Ethics and the Internet in West Africa Patrick J. Brunet,Oumarou Tiemtoré,Marie-Claude Vettraino-Soulard,2004 References and Further reading pp 140 148 *A Socio-History of Internet Policies* Anne Bellon,2025-01-14 This book examines the development of internet policymaking over the last forty years Drawing on evidence from France and elsewhere it adopts a sociohistorical perspective to offer insights into the ways democratic states regulate the internet and digital transformation more generally Adopting a chronological approach and utilising both policy analysis and interviews with key actors it retells the changing role of the state in internet regulation since the inception of the internet to the present day It also explores the complex relationships between public administrations and internet organizations and considers whether states are really capable of governing the digital space It will appeal to all those interested in public policy digital studies sociology and communication studies e-Citizens Alfredo M. Ronchi,2019-03-06 This book explores a society currently being transformed by the influence of advanced information technology and provides insights into the main technological and human issues and a holistic approach to inclusion security safety and last but not least privacy and freedom of expression Its main aim is to bridge the gap between technological solutions their successful implementation and the fruitful utilization of the main set of e Services offered by governments private institutions and commercial companies Today various parameters actively influence e Services success or failure cultural aspects organisational issues bureaucracy and workflow infrastructure and technology in general user habits literacy capacity or merely interaction design The purpose of this book is to help in outlining and understanding a realistic scenario of what we can term e Citizenry It identifies today s citizen who is surrounded by an abundance of digital services as an e Citizen and explores the transition from their traditional role and behaviour to new ones The respective chapters presented here will lay the foundation of the technological and social environment in which this societal transition takes place With its balanced humanistic and technological approach the book mainly targets public authorities decision makers stakeholders solution developers and graduate students *Google Me* Barbara Cassin,2017-10-03 Google is a champion of cultural democracy but without culture and without democracy In this witty and polemical critique the philosopher Barbara Cassin takes aim at Google and our culture of big data Enlisting her formidable knowledge of the rhetorical tradition Cassin demolishes the Google myth of a good tech company and its democracy of clicks laying bare the philosophical poverty and political naivet that underwrites its founding slogans Organize the world s information and Don t be evil For Cassin this conjunction of globalizing knowledge and moral imperative is frighteningly similar to the way American demagogues justify their own universalizing mission before the world While sensitive to the possibilities of technology and to Google s playful appeal Cassin shows what is lost when a narrow worship of information becomes dogma such that research comes to mean data mining and other languages become provincial flavors folded into an impoverished Globish or global English *Communication with God, Gods, and Humans* Urlacher Bernard

,2025-01-03 Can we send messages to God gods and deities Do God and divinities send messages to humans In this little work which extends his study of Pentecostalism Bernard Urlacher answers these two questions in the affirmative with numerous examples He lists the various forms of religion and communication between humans and the divine whether marginal or not Using numerous examples he shows how religion is being transformed by the leisure market Internet migration the metaverse and discoveries in medicine and the life sciences   , **The Routledge Companion to Global Internet Histories** Gerard Goggin,Mark McLelland,2017-02-17 The Routledge Companion to Global Internet Histories brings together research on the diverse Internet histories that have evolved in different regions language cultures and social contexts across the globe While the Internet is now in its fifth decade the understanding and formulation of its histories outside of an anglophone framework is still very much in its infancy From Tunisia to Taiwan this volume emphasizes the importance of understanding and formulating Internet histories outside of the anglophone case studies and theoretical paradigms that have thus far dominated academic scholarship on Internet history Interdisciplinary in scope the collection offers a variety of historical lenses on the development of the Internet as a new communication technology seen in the context of older technologies as a new form of sociality read alongside previous technologically mediated means of relating and as a new media vehicle for the communication of content   **The Inventions of Louis Pouzin** Chantal Lebrument,Fabien Soyez,2019-12-17 This book recounts the adventures of Louis Pouzin who invented one of the core elements for transmitting data over today s Internet the datagram He also created one of the most widely used computer programming languages the Shell and is currently at age 88 a leader in the development of a new Internet RINA Louis Pouzin is not well known in his own country France but is acclaimed by his peers internationally He was ignored in France for years although he is one of the very few French scientists who has met Queen Elizabeth II three times This lack of appreciation on the part of the French public is also due to the fact that despite the motto publish or perish current in scientific circles he has an impressive list of scientific publications but only one book in English to present his incredible achievement carried out with an exceptional team the Cyclades project This book is the story of a life and a team It is the journey of a visionary intellectual who has always been one step ahead and has fully adapted to the 21st century though born into a very modest family in a small village in central France at the beginning of the 20th century What makes Louis Pouzin so special is that he is a leader and decision maker who knows how to attract the right people to get projects done He never admits defeat even when short sighted politicians absurdly order him to scrap his breakthroughs In its making this book which is written for everyone interested in the true history of the Web has strictly respected the basic rules of any journalistic investigation interviews with those who made history cross referencing of sources and documentary research   Intelligence and Artificial Intelligence Ulrich Ratsch,Michael M.
