Im Not Crazy I Just Lost My Glasses:

I'm Not Crazy, I Just Lost My Glasses Lonny Shavelson, 1986 *Surviving Mental Illness* Agnes B. Hatfield, Harriet P. Lefley, 1993-05-22 In this era of revolutionary progress in the areas of science and medicine it comes as no surprise that knowledge of the biology of mental illness and psychopharmacologic treatments has increased greatly within the past few decades During this same time frame however the experiential side of mental illness has been almost completely neglected by researchers and educators Fortunately the trend is being reversed Leading authorities are becoming increasingly aware that the personal experiences of people with severe and persistent mental illness can reveal the most authentic and perhaps most helpful information on behaviors that have long puzzled professionals in the field This has contributed to a renewed and growing interest in learning more about the ways people experience mental illness and the process of recovery Leading the way in redressing the imbalance this book examines the subjective experiences of patients with multiple diagnoses including schizophrenia bipolar illness major endogenous depression and other disorders with psychotic features and long term disabling consequences Numerous personal accounts are drawn from research reports newsletters journals spoken reports and observed behavior to shed light on the inner worlds of people afflicted with severe and persistent mental illness The volume covers a wide range of topics starting with disturbances in the sense of self in emotions relationships and behaviors and in the ways reality is experienced by the mentally ill In the process some common patterns of lifetime experience are revealed even among patients with great differences in levels of functional capability and in their emotional and rational assessment of their experience The final section of the book is directed toward understanding the process of acceptance growth toward recovery and the development of an acceptable identity and new purpose in life Material is presented within the conceptual framework of coping and adaptation and self theory in addition considerable attention is given to the patient's perception of which types of personal and professional relationships have been helpful or not helpful As a result the book yields important lessons from the patients themselves on how service providers caregivers and the community at large can be most helpful to those afflicted with major mental illness Professionals who wish to increase their capacity for empathy develop more effective rehabilitation strategies and advance research linking brain anomalies and patient experience will find this book illuminating Because it illustrates in moving and powerful ways how people truly experience psychiatric disability in a society that demeans their condition and in a helping environment that only dimly understands their agony the book will be extremely useful for psychiatrists psychologists social workers psychiatric nurses educators and graduate students in psychopathology and clinical skills training *Hooked* Lonny Shavelson, 2002 Follows the lives of five narcotics addicts for two years as they move through various drug rehabilitation programs in San Francisco PhotoTherapy Techniques Judy Weiser, 2018-11-09 PhotoTherapy techniques use personal snapshots and family photos to connect with feelings thoughts and memories during therapy and counselling sessions in ways that words alone cannot do PhotoTherapy

Practicing Cognitive Therapy Robert L. Leahy, 1997-08-01 Since its development thirty five years ago the practice of cognitive therapy has been extended well beyond the treatment of depression It is now effectively used with substance abuse marital conflict sexual dysfunction panic disorders post traumatic stress disorders paranoid delusional disorders and a variety of other affective anxiety and personality disorders Each chapter in this volume presents state of the art treatment by one of the field's leading practitioners demonstrating interventions in rich clinical detail for the therapist interested in why the method works and how to apply it We also see how other theoretical orientations are integrated into the cognitive framework One cannot help but be impressed with the ability of these clinicians to adapt the cognitive therapy model to the needs of individual patients comments the founder of the model Aaron Beck who called Robert Leahy's earlier book *Cognitive Therapy Basic Principles and Applications* a treasure trove for clinicians scholars and researchers Paperbound Books in Print, 1992 From Madness to Mental Health Greg Eghigian, 2009-12-10 *From Madness to Mental Health* neither glorifies nor denigrates the contributions of psychiatry clinical psychology and psychotherapy but rather considers how mental disorders have historically challenged the ways in which human beings have understood and valued their bodies minds and souls Greg Eghigian has compiled a unique anthology of readings from ancient times to the present that includes Hippocrates Julian of Norwich's *Revelations of Divine Love* penned in the 1390s Dorothea Dix Aaron T Beck Carl Rogers and others culled from religious texts clinical case studies memoirs academic lectures hospital and government records legal and medical treatises and art collections Incorporating historical
