Essential Practitioners Handbook Of Personal Construct Psychology:

International Handbook of Personal Construct Psychology Fay Fransella, 2003-09-12 Personal Construct Psychology PCP was devised by George Kelly in 1955 as a new method in psychotherapy. Since then his techniques have been applied widely throughout psychology and beyond to include areas as diverse as nursing, conflict resolution, sociology, and literary criticism. This handbook brings together for the first time a wide range of theories, research, and practice that have grown out of Kelly's original concept. It provides a reference on what has been done and insights into how further applications can be made within psychology and psychotherapy and also informs non-psychologists and those unfamiliar with Kelly's techniques of its usefulness and applicability in other disciplines. This is the only comprehensive reference on PCP available. Kelly's work is seminal and widely known. Emphasises practical application to a wide range of disciplines.
