Image And Reality:

Image, Reality and Media Construction Fengmin Yan, 2019-09-24 This book explores how news media construct social issues and events and thereby convey certain perceptions within the scope of framing theory By operationalizing media framing as a process of interpretation through defining problem diagnosing causes making moral judgments and suggesting solutions the book proposes a systematic and transparent approach to images in news discourse Based on a frame analysis it examines how German news media framed a list of China related issues and events and thereby conveyed particular beliefs and opinions on this country Moreover it investigates whether there were dominant patterns of interpretation and the extent to which diverse views were evident by comparing two major daily newspapers with opposite political orientations the FAZ and the taz Motivated by the relationship between image and reality the book explores image formation and persistence from media construction of meaning and human cognitive complexity in perceiving others Media select certain issues and events and then interpret them from particular perspectives A variety of professional and non professional factors behind news making may result in biased representations In addition from a social psychological perspective inaccurate perceptions of foreign cultures may arise from categorical thinking biased processing of stimulus information intergroup conflicts of interest and in group favoritism Accordingly whether media coverage deviates from reality is not the main concern of this book instead it emphasizes the underlying logics upon which the conclusions and judgments were drawn It therefore contributes to a rational understanding of Western discourse and holds practical implications for both Chinese public diplomacy and a more constructive role of news media in promoting the understanding of others *Psychology of the Image* Michael

The Pictorial Turn Neal Curtis, 2013-09-13 In 1992 W J T Mitchell argued for a pictorial turn in the humanities registering a renewed interest in and prevalence of pictures and images in what had been understood as an age of simulation or an increasingly extensive and diverse visual culture However in what is often characterized as a society of the spectacle we still do not know exactly what pictures or images are what their relation to language is how they operate on observers and the world how their history is to be understood and what is to be done with or about them In this seminal collection of essays the first to be devoted to the pictorial turn theorists from across the humanities and social sciences representing the disciplines of art history philosophy geography media studies visual studies and anthropology are brought together with a paleontologist and practising artists to consider amongst other things the relation between pictures and images the power of landscape the nature of political images the status of images in the natural sciences the life of images and the pictorial uncanny With these topics in mind picture theory and iconology exceed in scope the objects of visual culture conventionally understood This book was published as a special issue of Culture Theory and Critique

A Susan Sontag Reader Susan Sontag, 2014-09-09 Susan Sontag occupies a special place in Modern American letters She has become our most important critic while her brilliant novels and short fiction are at long last getting the recognition they deserve Sontag is above all a writer which is only to say that though the form may differ there is an essential unity in all her work The truth of this is perhaps more evident in A Susan Sontag Reader than in any of Sontag s individual books The writer selected a sampling of her work meaning the choice both to reflect accurately a career and also to guide the reader toward those qualities and concerns which she prizes in her own writing A Susan Sontag Reader is arranged chronologically and draws on most of Sontag s books There are selections from her two novels The Benefactor and Death Kit and from her collections of short stories I etcetera The famous essays from the 1960s Against Interpretation Notes on Camp and On Style which established Sontag s reputation and can be fairly said to have shaped the cultural views of a generation are included as are selctions from her two subsequent volumes of essays Styles of Radical Will and Under the Sign of Satury A part of Sontag s best selling On Photography is also included It is astonishing to read these works when they are detached from the books they appeared in and offered instead in the order in which Sontag wrote them The connections between various literary forms the progression of themes are revealed in often startling ways Moreover Sontag has included a long interview in which she moves mroe informally over the whole range of her concerns and of her work The volume ends with Writing Itself a previously uncollected essay on Roland Barthes which in the eyes of many is one of Sontag s finest achievements This collection is in a sense both a self potrait and a key for a reader to understand the work of one of the most
