From We ... to Me Nancy Burke, 2011-04-25 From We To Me is for any person male or female who has experienced devastation from separation divorce or the death of a loved one While there are many books written on these topics this book is original because of the views and suggestions of its co author Ghivda who was author Nancy Burkes former husband Tom He has been communicating with Nancy from the spirit side through a medium Tom made his identity known through his awareness of specifics that Nancy has lived through and specifics occurring in her present life His humor and his syntax are also earmarks of Tom when he was in physical form Tom died very suddenly at the young age of 55 while skiing In spite of reading every book she could find on death and grief Nancy spiraled deeper and deeper into grief and depression From We To Me offers new thoughts and understanding and is a positive approach to assist you in raising yourself from the debilitating grip of grief Ghivdas views and explanations from his perspective of unconditional love and wisdom are completely enlightening and extremely different from when he was in the physical as Tom Discover the difference From We To Me can make in your life

From Me to We Stephen Hanman,Ian George,2018-10-01 This book demonstrates that long term win win collaboration approaches work Principals and contractors don t have to end up in conflict or litigation I would recommend these ideas be adopted by companies eager to improve productivity John Mulcahy Chairman Mirvac In an industry dominated by conflict and unproductive activity this book offers a refreshing and practical way for all parties in the building industry to achieve more

from their capital and labour inputs Stephen Hanman and Ian George have shown through application that by introducing trust respect and meaningful communication into relationships results improve for all stakeholders Moreover the investment required to do the first job carries over to future work resulting in improved performance with each project I applaud the efforts of the authors in both creating the environment for their clients to do better in their construction businesses and for sharing their work with the wider business and labour communities One wonders what benefits could flow to other industries should the broader principles so successfully adopted in this book be applied more widely Terry Henderson company director and businessman This book provides wonderful insights into the way in which economic and social relationships associated with building and construction can be transformed The participants involved in CGA Bryson projects have experienced considerable benefits in their working and personal lives There is also evidence of significant economic benefits for all within the project supply chains In the context of the broader building and construction industry this account contains lessons which offer solutions for some of the seemingly intractable problems of conflict waste poor quality work and alienation that bedevil this industry We have a lot to learn from these two professionals who are writing about their direct experience in transforming a construction enterprise Professor Tony Dalton RMIT Australian Housing and Urban Research Institute Research Centre School of Global Urban and Social Studies RMIT University In our own research we have documented in financial terms the benefits of cross functional cross firm collaboration However for many executives building a culture that supports collaboration is not easy Ian and Stephen not only report on the benefits of collaboration in an industry where such behaviour has not been the norm but they provide guidelines for building organisations with a culture of collaboration Dr Douglas M Lambert Fisher College of Business The Ohio State University founder of the Supply Chain Management Institute
