Industrial Era 4.0 society encounters significant environmental economic and social challenges. Thus educational institutions need to ensure that all students are well prepared for the future and that they can act as agents of change. As a result educational institutions must expand their educational system extensively to address these challenges including reshaping teaching and learning notions and platforms that immensely focus on not only developing a broad set of academic staff and students' knowledge, skills, attitudes and values but also upholding the fast growing technology. Building strong learning connections should be perceived as the highest priority in educational institutions. The connection paves the way for critical thinking and it is a fundamental concept that connects both context and relevance. In this digital information age technology has enormous potential to assist this whole process of connection. The 5th International Conference of Current Issues in Education (ICCIE) 2023 provides platforms for researchers and practitioners to share their ideas and experiences concerning these issues. The conference also brings an excellent opportunity to connect with global participants and enhance further collaborations.

Teaching the SCANS Competencies United States. Department of Labor. Secretary's Commission on Achieving Necessary Skills, 1993. Testing and assessment in vocational education. , Essential Skills And Competencies For Supply Chain Professionals And Future Leaders In Asia: A Framework For Planning And Managing Supply Chain Talents Albert Tan, Sreejith Balasubramanian, Siti Norida Wahab, 2022-09-16. This book is the first of its kind in attempting to identify the skills and competencies required of supply chain leaders in Asia. In 2020 McKinsey reported that they believe leaders should not just fix their supply chains temporarily but to transform them. Reimagining supply chains to avoid past traps and meet future needs will require a comprehensive approach in reskilling supply chain professionals to build new competencies for new norms. This book showcases the results of quantitative and qualitative research including surveys and interviews with supply chain managers across Asia highlighting the essential skills and competencies required to be a successful supply chain manager. A framework to plan and manage supply chain talents and strategies for recruiting and retaining supply chain talents are also included. The contributors of this book include Janya Chanchaichujit, Nguyen Thi Hong Hanh, Victoria Sumit Mitra, Sherman Ong and Juliater Simarmata.
