rockets as I felt the seatbelt harness start to cut into my shoulder I knew that we were into our turn After I had turned the ship about 45 I shut the engines down but within a few seconds the ship seemed too turned back to its original course I then fired our left steering rockets but the ship didn't turn at all as we all stared helplessly at the ship's Main monitor we realized that straight in front of us was a large mass Minute by minute the mass grew clearer until we were able to see this large gaping black hole Oh no Sue screamed covering her eyes with her hands Within a second or two we felt ourselves being sucked into it as we passed the holes outer edge the ship seemed too changed directives immediately heading down into the hole I felt my seat belt drastically cutting into my shoulder and I was on the verge of blacking out I'll see you both in our next lifetime I remember saying and then everything went black
