Identity Work in the Contemporary University Jan Smith, Julie Rattray, Tai Peseta, Daphne Loads, 2015-12-24 Academic identities research is a growing area of scholarly enquiry especially as academics themselves question the evolving nature of their roles in rapidly changing university environments Performative frameworks in many countries around the world reflect these changes and this volume brings a number of disciplinary perspectives to bear on how we understand the lived experiences of academic life in a global context Contributors explore the power of conceptual tools drawn from Philosophy Psychology Sociology and Politics to challenge increasingly instrumental neoliberal political approaches to higher education supported by empirical evidence Worthwhile teaching learning and research require significant personal investment and the book pays particular attention to the deeply affective dimensions of current academic practices In Part One tools to conceptualise academic identity work drawn from foundational academic disciplines are applied to contemporary higher education practices Part Two foregrounds how working in universities today proceeds with a particular focus on how academics respond to the multiplicity of institutional demands The most pressing perceived demand supported by contributions in Part Three is publication the need to be visible to count is now a global imperative with the affective dimensions not yet well understood at policy level In Part Four those who support colleagues negotiating a reconfigured academic terrain explore productive approaches towards this task to ensure that academic practice remains rooted in the values previously outlined This book will be of interest to those working in universities globally who seek a deeper appreciation of the contextual drivers that shape academic work

With Knowledge and Virtue Themis H. Demas PhD, 2017-11-20 Technology continues to advance and so do our problems Two of our biggest threats are global warming and nuclear war and we must eliminate these threats Fortunately cost effective technology exists to reduce global warming but we must be smart enough to use it The author offers a detailed proposal for combating climate change building a more robust economy by creating jobs eliminating oil imports stabilizing energy prices and cutting back on pollution and its detrimental effects on society all by using clean renewable energy He also tackles reducing the threat of nuclear war which will require us to tame the savageness of man This must be done via international institutions cooperation and a commitment to shared values Tackle two of the world's greatest problems global warming and the threat of nuclear war and consider how to address overpopulation world hunger and other problems along the way With Knowledge and Virtue

The Enduring Significance of Parmenides Raymond Tallis, 2007-11-29 Parmenides of Elea is widely

regarded as the most important of the Presocratic philosophers and one of the most influential thinkers of all time. He is famous or notorious for asserting that change, movement, generation and perishing are illusions arising from our senses; that past and future do not exist and that the universe is a single homogeneous static sphere. This picture of the world is not only contrary to the experience of every conscious moment of our lives; it is also unthinkable since thoughts themselves are events that come into being and pass away. In this important new book, Raymond Tallis critically examines Parmenides' conclusions and argues that although his views have had a huge influence, they are in fact the result of a failure to allow for possibility for what might be, which neither is nor is not. Without possibility, there is neither truth nor falsehood. Tallis explores the limits of Parmenides' ideas, his influence on Plato and through him Aristotle, and finally why Parmenides is still relevant today.

Rabi'a From Narrative to Myth Rkia Elaroui Cornell, 2019-01-03. Rabi'a al-Adawiyya is a figure shrouded in myth. Certainly a woman by this name was born in Basra, Iraq, in the eighth century, but her life remains recorded only in legends, stories, poems, and hagiographies. The various depictions of her as a deeply spiritual ascetic, an existentialist rebel, and a romantic lover seem impossible to reconcile, and yet Rabi'a has transcended these narratives to become a global symbol of both Sufi and modern secular culture. In this groundbreaking study, Rkia Elaroui Cornell traces the development of these diverse narratives and provides a history of the iconic Rabi'a's construction as a Sufi saint. Combining medieval and modern sources, including evidence never before examined in novel ways, *Rabi'a: From Narrative to Myth* is the most significant work to emerge on this quintessential figure in Islam for more than seventy years.

Plato's Parmenides and Its Heritage John Douglas Turner, Kevin Corrigan, 2010. *Plato's Parmenides and Its Heritage* presents in two volumes ground-breaking results in the history of interpretation of Plato's *Parmenides*, the culmination of six years of international collaboration by the SBL Annual Meeting seminar *Rethinking Plato's Parmenides and Its Platonic, Gnostic and Patristic Reception* 2001-2007. The theme of Volume 1 is the dissolution of firm boundaries for thinking about the tradition of *Parmenides* interpretation from the Old Academy through Middle Platonism and Gnosticism. The volume suggests a radically different interpretation of the history of thought from Plato to Proclus than is customary by arguing against Proclus's generally accepted view that there was no metaphysical interpretation of the *Parmenides* before Plotinus in the third century C.E. Instead, this volume traces such metaphysical interpretations first to Speusippus and the early Platonic Academy, second to the Platonism of the first and second centuries C.E. in figures like Moderatus and Numenius, third to the emergence of an exegetical tradition that read Aristotle's categories in relation to the *Parmenides*, and fourth to important Middle Platonic figures and texts. The contributors to Volume 1 are Kevin Corrigan, Gerald Bechtel, Luc Brisson, John Dillon, Thomas Szlezák, Zlatko Pleš, Noel Hubler, John D. Turner, Johanna Brankaer, Volker Henning Drecoll, and Alain Lefebvre.

Christians Shaping Identity from the Roman Empire to Byzantium Geoffrey Dunn,Wendy Mayer,2015-07-14 The essays collected in Christians Shaping Identity celebrate Pauline Allen s significant contribution to early Christian late antique and Byzantine studies especially concerning bishops heresy orthodoxy and christology Covering the period from earliest Christianity to middle Byzantium the first eighteen essays explore the varied ways in which Christians constructed their own identity and that of the society around them A final four essays explore the same theme within Roman Catholicism and oriental Christianity in the late 19th to 21st centuries with particular attention to the subtle relationships between the shaping of the early Christian past and the moulding of Christian identity today Among the many leading scholars represented are Averil Cameron and Elizabeth A Clark **Neoplatonist Stew** Paul Hughes,2014-04-10 This book leaves few denominational toes untrodden An objective review of Church history demonstrates that Christian theology soon went astray from that laid out in the New Testament as the Fathers of the Church lost their understanding of sound interpretive principles Theology began to be supplemented then co opted and corrupted by Greek philosophy namely Middle Platonism then Neoplatonism and later Theurgy The external heterodox doctrines derived from Pagan philosophy were embraced by the Eastern Church carried into the Western Church repeatedly revived in the Medieval Church in the form of Scholasticism Mysticism and Catholic Church dogma and re popularized by modern theologians to the present day The negative influence

of these heterodoxies is manifest in modern elements of Mysticism Contemplative Prayer Sacramentalism Sacerdotalism the so called New Theology and emphasis on Universalism Liberation Unity Mystical Union apotheosis divinization and spiritual formation

Plato's Second Republic André Laks, 2025-09-23 An argument for why Plato's Laws can be considered his most important political dialogue In Plato's Second Republic Andr Laks argues that the Laws Plato's last and longest dialogue is also his most important political work surpassing the Republic in historical relevance Laks offers a thorough reappraisal of this less renowned text and examines how it provides a critical foundation for the principles of lawmaking In doing so he makes clear the tremendous impact the Laws had not only on political philosophy but also on modern political history Laks shows how the four central ideas in the Laws the corruptibility of unchecked power the rule of law a middle constitution and the political necessity of legislative preambles are articulated within an intricate and masterful literary architecture He reveals how the work develops a theological conception of law anchored in political ideas about a god divine reason that is the measure of political order Laks's reading opens a complex analysis of the relationships between rulers and citizens their roles in a political system the power of reason and persuasion as opposed to force in commanding obedience and the place of freedom Plato's Second Republic presents a sophisticated reevaluation of a philosophical work that has exerted an enormous if often hidden influence even into the present day

Plato's Philosophers Catherine H. Zuckert, 2009-08-01 Faced with the difficult task of discerning Plato's true ideas from the contradictory voices he used to express them scholars have never fully made sense of the many incompatibilities within and between the dialogues In the magisterial Plato's Philosophers Catherine Zuckert explains for the first time how these prose dramas cohere to reveal a comprehensive Platonic understanding of philosophy To expose this coherence Zuckert examines the dialogues not in their supposed order of composition but according to the dramatic order in which Plato indicates they took place This unconventional arrangement lays bare a narrative of the rise development and limitations of Socratic philosophy In the drama's earliest dialogues for example non Socratic philosophers introduce the political and philosophical problems to which Socrates tries to respond A second dramatic group shows how Socrates develops his distinctive philosophical style And finally the later dialogues feature interlocutors who reveal his philosophy's limitations Despite these limitations Zuckert concludes Plato made Socrates the dialogues central figure because Socrates raises the fundamental human question what is the best way to live Plato's dramatization of Socratic imperfections suggests moreover that he recognized the apparently unbridgeable gap between our understandings of human life and the nonhuman world At a time when this gap continues to raise questions about the division between sciences and the humanities and the potentially dehumanizing effects of scientific progress Zuckert's brilliant interpretation of the entire Platonic corpus offers genuinely new insights into worlds past and present
