## **Embryo Research Debate Science And The Politics Of Reproduction:**

The Embryo Research Debate Michael Joseph Mulkay, 1997-02-13 Scientific research involving human embryos was a major topic of public debate in Britain during the 1980s Despite strong support from the scientific community embryo research was initially condemned by many ordinary people as well as by special interest groups and came close to being banned by Act of Parliament Michael Mulkay describes the dynamics of the parliamentary struggle over the future of embryo research focusing on such issues as the clash between the anti abortion and pro research lobbies the tactics of the Government political ideology the media s role the importance of gender religion the impact of science fiction the lure of medical advance and the difficulty of maintaining ethical control He explains how the advocates of embryo research eventually triumphed and ends with an examination of the cultural tensions which linger after the debate      **Embryo**

**Politics** Thomas Banchoff, 2011-05-15 Since the first fertilization of a human egg in the laboratory in 1968 scientific and technological breakthroughs have raised ethical dilemmas and generated policy controversies on both sides of the Atlantic Embryo stem cell and cloning research have provoked impassioned political debate about their religious moral legal and practical implications National governments make rules that govern the creation destruction and use of embryos in the laboratory but they do so in profoundly different ways In *Embryo Politics* Thomas Banchoff provides a comprehensive overview of political struggles about embryo research during four decades in four countries the United States the United Kingdom Germany and France Banchoff s book the first of its kind demonstrates the impact of particular national histories and institutions on very different patterns of national governance Over time he argues partisan debate and religious secular polarization have come to overshadow ethical reflection and political deliberation on the moral status of the embryo and the promise of biomedical research Only by recovering a robust and public ethical debate will we be able to govern revolutionary life science technologies effectively and responsibly into the future      *Surrogate Motherhood and the Politics of*

*Reproduction* Susan Markens, 2007-09-04 Susan Markens takes on one of the hottest issues on the fertility front surrogate motherhood in a book that illuminates the culture wars that have erupted over new reproductive technologies in the United States In an innovative analysis of legislative responses to surrogacy in the bellwether states of New York and California Markens explores how discourses about gender family race genetics rights and choice have shaped policies aimed at this issue She examines the views of key players including legislators women s organizations religious groups the media and others In a study that finds surprising ideological agreement among those with opposing views of surrogate motherhood Markens challenges common assumptions about our responses to reproductive technologies and at the same time offers a fascinating picture of how reproductive politics shape social policy      *The Body Divided* Dr Sarah Ferber, Ms Sally

Wilde, 2013-07-28 Bodies and body parts of the dead have long been considered valuable material for use in medical science Over time and in different places they have been dissected autopsied investigated harvested for research and therapeutic

purposes collected to turn into museum and other specimens and then displayed disposed of and exchanged This book examines the history of such activities from the early nineteenth century through to the present as they took place in hospitals universities workhouses asylums and museums in England Australia and elsewhere Through a series of case studies the volume reveals the changing scientific economic and emotional value of corpses and their contested place in medical science

Marginalized Reproduction Lorraine Culley,Nicky Hudson,Floor van Rooij,2012-05-16 Worldwide over 75 million people are involuntarily childless a devastating experience for many with significant consequences for the social and psychological well being of women in particular Despite greater levels of infertility and strong cultural meanings attached to having children little attention has been paid politically or academically to the needs of minority ethnic women and men This groundbreaking volume is the first to highlight the ways in which diverse ethnic cultural and religious identities impact upon understandings of technological solutions for infertility and associated treatment experiences within Western societies It offers a corrective to the dominance of the narratives of hegemonic groups in infertility research The collection begins with a discussion of fertility prevalence and access to treatment for minorities in the West and considers some of the key methodological challenges for social research on ethnicity and infertility Drawing on primary research from the US the UK Eire Germany the Netherlands and Australia the book then turns the spotlight onto the ways in which minority status and cultural and religious mores might impact on the experience of infertility and assisted reproductive technologies It argues that more equitable access to culturally competent assisted conception services should be an essential component of a transformatory politics of infertility

**Genomics and Society** Martin W. Bauer, 2013-06-17 The impact of genomics on society has been the focus of debate and conflict across the world Contrasting views of risks and benefits trust in science and regulation the understanding of science media coverage and mobilization of the public by civil society groups all have been cited as drivers of public opinion The long running controversy is a signal that the public's view cannot be ignored in the development and implementation of new technologies arising out of genomics such as agricultural biotechnologies genetic testing and the uses of genetic information the cloning of human cells and tissues and transgenic animals Written by a progressive international group of social scientists from Europe North America and Japan this volume presents a series of comparative perspectives on the social ethical and legal implications of genomics The result is a book which encapsulates the lessons to be learned from the controversies of the 1990s and raises the level of debate on the societal implications of new developments in genomics

**Patent Politics** Shobita Parthasarathy, 2017-02-21 Over the past thirty years the world's patent systems have experienced pressure from civil society like never before From farmers to patient advocates new voices are arguing that patents impact public health economic inequality morality and democracy These challenges to domains that we usually consider technical and legal may seem surprising But in Patent Politics Shobita Parthasarathy argues that patent systems have always been deeply political and social To demonstrate this Parthasarathy takes readers through a particularly fierce and prolonged set of controversies over patents on life forms linked to important advances in biology and agriculture and potentially life saving medicines Comparing battles over patents on animals human embryonic stem cells human genes and plants in the United States and Europe she shows how political culture ideology and history shape patent system politics Clashes over whose voices and which values matter in the patent system as well as what counts as knowledge and whose expertise is important look quite different in these two places And through these debates the United States and Europe are developing very different approaches to patent and innovation governance Not just the first comprehensive look at the controversies swirling around biotechnology patents Patent Politics is also the first in depth analysis of the political underpinnings and implications of modern patent systems and provides a timely analysis of how we can reform these systems around the world to maximize the public interest

**Cultural Boundaries of Science** Thomas F. Gieryn, 1999-01-15 This text argues that an explanation for the cultural authority of science lies where scientific claims leave laboratories and enter boardrooms and living rooms Here one uses maps to decide who to believe cultural maps demarcating science from

pseudoscience ideology faith or nonsense      The Palgrave Handbook of Infertility in History Gayle Davis, Tracey Loughran, 2017-09-01 This ground breaking interdisciplinary volume provides an overdue assessment of how infertility has been understood treated and experienced in different times and places It brings together scholars from disciplines including history literature psychology philosophy and the social sciences to create the first large scale review of recent research on the history of infertility Through exploring an unparalleled range of chronological periods and geographical regions it develops historical perspectives on an apparently transhistorical experience It shows how experiences of infertility access to treatment and medical perspectives on this condition have been mediated by social political and cultural discourses The handbook reflects on and interrogates different approaches to the history of infertility including the potential of cross disciplinary perspectives and the uses of different kinds of historical source material and includes lists of research resources to aid teachers and researchers It is an essential go to point for anyone interested in infertility and its history Chapter 19 is open access under a CC BY 4.0 license via link [springer.com](https://www.springer.com)

The Sciences' Media Connection -Public Communication and its Repercussions Simone Rödder, Martina Franzen, Peter Weingart, 2011-12-02 The Yearbook addresses the overriding question what are the effects of the opening up of science to the media Theoretical considerations and a host of empirical studies covering different configurations provide an in depth analysis of the sciences media connection and its repercussions on science itself They help to form a sound judgement on this recent development

Technological Economy Don Slater, Andrew Barry, 2005-07-15 In this major new collection leading experts explore the multidisciplinary connections between technology and economy drawing on new convergences between economic sociology and science and technology studies Through theoretical and empirical studies the authors investigate economics and economic knowledges as technologies the economies as socio technical arrangements the nature of innovation the role of technological mediations in representing and performing economies This revealing book ideal for those with an interest in contemporary social theory interrogates the evidence for the contemporary claims about the emergence of the new economy and knowledge based economies and sheds new light on the relationship between economy and culture
