This volume consists of focused articles from the authoritative Encyclopedia of Infant and Early Childhood Development and specifically targets the ages 0-3. Providing summary overviews of basic and cutting edge research, coverage includes attention, assessment, bilingualism, categorization, skills, critical periods, learning disabilities, reasoning, speech development, etc. This collection of articles provides an essential, affordable reference for researchers, graduate students and clinicians interested in cognitive development, language development and memory as well as those developmental psychologists interested in all aspects of development. Focused content on age 0-3 saves time searching for and wading through lit on full age range for developmentally relevant info.
