Nitzke,2019 Companies and organisations are increasingly using machine translation to improve efficiency and cost

effectiveness and then edit the machine translated output to create a fluent text that adheres to given text conventions This procedure is known as post editing Translation and post editing can often be categorised as problem solving activities When the translation of a source text unit is not immediately obvious to the translator or in other words if there is a hurdle between the source item and the target item the translation process can be considered problematic Conversely if there is no hurdle between the source and target texts the translation process can be considered a task solving activity and not a problem solving activity This study investigates whether machine translated output influences problem solving effort in internet research syntax and other problem indicators and whether the effort can be linked to expertise A total of 24 translators twelve professionals and twelve semi professionals produced translations from scratch from English into German and monolingually post edited machine translation output for this study The study is part of the CRITT TPR DB database The translation and monolingual post editing sessions were recorded with an eye tracker and a keylogging program The participants were all given the same six texts two texts per task Different approaches were used to identify problematic translation units First internet research behaviour was considered as research is a distinct indicator of problematic translation units Then the focus was placed on syntactical structures in the MT output that do not adhere to the rules of the target language as I assumed that they would cause problems in the monolingual post editing tasks that would not occur in the translation from scratch task Finally problem indicators were identified via different parameters like Munit which indicates how often the participants created and modified one translation unit or the inefficiency InEff value of translation units i e the number of produced and deleted tokens divided by the final length of the translation Finally the study highlights how these parameters can be used to identify problems in the translation process data using mere keylogging data

that lead them to launch an entrepreneurial enterprise are the traits that lead to the final demise of their dreams The internal locus of control and if its going to be its up to me attitude that entrepreneurs possess and acknowledge as a factor of success is rejected as a contributing factor of failure The reason for trouble and a resultant failure is most often attributed to the lack of capital and the lack of the ability knowledge and capacity to obtain capital both in the form of debt and equity and most prevalent the lack of positive cash flow This book will help the entrepreneur who may be well versed in a given field expertise or industry to fill the ever present task of constantly seeking required capital In addition to the increasing management communication and people skills that the perhaps technically talented enterpriser must soon master is the realization that he she must also always seek capital if the business is to survive and grow Capital working capital positive cash flow is the lifeblood of the business Without it there is no growth no survival and no life In the entrepreneurs enthusiasm the zeal to achieve the vision the exhilaration and activity of the moment the need for money and a timely positive cash flow are often overlooked They are the very life force of the business the oxygen for the venture without which it will die The Entrepreneurs Edge II will assist the planning necessary in finding the money raising the money making the money and keeping the money It along with the accompanying books in the series The Entrepreneurs Edge Finding the Money The Entrepreneur Manager The Business Mans Business Plan The Entrepreneurs Guide to Start Grow and Manage a Profitable Business and Economics Entrepreneurship Ethics The Es of Business helps to fill the toolbox necessary for every entrepreneur and business manager
