**Taken for Grantedness** Richard Ling, 2012-10-26 An examination of how the mobile phone has become part of the fabric of society as did such earlier technologies as the clock and the car Why do we feel insulted or exasperated when our friends and family don t answer their mobile phones If the Internet has allowed us to broaden our social world into a virtual friend net the mobile phone is an instrument of a more intimate social sphere The mobile phone provides a taken for granted link to the people to whom we are closest when we are without it social and domestic disarray may result In just a few years the mobile phone has become central to the functioning of society In this book Rich Ling explores the process by

which the mobile phone has become embedded in society comparing it to earlier technologies that changed the character of our social interaction and along the way became taken for granted Ling drawing on research interviews and quantitative material shows how the mobile phone and the clock and the automobile before it can be regarded as a social mediation technology with a critical mass of users a supporting ideology changes in the social ecology and a web of mutual expectations regarding use By examining the similarities and synergies among these three technologies Ling sheds a more general light on how technical systems become embedded in society and how they support social interaction within the closest sphere of friends and family **Practice Made Perfect** Marsha L.
