Essential Mary Midgley:

The Essential Mary Midgley Mary Midgley, 2005 This anthology includes carefully chosen selections from her best selling books including *Wickedness* *Beast and Man* *Science and Poetry* and *The Myths We Live By* An unrivalled introduction to a great philosopher and includes a [The Essential Mary Midgley](#) International Society for Science and Religion, 2005

Mary Midgley Gregory McElwain, 2019-11-14 For over 40 years Mary Midgley made a forceful case for the relevance and importance of philosophy With characteristic wit and wisdom she drew special attention to the ways in which our thought influences our everyday lives Her wide ranging explorations of human nature and the self our connections with animals and the natural world and the complexities of morality gender science and religion all contributed to her reputation as one of the most expansive and compelling moral philosophers of the twentieth century Mary Midgley An Introduction is the first substantive introduction to Midgley's influential philosophy on the human condition This volume supplemented by original interviews with Midgley outlines the concepts and perspectives for which she is best known and illuminates the philosophical problems to which she devoted her life's work **The Myths We Live By** Mary Midgley, 2011-04 With a new Introduction by the author An elegant and sane little book The New Statesman Myths as Mary Midgley argues in this powerful book are everywhere In political thought they sit at the heart of theories of human nature and the social contract in economics in the pursuit of self interest and in science the idea of human beings as machines which originates in the seventeenth century is a today a potent force Far from being the opposite of science however Midgley argues that myth is a central part of it Myths are neither lies nor mere stories but a network of powerful symbols for interpreting the world Tackling a dazzling array of subjects such as philosophy evolutionary psychology animals consciousness and the environment in her customary razor sharp prose *The Myths We Live By* reminds us of the powerful role of symbolism and the need to take our imaginative life seriously Mary Midgley is a moral philosopher and the author of many books including *Wickedness* *Evolution as a Religion* *Beast and Man* and *Science and Poetry* All are published in Routledge Classics **The Earth Is Our Home** Nelson Rivera, 2016-11-14 This book demonstrates that Mary Midgley's philosophy of evolution points the way towards considering the earth as our only true home since we are products of this planet and its evolving and complex life along with every other organism From the knowledge of ourselves as knowing animals with a biological as well as a cultural history Midgley proposes the elaboration of an evolutionary epistemology that situates us firmly on the earth together with other creatures while at the same time helping us to build knowledge of the world from the complexity of the human experience I like to call this approach by a known theological analogy a view from below that is from the underside of the world from the realms of nature and history Such an approach does not begin by assuming conceptions of design or order in nature a view that we term from above although it does not rule out the possibility of teleological or metaphysical constructions of reality in the long run This down to earth approach I consider essential for any philosophy or theology that

wants to take evolutionary theory seriously while committed to a proper and non dismissive assessment of religious views

Face to Face Robert Kolb, 2024-05-28 This overview of Luther s thought proceeds from the perspective of his use of the Latin preposition coram face to face with Preeminent Luther scholar Robert Kolb proposes that under Luther s use of dominant ancient concepts of reality in his day he placed the foundation of relationships These relationships included the fundamental relationship of the Creator with every person and thing he made along with all those relationships stemming from ordering his creation by his creative Word With Luther s emphasis on the personal nature of the Creator who continues to re create by speaking in the absolution of sinners he taught that believers experience life s realities in relationship 1 to the hidden God 2 to sin death and Satan 3 to the revealed God as Trinity and incarnate 4 to the revealed God who becomes present in believers lives through oral written and sacramental forms of his Word 5 to their own self 6 to the world both as God s creature and as perverted tempter and 7 to individual human beings in the context of their callings Chapters touching each of these relationships explore Luther s thinking and his

practice of the faith based on his trust in the Creator Savior and Sanctifier and love in service to the neighbor Individual chapters explore these topics within the context of contemporary treatments of various aspects of Luther's thought A special focus of the study critically examines the ontological proposal of Tuomo Mannermaa and his students in Finland offering as an alternative a better text based assessment of what Luther's views can mean for the church today *Creation-Crisis Preaching* Leah D. Schade, 2015-09 How can we proclaim justice for God's Creation in the face of global warming How does fracking fit with the earth and its fullness are the Lord's Creation Crisis Preaching works with the premise that all of Creation including humankind needs to hear the Good News of Jesus resurrection in this age in which humanity is crucifying Creation Informed by years of experience as an environmental activist and minister Leah Schade equips preachers to interpret the Bible through a green lens become rooted in environmental theology and learn how to understand their preaching context in terms of the particular political cultural and biotic setting of their congregation *Creation Crisis Preaching* provides both theoretical grounding and practical tips for preachers to create environmental sermons that are relevant courageous creative pastoral and inspiring **The Revenge of Gaia** James Lovelock, 2007-08-02 In *The Revenge of Gaia* bestselling author James Lovelock father of climate studies and originator of the influential Gaia theory which views the entire earth as a living meta organism provides a definitive look at our imminent global crisis In this disturbing new book Lovelock guides us toward a hard reality soon we may not be able to alter the oncoming climate crisis Lovelock's influential Gaia theory one of the building blocks of modern climate science conceives of the Earth including the atmosphere oceans biosphere and upper layers of rock as a single living super organism regulating its internal environment much as an animal regulates its body temperature and chemical balance But now says Lovelock that organism is sick It is running a fever born of the combination of a sun whose intensity is slowly growing over millions of years and an atmosphere whose greenhouse gases have recently spiked due to human activity Earth will adjust to these stresses but on time scales measured in the hundreds of millennia It is already too late Lovelock says to prevent the global climate from flipping into an entirely new equilibrium state that will leave the tropics uninhabitable and force migration to the poles *The Revenge of Gaia* explains the stress the planetary system is under and how humans are contributing to it what the consequences will be and what humanity must do to rescue itself *Living With Honour* Emma Restall Orr, 2012-11-01 A provocative articulate and uncompromising exploration of how Paganism can provide the philosophical guidance to live honourably in a twenty first Western society *From Eden to Interstellar Space* Sarah Anne Beattie, 2025-01-23 This book is a response to two questions The first concerns how we can do better as human beings in addressing the broken relationships between humankind the environment in which we live and the other species with which we coexist in an increasingly fragile world The second concerns whether secular humanism can provide the answer or if there is an important contribution that Christian faith can offer to an understanding of the human condition that will empower effective transformational action The book explores the

possibility of developing an interpretive approach to biblical narrative that allows a biblical perspective of reality to provide an important complementary rather than competing supplement to developing scientific perspectives of reality These are perspectives emerging from quantum mechanics and astrophysics that challenge both our conceptual ability and the limits of language in articulating mystery that in resisting physical explanation appears to demand new or different ways of thinking about ourselves and the world in which we live

Attending Warren Heiti, 2021-07-15 Attending patient contemplation focused on a particular being is a central ethical activity that has not been recognized by any of the main moral systems in the European philosophical tradition That tradition has imagined that the moral agent is primarily a problem solver and world changer when what might be needed most is a witness Moral theory has been agonized by dualism motivation is analyzed into beliefs and desires descriptions of facts and dissatisfactions with them while action is represented as an effort to lessen dissatisfaction by altering the empirical world In Attending Warren Heiti traces an alternative genealogy of ethics drawing from the Platonism recovered by Simone Weil and developed in the work of Iris Murdoch John McDowell and Jan Zwicky According to Weil virtue is knowledge knowledge is embodied and the knower is nested in an ecosystem of relationships Instead of analyzing and solving theoretical problems Heiti aims to clarify the terrain by setting up objects of attention from more than one discipline including not only philosophy but also literature psychology film and visual art The traditional picture captures one important type of ethical activity faced with a moral problem one looks to a general rule to furnish the solution But not all problems conform to this model Heiti offers an alternative to see what is needed one attends to the particular being

This Strange and Sacred Scripture Matthew Richard Schlimm, 2015-02-10 The Old Testament can seem strange and disturbing to contemporary readers What should Christians make of Genesis 1-3 seemingly at odds with modern scientific accounts Why does the Old Testament contain so much violence How should Christians handle texts that give women a second class status Does the Old Testament contradict itself Why are so many Psalms filled with anger and sorrow What should we make of texts that portray God as filled with wrath Combining pastoral insight biblical scholarship and a healthy dose of humility gifted teacher and communicator Matthew Schlimm explores perennial theological questions raised by the Old Testament He provides strategies for reading and appropriating these sacred texts showing how the Old Testament can shape the lives of Christians today and helping them appreciate the Old Testament as a friend in faith

Animal Lives and Why They Matter Arne Johan Vetlesen, 2022-10-25 This book engages with the changing ways in which we as a society and culture look upon and interact with animals stressing how much animals differ among themselves An invitation to appreciate the peculiar role of animals in telling important if uncomfortable truths about who we are and where we are heading namely towards a world so much poorer in cultural moral and biological diversity as a result of the ongoing decimation of so many other species Drawing on a variety of thought ranging from that of Midgley Plumwood and Murdoch to Levinas Derrida and Habermas from ecophilosophers to conservation biologists *Animal Lives and Why They Matter* asks how

we have come to this and what an alternative less destructive approach to our now precarious coexistence with animals might look like Spanning the disciplines of philosophy psychology and anthropology this enquiry into various cross species relationships and encounters will appeal to scholars and students across the humanities and social sciences with interests in philosophy ethics human animal interaction and environmental thought Chimeras, Hybrids, and Interspecies Research Andrea L. Bonnicksen, 2009-09-21 In his 2006 State of the Union speech President George W Bush asked the U S Congress to prohibit the most egregious abuses of medical research such as the creation of animal human hybrids The president's message echoed that of a 2004 report by the President's Council on Bioethics which recommended that hybrid human animal embryos be banned by Congress Discussions of early interspecies research in which cells or DNA are interchanged between humans and nonhumans at early stages of development can often devolve into sweeping statements colorful imagery and confusing policy Although today's policy advisory groups are becoming more informed debate is still limited by the interchangeable use of terms such as chimeras and hybrids a tendency to treat all forms of interspecies alike the failure to distinguish between laboratory research and procreation and not enough serious policy justification Andrea Bonnicksen seeks to understand reasons behind support of and disdain for interspecies research in such areas as chimerism hybridization interspecies nuclear transfer cross species embryo transfer and transgenics She highlights two claims critics make against early interspecies studies that the research will violate human dignity and that it can lead to procreation Are these claims sufficient to justify restrictive policy Bonnicksen carefully illustrates the challenges of making policy for sensitive and often sensationalized research research that touches deep seated values and that probes the boundary between human and nonhuman animals **Biolust, Brain Death, and the Battle Over Organ Transplants** William R. LaFleur, 2022-11-03 William LaFleur 1936 2010 an eminent scholar of Japanese studies left behind a substantial number of influential publications as well as several unpublished works The most significant of these examines debates concerning the practice of organ transplantation in Japan and the United States and is published here for the first time This provocative book challenges the North American medical and bioethical consensus that considers the transplantation of organs from brain dead donors as an unalloyed good It joins a growing chorus of voices that question the assumption that brain death can be equated facilely with death It provides a deep investigation of debates in Japan introducing numerous Japanese bioethicists whose work has never been treated in English It also provides a history of similar debates in the United States problematizing the commonly held view that the American public was quick and eager to accept the redefinition of death A work of intellectual and social history this book also directly engages with questions that grow ever more relevant as the technologies we develop to extend life continue to advance While the benefits of these technologies are obvious their costs are often more difficult to articulate Calling attention to the risks associated with our current biotech trajectory LaFleur stakes out a highly original position that does not fall neatly onto either side of contemporary US ideological divides

Critical Terms for Animal Studies Lori Gruen, 2018-10-23 Alexandra Horowitz Peter Singer Barbara King Christine Korsgaard and others explore the core concepts of this interdisciplinary field Recommended Choice Animal Studies is a rapidly growing interdisciplinary field devoted to examining understanding and critically evaluating the complex relationships between humans and other animals Scholarship in Animal Studies draws on a variety of methodologies to explore these multi faceted relationships in order to help us understand the ways in which other animals figure in our lives and we in theirs Bringing together the work of a group of internationally distinguished scholars Critical Terms for Animal Studies offers distinct voices and diverse perspectives exploring significant concepts and asking important questions What do we mean by anthropocentrism captivity empathy sanctuary and vulnerability and what work do these and other critical terms do in Animal Studies How do we take non human animals seriously not simply as metaphors for human endeavors but as subjects themselves Sure to become an indispensable reference for the field Critical Terms for Animal Studies not only provides a framework for thinking about animals as subjects of their own experiences but also serves as a touchstone to help us think differently about our conceptions of what it means to be human and the impact human activities have on the more than human world The subject of animal studies is at a crucial stage still being mapped out and defining itself and this volume is very useful given its conciseness its all star cast of contributors and its breadth in providing a guide to some of the key ideas Colin Jerolmack New York University

Literary Land Claims Margery Fee, 2015-10-16 Literature not only represents Canada as our home and native land but has been used as evidence of the civilization needed to claim and rule that land Indigenous people have long been represented as roaming savages without land title and without literature Literary Land Claims From Pontiac s War to Attawapiskat analyzes works produced between 1832 and the late 1970s by writers who resisted these dominant notions Margery Fee examines John Richardson s novels about Pontiac s War and the War of 1812 that document the breaking of British promises to Indigenous nations She provides a close reading of Louis Riel s addresses to the court at the end of his trial in 1885 showing that his vision for sharing the land derives from the Indigenous value of respect Fee argues that both Grey Owl and E Pauline Johnson s visions are obscured by challenges to their authenticity Finally she shows how storyteller Harry Robinson uses a contemporary Okanagan framework to explain how white refusal to share the land meant that Coyote himself had to make a deal with the King of England Fee concludes that despite support in social media for Theresa Spence s hunger strike Idle No More and the Indian Residential School Truth and Reconciliation Commission the story about savage Indians and civilized Canadians and the latter group s superior claim to develop the lands and resources of Canada still circulates widely If the land is to be respected and shared as it should be literary studies needs a new critical narrative one that engages with the ideas of Indigenous writers and intellectuals
