From Survival to Fulfillment Paul Valent, 2020-03-31 First published in 1998 Paul Valent sees that the dialectic is not between life and death but between life and trauma This text theorizes that the big issues of life can now be approached through the science of traumatology Through communication with and observation of people whose lives have been stretched under stress or disrupted by trauma the fulfilling components of their lives can be defined oriented and categorized It introduces the theory on the back of clinical and historical material examining the current state of such concepts as stress trauma defences memories post post traumatic stress disorder and other illnesses It should be of interest to those in the healing professions or to those who work with traumatized individuals lawyers social workers clergy and those in the humanities in general

Beyond Invisible Walls Jacob D. Lindy, Robert Jay Lifton, 2013-05-13 When the Berlin Wall fell in 1989 Westerners watched those who had survived the era of Soviet trauma emerge into what we hoped would be the exhilarating light of freedom What we have witnessed however is a slow and painful process of progression and regression of hope and disillusionment of unexpected psychological barriers invisible walls that block the progress we had hoped for In Beyond Invisible Walls East European therapists themselves draw a compelling picture of the waves of trauma that their people endured the institutions of trauma that remained well after Stalin's era and their impact on survivors and their families They describe the psychological remnants of those years walls that confine people by unconsciously preserving old adaptations to political terror walls that divide one part of the mind from another and walls that rise between one generation and the next These therapists' stories allow us a striking glimpse into how patients' trauma evokes the therapists' own wounds how both speaker and empathic listener find their way to a healing process how the two begin to dismantle these invisible walls

Vogel, 2014-01-21 Helping Children Cope with Trauma bridges theory and practice in examining emerging approaches to enhancing resilience and treating traumatised children Adopting a child centred perspective it highlights the importance of the synergy between individual family community and social interventions for recovery from post traumatic stress Consisting of chapters by an international range of contributors the book is presented in three sections reflecting the ecological circles of support that facilitate healthy development in the face of traumatic

circumstances Section 1 Individual addresses the impact of exposure to trauma and loss on post traumatic adaptation focusing on biological aspects attachment patterns emotion regulation and aggressive behaviour in children Section 2 Family looks at the concept of family resilience the impact of trauma on playfulness in toddlers and parents innovative models for working with children traumatised by war domestic violence and poverty and describes the challenges faced by refugee families in the light of intergenerational transmission of trauma Section 3 Community broadly explores the concept of community resilience and preparedness the centrality of the school in the community during times of war and conflict post traumatic distress and resilience in diverse cultural contexts and the impact of trauma work on mental health professionals who live and work in shared traumatic realities The book concludes with a theoretical discussion of the concept of Survival Mode as an organising principle for understanding post traumatic phenomena Helping Children Cope with Trauma will provide mental health professionals child welfare workers educators child development experts and researchers with a thorough understanding of the needs of children after trauma and how those needs may best be met

Honoring Differences Kathleen Nader, Nancy Dubrow, B. Hudnall Stamm, 2013-06-17 Wars violence and natural disasters often require mental health interventions with people from a multitude of ethnic groups religions and nationalities Within the United States those who care for the victims of trauma often assist individuals from a variety of immigrant cultures Moreover many aspiring mental health professionals from other countries seek training in the United States creating an additional need for a broad cultural awareness within educational institutions Honoring Differences deals with the treatment of trauma and loss while recognizing and understanding the cultural context in which the mental health professional provides assistance Training in the cultural beliefs that may interact with traumatic reactions is essential both to assess traumatic response accurately and to prevent harm in the process of assessing and treating trauma Various cultures within the United States and several international communities are featured in the book Each culturally specific chapter aims to help the caregiver honor the valued traditions main qualities and held beliefs of the culture described and prepare to enter the community well informed and well equipped to intervene or consult effectively Further more the book provides information about issues traditions and characteristics of the culture which are essential in moving through the phases of post trauma or other mental health intervention Mental health professionals trauma specialists missionaries and organizations that send consultants to other nations will find Honoring Differences essential reading It will also be a resource to those who are interested in cultural differences and in honoring the belief systems of other cultures and nations

Child Survivors of the Holocaust Paul Valent, 2013-07-04 At the end of the Second World War approximately 1.5 million Jewish children had been killed by the Nazis In this book ten child survivors tell their stories Paul Valent himself a child survivor and psychiatrist explores with profound analytical insight the deepest memories of those survivors he interviewed Their experiences range from living in hiding to physical and sexual abuse Child Survivors of the Holocaust preserves and integrates the personal narratives and

the therapist's perspective in an amazing chronicle. The stories in this book contribute to questions concerning the roots of morality, memory, resilience, and specific scientific queries of the origins of psychosomatic symptoms, psychiatric illness, and trans-generational transmission of trauma. *Child Survivors of the Holocaust* speaks to the trauma facing contemporary child victims of abuse worldwide through past narratives of the Holocaust. **Trauma and Fulfillment Therapy: A Wholistic Framework** Paul Valent, 2013-08-21

Trauma results in a wide variety of human unhappiness. In parallel treatment of the consequences of trauma, it ranges from drugs to single-session psychological techniques to management and cognitive therapies to psychotherapies which take years. Some therapies deal with individuals, others with groups, some with children and others with adults. With such a multiplicity of options, it can be difficult to make sense of the variety of manifestations and treatments. This work aims to clarify the situation by offering tools to conceptualize and treat a range of symptoms and illnesses and to replace them with equally well conceptualized fulfillment alternatives. It is geared towards traumatologists, psychologists, counsellors, and social workers who help those who have suffered assault, bereavement, sexual abuse, or disasters. Upper-level undergraduates, students, graduate students, and professors in trauma, loss, and bereavement.

Mental Disorders of the New Millennium Thomas G. Plante Ph.D., 2006-08-30 Tragically, the daily news is filled with stories about hurtful and seemingly mystifying problems in human behavior. Each morning we face news stories about murder, suicide, drunken driving accidents, child molestation, drug abuse, gambling, criminal behavior, and so forth. The cover stories of news magazines from *Time* and *Newsweek* to *U.S. News and World Report* often focus on abnormal psychology and behavior connected to these particular topics as well as to autism, child hyperactivity, depression, eating disorders, and more. In these volumes, experts in their respective fields draw together compelling chapters on the abnormal psychology and resulting behaviors that are today most often and most dramatically at issue in our world, including such topics as workaholicism. Written with accessibility in mind, the set is intended to bridge the gap between research monographs and self-help books to give layreaders and students solid and up-to-date information without having to translate jargon-heavy text. Most people today are impacted by abnormal behavior or mental illness in some way. Some suffer from their own mental disorders or live with someone who does. Others have been victimized by people experiencing abnormal psychology, including the 20% of American women and 15% of American men reporting they were sexually abused as children. Mental illness and abnormal behavior touches all of us. This set can help us cope. **Children and Disasters** Norma Gordon, Norman L. Farberow, Carl A.

Maida, 2013-06-17 When disaster strikes, survivors suddenly find themselves in a world that has become confusing and unfamiliar. Such traumatic events impose severe psychological strain on every member of a community, but children are a particularly vulnerable group requiring special attention. *Children and Disasters* addresses the needs of this specific population by examining the impact of major disasters on the mental health and emotional functioning of children. The programs described in this book are designed to provide early intervention to children and families undergoing stress.

reactions to a catastrophic event The authors offer interventions aimed at enhancing the skills of mental health professionals educators and peer counselors in responding to the intensified demands of disasters These intervention approaches provide information regarding the event itself reinforce the legitimacy of the anxieties and fears that children and their families are experiencing and encourage the expression of feelings in group and individual settings for the younger child through drawing and play Furthermore they build on the coping capacity of individuals and their families and provide concrete coping skills and techniques to alleviate stress reactions The intervention model can be applied to programs for individual children and their families multi family groups and groups for children in mental health educational and community settings The practical hands on approach to program design makes this book an attractive resource for mental health professionals social workers rehabilitation specialists professional and volunteer counselors and suicide intervention workers It will also be useful for school personnel including teachers school counselors and administrators as well as federal and state emergency planners and coordinators

Exploring the Psychological Benefits of Hardship Eranda Jayawickreme, Laura E.R. Blackie, 2016-10-22 Can adversity lead to enduring positive change across the lifespan Providing a thoughtful and considered exploration of this question this book presents a critical reassessment of posttraumatic growth based on correcting prior theoretical and methodological limitations in the current research Its core argument is that posttraumatic growth should be reconceptualized as positive personality change and thus should be studied using novel methodological approaches from the field of personality psychology Broadly this argument is put forward in five progressive sections Beginning by giving a conceptual and interdisciplinary overview of posttraumatic growth as a phenomenon the volume then reviews the current academic conceptualization of posttraumatic growth and makes a case for a reset in the research The next section maintains that posttraumatic growth is in fact a form of positive personality change and should be analyzed using personality science methodology Using positive personality change as a theoretical foundation for posttraumatic growth the following two sections look at posttraumatic growth in context It is explored both in the long term such as in the development of reflective knowledge and wisdom and in specific situations such as with refugees in Sri Lanka and survivors of the Rwandan genocide Lastly *Exploring the Psychological Benefits of Hardship A Critical Reassessment of Posttraumatic Growth* concludes by offering recommendations for scholars and researchers that will improve the quality of research on posttraumatic growth and will advance this important and worthy field

Loss of the Assumptive World Jeffrey Kauffman, 2013-05-13 The assumptive world concept is a psychological principle of the conservation of human reality or culture it is a lens for seeing the psychological disturbances that occur in times of change In this collection the authors examine the assumptive world from diverse theoretical perspectives providing the reader with an array of different viewpoints illuminating the concept and its clinical usefulness

Stress and trauma in pandemic times Juan Moisés de la Serna, Paul Valent, 2021-02-02 People frequently say that the COVID 19 pandemic is unprecedented Yet from a bird s eye point of view it has similarities with other

pandemics even other illnesses and with other stresses and traumas In fact each situation of stress and trauma illuminates all the others We are on the cusp of a science of stress and trauma In this book we indicate how the current pandemic interweaves with that science both benefiting and contributing to it In other words though in this pandemic each person and community feel that their sufferings are unique in fact they overlap with other areas of suffering that can provide benefit to our collective wisdom In this book two scientists from different parts of the world have come together to meld their knowledge of stress and trauma and apply it together with their current observations to understanding of the pandemic Reciprocally because all traumatic situations overlap lessons from the pandemic will benefit other situations of stress and trauma Thus the contents of this book are relevant to every traumatic situation The book is laid out in the following Chapter 1 considers previous traumatic situations while chapter 2 compares them with the pandemic Chapter 3 introduces stress and trauma terms and applies them to the pandemic Chapters 4 6 explore the range of stress and trauma processes and consequences all the way from cellular to international levels Chapter 7 explores the dialectic between death and resilience while chapter 8 summarises the previous chapters Finally chapter 9 applies stress and trauma understanding to amelioration and treatment of COVID 19 consequences Translator Juan Mois s De La Serna PUBLISHER TEKTIME

Mothers, Infants and Young Children of September 11, 2001 Beatrice Beebe, Phyllis Cohen, K. Mark Sossin, Sara Markese, 2013-09-13 The group of papers presented in this volume represents ten years of involvement of a group of eight core therapists working originally with approximately forty families who suffered the loss of husbands and fathers on September 11 2001 The project focuses on the families of women who were pregnant and widowed in the disaster or of women who were widowed with an infant born in the previous year This book maps the support and services provided without cost to the families by the primary prevention project the September 11 2001 Mothers Infants and Young Children Project organised by a highly trained group of therapists specialising in adult child mother infant and family treatment as well as in nonverbal communication The demands of the crisis led these therapists to expand on their psychoanalytic training fostering new approaches to meeting the needs of these families They sought out these families offering support groups for mothers and their infants and young children in the mothers own neighbourhoods They also brought the families to mother child videotaped play sessions at the New York State Psychiatric Institute at Columbia University followed by video feedback and consultation sessions In 2011 marking the 10th anniversary of the World Trade Center tragedy the Project continues to provide services without cost for these mothers who lost their husbands for their infants who are now approximately ten years old and for the siblings of these children This book was originally published as a special issue of the Journal of Infant Child and Adolescent Psychotherapy
