Digital Forensics and Forensic Investigations: Breakthroughs in Research and Practice Management Association, Information Resources, 2020-04-03 As computer and internet technologies continue to advance at a fast pace the rate of cybercrimes is increasing Crimes employing mobile devices data embedding mining systems computers network communications or any malware impose a huge threat to data security while cyberbullying cyberstalking child pornography and trafficking crimes are made easier through the anonymity of the internet New developments in digital forensics tools and an understanding of current criminal activities can greatly assist in minimizing attacks on individuals organizations and society as a whole Digital Forensics and Forensic Investigations Breakthroughs in Research and Practice addresses current challenges and issues emerging in cyber forensics and new investigative tools and methods that can be adopted and implemented to address these issues and counter security breaches within various organizations It also examines a variety of topics such as advanced techniques for forensic developments in computer and communication link environments and legal perspectives including procedures for cyber investigations standards and policies Highlighting a range of topics such as cybercrime threat detection and forensic science this publication is an ideal reference source for security analysts law enforcement lawmakers government officials IT professionals researchers practitioners academicians and students currently investigating the up and coming aspects surrounding network security computer science and security engineering Cyber Warfare and Terrorism: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2020-03-06 Through the rise of big data and the internet of things terrorist organizations have been freed from geographic and logistical confines and now have more power than ever before to strike the average citizen directly at home This coupled with the inherently asymmetrical nature of cyberwarfare which grants great advantage to the attacker has created an unprecedented national security risk that both governments and their citizens are woefully ill prepared to face Examining cyber warfare and terrorism through a critical and academic perspective can lead to a better understanding of its foundations and implications Cyber Warfare and Terrorism Concepts Methodologies Tools and Applications is an essential reference for the latest research on the utilization of online tools by terrorist organizations to communicate with and recruit potential extremists and examines effective countermeasures employed by law enforcement agencies to defend against such threats Highlighting a range of topics such as cyber threats digital intelligence and counterterrorism this multi volume book is ideally designed for law enforcement government officials lawmakers security analysts IT specialists software developers intelligence and security practitioners students educators and researchers **Image and Myth** Luca Giuliani, 2013-09-11 On museum visits we pass by beautiful well preserved vases from ancient Greece but how often do we understand what the images on them depict In Image and Myth Luca Giuliani tells the stories behind the pictures exploring how artists of antiquity had to determine which motifs or historical and mythic events to use to tell an underlying story while also keeping

in mind the tastes and expectations of paying clients Covering the range of Greek style and its growth between the early Archaic and Hellenistic periods Giuliani describes the intellectual social and artistic contexts in which the images were created He reveals that developments in Greek vase painting were driven as much by the times as they were by tradition the better known the story the less leeway the artists had in interpreting it As literary culture transformed from an oral tradition in which stories were always in flux to the stability of written texts the images produced by artists eventually became nothing more than illustrations of canonical works At once a work of cultural and art history *Image and Myth* builds a new way of understanding the visual culture of ancient Greece

Digital Forensics in the Age of AI Omar, Marwan,Zangana, Hewa Majeed,2024-12-30 As artificial intelligence advances it continues to revolutionize every field including digital forensics In an era where cybercrime is sophisticated and data breaches are common digital forensics plays a crucial role in uncovering evidence solving crimes and ensuring justice The integration of AI technologies into digital forensic investigations has enhanced the ability to analyze data quickly and accurately uncover hidden patterns and track complex digital footprints However this technological evolution also presents new challenges as AI can both assist criminals in covering their tracks and introduce ethical dilemmas regarding privacy and data security Navigating the intersection of digital forensics and AI requires cutting edge tools and further understanding of the potential risks and opportunities they bring *Digital Forensics in the Age of AI* explores the rapidly evolving intersection of deep learning and cybersecurity offering in depth analysis on how AI driven techniques are being used to address complex security challenges It provides a comprehensive view of the current research landscape while identifying emerging trends cutting edge methodologies and practical applications of deep learning in cybersecurity This book covers topics such as fraud detection cybercrime and Internet of Things and is a useful resource for computer engineers security professionals business owners academicians researchers and scientists

Face Image Analysis by Unsupervised Learning Marian Stewart Bartlett,2012-12-06 *Face Image Analysis by Unsupervised Learning* explores adaptive approaches to image analysis It draws upon principles of unsupervised learning and information theory to adapt processing to the immediate task environment In contrast to more traditional approaches to image analysis in which relevant structure is determined in advance and extracted using hand engineered techniques *Face Image Analysis by Unsupervised Learning* explores methods that have roots in biological vision and or learn about the image structure directly from the image ensemble Particular attention is paid to unsupervised learning techniques for encoding the statistical dependencies in the image ensemble The first part of this volume reviews unsupervised learning information theory independent component analysis and their relation to biological vision Next a face image representation using independent component analysis ICA is developed which is an unsupervised learning technique based on optimal information transfer between neurons The ICA representation is compared to a number of other face representations including eigenfaces and Gabor wavelets on tasks of identity recognition and expression analysis Finally methods for learning features that are robust

to changes in viewpoint and lighting are presented These studies provide evidence that encoding input dependencies through unsupervised learning is an effective strategy for face recognition Face Image Analysis by Unsupervised Learning is suitable as a secondary text for a graduate level course and as a reference for researchers and practitioners in industry

*Multimedia Forensics* Husrev Taha Sencar,Luisa Verdoliva,Nasir Memon,2022-04-02 This book is open access Media forensics has never been more relevant to societal life Not only media content represents an ever increasing share of the data traveling on the net and the preferred communications means for most users it has also become integral part of most innovative applications in the digital information ecosystem that serves various sectors of society from the entertainment to journalism to politics Undoubtedly the advances in deep learning and computational imaging contributed significantly to this outcome The underlying technologies that drive this trend however also pose a profound challenge in establishing trust in what we see hear and read and make media content the preferred target of malicious attacks In this new threat landscape powered by innovative imaging technologies and sophisticated tools based on autoencoders and generative adversarial networks this book fills an important gap It presents a comprehensive review of state of the art forensics capabilities that relate to media attribution integrity and authenticity verification and counter forensics Its content is developed to provide practitioners researchers photo and video enthusiasts and students a holistic view of the field *Stars and Scars* Jeff

Jones,2023-09-15 Jeff Jones tells the incredible story of Jewish boxing in London a tale that stretches back centuries and includes a remarkable cast of characters who fought prejudice both inside and outside the ring **The Networked Image in Post-Digital Culture** Andrew Dewdney,Katrina Sluis,2022-07-12 This collection examines how the networked image establishes new social practices for the user and presents new challenges for cultural practitioners engaged in making curating teaching exhibiting archiving and preserving born digital objects The mode of vision and imaging established through photography over the previous two centuries has and continues to be radically reconfigured by a hybrid of algorithms computing programmed capture and display devices and an array of online platforms The image under these new conditions is filtered fluid fleeting permeable mobile and distributed and is changing our ways of seeing The chapters in this volume are the outcome of research conducted at the Centre for the Study of the Networked Image CSNI and its collaboration with The Photographers Gallery over the last ten years The book s contributors investigate radical changes in the meanings and values of hybridised media in socio technical networks and speak to the creeping automation of culture through applications of AI social media platforms and the financialisation of data This interdisciplinary collection draws upon media and cultural studies art history art practice photographic theory user design animation museology and computer science as a way of making sense of the specific cultural consequences of the rapid succession of changes in image technologies and to bring the story up to date It will be of particular interest to scholars and students of visual culture media studies and photography Computer-Generated Phase-Only Holograms for 3D Displays Peter Wai Ming Tsang,2021-01-21

Phase only Fresnel holograms which can be displayed on a single SLM without the need for lenses or complicated optical accessories substantially simplifies 3 D holographic display systems Exploring essential concepts theories and formulations of these phase only Fresnel holograms this book provides comprehensive coverage of modern methods for generating such holograms which pave the way for commercial products such as compact holographic projectors heads up displays and data security enhancement Relevant MATLAB codes are provided for readers to implement and evaluate the theories and formulations of different methods and can be used as a quick start framework for further research and development This is a crucial and up to date treatment of phase only Fresnel holograms for students and researchers in electrical and electronic engineering computer science engineering applied physics information technology and multimedia technology as well as engineers and scientists in industry developing new products on 3 D displays and holographic projection Medical Image Computing and Computer-Assisted Intervention - MICCAI 2014 Polina Golland,Nobuhiko Hata,Christian Barillot,Joachim Hornegger,Robert Howe,2014-08-31 The three volume set LNCS 8673 8674 and 8675 constitutes the refereed proceedings of the 17th International Conference on Medical Image Computing and Computer Assisted Intervention MICCAI 2014 held in Boston MA USA in September 2014 Based on rigorous peer reviews the program committee carefully selected 253 revised papers from 862 submissions for presentation in three volumes The 100 papers included in the first volume have been organized in the following topical sections microstructure imaging image reconstruction and enhancement registration segmentation intervention planning and guidance oncology and optical imaging *Word Becomes Image: Openwork vessels as a reflection of Late Antique transformation* Hallie G. Meredith,2015-07-31 Presents a diachronic investigation providing a rich case study as well as an approach tracing the contours of a category of Roman material culture defined by the Roman period technique of openwork carving This work shows how openwork vessels are a reflection of a wide reaching Roman cultural aesthetic Seminole County , **Digital Image Processing Using Python** Dr. Manish Kashyap,2025-01-28 DESCRIPTION Digital Image Processing Using Python offers a comprehensive guide to mastering image processing techniques through practical Python implementations It equips you with the essential tools and knowledge to manipulate analyze and transform digital images using the powerful programming language Python This book offers a comprehensive exploration of digital image processing combining theoretical foundations with practical applications Starting with fundamental concepts like image representation and pixel neighborhoods the book teaches Python programming and essential libraries for image manipulation It covers a wide range of techniques including spatial and frequency domain filtering non linear processing noise reduction wavelet transforms and binary morphology Advanced topics such as phase based processing multi resolution analysis and morphological operations are also explored in depth The book provides practical examples and exercises to reinforce learning and equip readers with the skills needed to effectively process and analyze digital images for various applications By integrating Python code with visual examples you will gain practical

experience and insights that are directly applicable to your work This approach ensures that you not only learn theoretical concepts but also understand how to implement them effectively in real world situations

**KEY FEATURES** Builds a strong foundation in digital image processing covering essential topics from basics to advanced techniques Includes practical exercises to master Python programming and essential libraries like OpenCV and NumPy for image manipulation tasks Applies concepts to real world scenarios like image restoration object detection and medical imaging

**WHAT YOU WILL LEARN** Implement image processing techniques using Python libraries and tools Understand core concepts like filtering segmentation and enhancement Apply practical Python code to real world image processing tasks Develop skills to analyze and manipulate digital images effectively Create and visualize image processing algorithms with hands on examples

**WHO THIS BOOK IS FOR** This book is perfect for undergraduate and master s level students seeking to grasp image processing concepts or professionals working in fields like computer vision artificial intelligence or medical imaging

**TABLE OF CONTENTS**

- 1 Introduction to Digital Images
- 2 Python Fundamentals and Related Libraries
- 3 Playing with Digital Images
- 4 Spatial Domain Processing
- 5 Frequency Domain Image Processing
- 6 Non linear Image Processing and the Issue of Phase
- 7 Noise and Image Restoration
- 8 Wavelet Transform and Multi resolution Analysis
- 9 Binary Morphology

**Computer Analysis of Images and Patterns** Ainhoa Berciano, Daniel Díaz-Pernil, Walter Kropatsch, Helena Molina-Abril, Pedro Real, 2011-08-19 The two volume set LNCS 6854 6855 constitutes the refereed proceedings of the International Conference on Computer Analysis of Images and Patterns CAIP 2011 which took place in Seville Spain August 29 31 2011 The 138 papers presented together with 2 invited talks were carefully reviewed and selected from 286 submissions The papers are organized in topical section on motion analysis image and shape models segmentation and grouping shape recovery kernel methods medical imaging structural pattern recognition Biometrics image and video processing calibration and tracking and stereo vision

Marrakesh Morocco during October 6 10 2024 MICCAI accepted 857 full papers from 2781 submissions They focus on neuroimaging image registration computational pathology computer aided diagnosis treatment response and outcome prediction image guided intervention visualization surgical planning and surgical data science image reconstruction image segmentation machine learning etc

**Pattern Recognition and Image Analysis** Jorge S. Marques, Nicolás Pérez de la Blanca, Pedro Pina, 2005-05-13 IbPRIA 2005 Iberian Conference on Pattern Recognition and Image Analysis was the second of a series of conferences jointly organized every two years by the Portuguese and Spanish Associations for Pattern Recognition APRP AERFAI with the support of the International Association for Pattern Recognition IAPR This year IbPRIA was hosted by the Institute for Systems and Robotics and the Geo systems Center of the Instituto Superior Tecnico and it was held in Estoril Portugal It provided the opportunity to bring together researchers from all over the world to discuss some of the most recent advances in pattern recognition and all areas of video image and signal processing There was a very positive response to the Call for Papers for IbPRIA 2005 We received 292 full papers from 38 countries and 170 were accepted for presentation at the conference The high quality of the scientific program of IbPRIA 2005 was due first to the authors who submitted excellent contributions and second to the dedicated collaboration of the international Program Committee and the other researchers who reviewed the papers Each paper was reviewed by two reviewers in a blind process We would like to thank all the authors for submitting their contributions and for sharing their research activities We are particularly indebted to the Program Committee members and to all the reviewers for their precious evaluations which permitted us to set up this publication
