Proposals to Extend Economic Development Legislation United States. Congress. House. Committee on Public Works and Transportation. Subcommittee on Economic Development,1979 **Economic Development and Environmental**

Protection Thomas Michael Power,2015-05-20 This text takes issue with the notion that economic well being of people derives only from quantitatively expanding commercial business activity It argues that economic qualities flow from the natural and social environment and that they are public not private in character **Agricultural and Rural Community**

Issues United States. Congress. Senate. Committee on Agriculture, Nutrition, and Forestry,2002 *Advances in Culture, Tourism and Hospitality Research* Arch G. Woodside,2008-07-25 Presents answers to the following questions how do tourists go about seeking high novelty and yet return to the same destination How do some firms in the same industry end up embracing industrial tourism while other firms reject such business models How do executive leadership styles affect employee satisfaction in international tourist hotels **Social Capital at the Community Level** John M. Halstead,Steven

C. Deller,2015-04-24 In *Social Capital at the Community Level* John Halstead and Steven Deller examine social capital formation beyond the individual level through a variety of disciplines planning economics regional development sociology as well as non traditional approaches like engineering and built environmental features The notion of social capital in community and economic development has become a focus of intense interest for policy makers practitioners and academics The notion is that communities with higher levels of social capital networks trust and norms will prosper both economically and socially In a practical sense how do communities use the notion of social capital to build policies and strategies to move their community forward Are all forms of social capital the same and do all have a positive influence on the community To help gain insights into these fundamental questions *Social Capital at the Community Level* takes a holistic interdisciplinary or systems approach to thinking about the community While those who study social capital will acknowledge the need for an interdisciplinary approach most stay within their disciplinary silos One could say there is strong bonding social capital within disciplines but little bridging social capital across disciplines The contributors to *Social Capital at the Community Level* have made an attempt to build that bridging social capital While disciplinary biases and research approaches are evident there is significant overlap about how people with different disciplinary perspectives think about social capital and how it can be applied at the community level This can be from neighborhoods addressing a localized issue to a global response to a natural disaster This book is an invaluable resource for scholars researchers and policy makers of community and economic development as well as rural sociologists and planners looking to understand the opaque process of social capital formation in communities **Future Survey Annual 1986** Michael Marien,1987-01-01 *The Practice of Rural Development*

Christens, 2019-01-09 Many people want to help bring about changes in their neighborhoods workplaces and communities Leaders and scholars of change efforts are likewise eager for insights into what makes some organizations and coalitions capable of building and exercising power Why are some groups successful in making changes in policies and systems and in sustaining their momentum over time while others struggle or never really get off the ground With *Community Power and Empowerment* Brian D Christens brings the most comprehensive analysis of empowerment theory yet conducted to bear on these questions taking aim at many of the longstanding weaknesses and ambiguities of empowerment theory research and practice For example one major hindrance is that most notions of empowerment have not been coherently connected with community power In addition research has emphasized psychological aspects of empowerment over organizational processes and has neglected community empowerment processes to an even greater extent By linking empowerment and community power Christens constructs a holistic framework for assessing and comparing community driven change efforts This book offers new guidance for inquiries into outcomes and impacts of empowerment processes on health and well being providing a resource for researchers organizational leaders practitioners and anyone interested in collective action for change
