For the most part, they are variants on a religious or mystical theme. These provide a purpose to life but not the purpose of life. A full rational explanation of our existence based on our rapidly accumulating scientific knowledge has eluded us until now. The explanation of life which is offered in this book draws on three main components: evolution, genetics and psychology. However, something exists in our mind which stops us from seeing clearly what is already before us. Once this block is removed, we can view life objectively and see it as a special form of information which has arisen through evolution. Information is identified as the unifying entity of the universe which is inherent in the spatial arrangement of matter. This book relates these findings to our world and our lives. It sets out in rational terms where we came from, how we got here and finally reveals our destiny. www.thelastbook.co.uk
