Tensions and Triumphs in the Early Years of Teaching Susi Long,2006 The results of a seven year research study identify the challenges new teachers face and how all concerned can help keep new teachers in the profession Like thousands before them the seven teacher authors of this book started their first teaching jobs full of energy and excitement They were eager to implement the thoughtful practices and ideas they learned in their methods courses in order to make a lasting difference in their students lives and to make a positive change in the profession Then reality hit After a few weeks in the classroom some of the teachers found that their excitement and confidence were replaced by self doubt isolation and disappointment Instead of challenging the status quo in their school systems some of the teachers found themselves slipping toward it as they tried to bring their teaching visions to life In a climate where nearly half of new teachers leave the profession in the first five years many early career teachers are facing the same disillusionment and challenges That s why these seven teachers got together with a university researcher to study what life is really like for new teachers The authors recount their experiences from the preservice year through the first six years of teaching They share moments of joy and success but they also tell hard stories about obstacles that drive the knowledge enthusiasm and energy of new teachers underground and cause many to leave the profession Their stories will

resonate with both new and experienced teachers offer important advice for job seekers and provide much needed insights for university faculty school administrators colleagues of new teachers and district leaders to think about how they can better embrace the energy and innovation that new teachers bring while supporting them in moments of insecurity and vulnerability New teachers will know they are not alone and that even when they feel the least empowered they actually do have a voice and can use it to effect change *Creating Citizens* Kelly D. Alley,2016-05-15 Conclusion Brigitta R Brunner Contributors **From the Ground Up** Patrick Daly,2003-08-01 The tsunami that struck a dozen countries around the Indian Ocean on 26 December 2004 evoked international sympathy on a scale beyond any previous natural disaster The international relief effort broke all records both in scale and diversity with seven billion U S dollars donated from all over the world through public and private agencies for Sumatra alone Simply as a reconstruction effort therefore the disbursement of those funds and the rebuilding of housing infrastructure and economy posed major national and international challenges However this was not simply a reconstruction effort Aceh at that time was a war zone with Indonesia s military engaged in a major operation to crush a separatist rebellion that had been simmering since 1976 Even though the funds had been donated for tsunami relief any real reconstruction of Aceh had to consider the impact of the conflict on the well being of the population as well as governance and administrative capacities This volumes serves the purpose not only of discussing some of the lessons of the Aceh reconstruction and peace processes but also of maintaining critical links between Aceh and the international community after the initial tranches of aid expire **The Action Research Dissertation** Kathryn Herr,Gary L. Anderson,2014-05-06 The first edition of The Action Research Dissertation A Guide for Students and Faculty was a first of its kind reference distilling the authors decades of action research experience into a handy guide for graduate students The Second Edition continues to provide an accessible roadmap that honors the complexity of action research while providing an overview of how action research is defined its traditions and history and the rationale for using it Authors Kathryn Herr and Gary L Anderson demonstrate that action research is not only appropriate for a dissertation but also is a deeply rewarding experience for both the researcher and participants This practical book demonstrates how action research dissertations are different from more traditional dissertations and prepares students and their committees for the unique dilemmas they may face such as validity positionality design write up ethics and dissertation defense
