standardized and how they responded to the arrival of sound colour widescreen ratios and stereophonic sound They argue that each new technological development has served a function within an existing narrational system The authors also examine how the Hollywood cinema standardized the film making process itself They describe how over the course of its history Hollywood developed distinct modes of production in a constant search for maximum efficiency predictability and novelty Set apart by its combination of theoretical analysis and empirical evidence this book is the standard work on the classical Hollywood cinema style of film making from the silent era to the 1960s Now available in paperback it is a must for film students lecturers and all those seriously interested in the development of the film industry **The Summer I Found**
