Children's drawings: Evidence-based research and practice Matteo Angelo Fabris, Monica Shiakou, Claudio Longobardi, Christiane Lange-Küttner, 2023-08-24 *Understanding Children's Drawings* Michaela Strauss, 2021-10-14 It is not uncommon for children s drawings to end up in the wastepaper basket Yet these early artistic expressions indicate how children communicate with their environment From the first scratches and scribbles to the detailed sketches of houses and people the drawings and paintings of our young ones are significant manifestations of inner processes containing important statements about their development and gradual incarnation into a physical body Michaela Strauss s classic work is a pioneer study that can strengthen observation understanding and love for the being of the child both in the home and the kindergarten First issued in 1978 it is republished here with revisions improved reproductions a larger format and more than 40 pages of colour illustrations In its drawings the child describes for us different conditions of consciousness which are parallel with those of cultural epochs Michaela Strauss *Uncovering the History of Children's Drawing and Art* Donna Kelly, 2004-01-30 Reactions to children s artwork have varied throughout different times and places Donna Darling Kelly is calling for a more joyful appreciation of our youngest artists She presents the dichotomy of the Mirror and Window paradigms First she explains the Mirror paradigm which art educators psychologists and art historians use it is a psychological focus on children s art It can be defined as the ability of the child to represent images of something other than the object itself Psychologists who believe in this theory are interested in the self reflective qualities of children s drawing as they relate to language intelligence and cognitive development The opposing Window paradigm is an aesthetic perspective followed by people working in the arts The subscribers to this theory see children s art as an objective reproduction of reality that carries all of the meaning with the image The act of representation is the ultimate goal in this model not the truth behind the goal Darling Kelly would like to see the interested parties in the field of children s art placing less emphasis on the prevailing Mirror paradigm and embrace the Window paradigm Art educators often feel sidelined because subjects such as science and mathematics are requisites while art remains at best an elective Art is often classified as a sub discipline concerned primarily with therapeutic areas An unwanted effect of the Mirror paradigm is the stereotypical psychological model of the artist as a hopelessly neurotic or troubled soul This volume is a call to arms for the aesthetic Window paradigm so that art as an autonomous discipline can gain stature in the curriculum of all children s schools Making Sense of Children's Drawings John Willats, 2006-04-21 The message of this book is a simple one children learn to draw by acquiring increasingly complex and effective drawing rules In this regard learning to draw is like learning a language and as with language children use these rules creatively making infinite use of finite means Learning to draw is thus like learning a
