for granted Yet in the eighteenth century such certainties were swept away Credit for this great change is usually given to science and in particular to the scientists of the Royal Society But is this justified Michael Hunter argues that those pioneering the change in attitude were not scientists but freethinkers While some scientists defended the reality of supernatural phenomena these sceptical humanists drew on ancient authors to mount a critique both of orthodox religion and by extension of magic and other forms of superstition Even if the religious heterodoxy of such men tarnished their reputation and postponed the general acceptance of anti magical views slowly change did come about When it did this owed less to the testing of magic than to the growth of confidence in a stable world in which magic no longer had a place

communication studies history anthropology and philosophy The Transformations of Magic Frank Klaassen, 2013-01-02 In this original provocative well reasoned and thoroughly documented book Frank Klaassen proposes that two principal genres of illicit learned magic occur in late medieval manuscripts image magic which could be interpreted and justified in scholastic terms and ritual magic in its extreme form overt necromancy which could not Image magic tended to be recopied faithfully ritual magic tended to be adapted and reworked These two forms of magic did not usually become intermingled in the manuscripts but were presented separately While image magic was often copied in the fourteenth and fifteenth centuries The Transformations of Magic demonstrates that interest in it as an independent genre declined precipitously around 1500 Instead what persisted was the other more problematic form of magic ritual magic Klaassen shows that texts of medieval ritual magic were cherished in the sixteenth century and writers of new magical treatises such as Agrippa von Nettesheim and John Dee were far more deeply indebted to medieval tradition and specifically to the medieval tradition of ritual magic than previous scholars have thought them to be Stationer's Voice Timothy Feist, 2005 This volume provides a thorough analysis of the Company of Stationers drawing heavily on unpublished Company records Author Timothy Feist places the Stationer's Co in the context of the burgeoning consumer society of the 18th century relates the almanacs content with the political developments of the post Revolution whig state He argues that the almanac's creation production distribution need to be understood through the commercial imperatives driving the Company which controlled the monopoly Feist's discussion of almanac content in the early 18th century stresses its preoccupation with order harmony unity he skillfully links the almanacs association of political with mathematical order **The Apothecary's Chest** Fabienne Collignon, Konstantina Georganta, Anne-Marie Millim, 2009-03-26 The Apothecary's Chest Magic Art and Medication was a one day symposium held at the University of Glasgow on November 24 2007 The symposium called for a discussion on the evolution of the notions of mysticism knowledge and superstition in the way they are intertwined in both science and the literary imagination in the figure of healers such as the apothecary the alchemist the shaman There were three main areas of interest The first involved traditional perceptions of physicians who combined knowledge and superstition and thus bordered in their practices on the sphere of the occult The second theme evolving from the first proposed an inquiry of the overlapping interests and processes of science magic and prophecy as well as of the implications and consequences of a privileged access to medical knowledge while the third subject of discussion concentrated on the development of the symbolism of the healer in literature history philosophy of science anthropology theology film and art The twelve papers included in this volume papers presented by doctoral candidates and young scholars from across a range of geographical regions and disciplines result in a collection of approaches to an investigative field with topics ranging from mystical traits of mundane materials to the origins of the occult and gender struggles The thirteenth and final essay included in the volume Professor Bill Herbert's From Mere Bellies to the Bad Shaman is an exploration of the modern role of the contemporary poet in the form of an extended conversation initiated

at the closing of the conference when Professor Herbert was asked to combine a poetry reading with a few observations on the relationship between the poet and the shaman
