Britain lost its industrial hegemony But this is too simplistic In fact in the decades after 1945 Britain staked out a new role for itself as a key participant in a US led process of globalisation Far from becoming merely a European player the UK actually managed to preserve a key share in a global market and the British defence industry was to a large extent successfully rehabilitated Sakade returns to the original scholarly parameters of the decline controversy and especially questions around post war decline in the fields of high technology and the national defence industrial base Using the case of the strategically critical military and civil aircraft industry he argues that British industry remained relatively robust A valuable read for historians of British aviation and more widely of 20th century British Industry Flying Magazine ,1989-03
