Images Of Issues Typifying Contemporary Social Problems:

Images of Issues Joel Best, 1995-01 Constructionist theory describes and analyzes social problems as emerging through the efforts of claimsmakers who bring issues to public attention These claims inevitably typify the problem characterizing it as a problem of a particular sort In turn such typifications shape the ways in which policymakers and the public respond to the claims Like the widely adopted first edition this new edition of Images of Issues explores the nature of typification and its consequences The second edition is addressed to claimsmaking in the 1990s It features ten all new chapters on such current issues as fathers rights stalking sexual abuse by the clergy hate crimes multicultural education and factory farming Most of the chapters that appeared in the first edition have been substantially revised and updated including the afterword which contains an expanded discussion of the theoretical debate over constructionism The chapters are organized around important themes the nature of claims the roles of claimsmakers connections among claimsmaking campaigns and the impact of claims on social policy BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Images

of Issues Joel Best, 1995 Constructionist theory describes and analyzes social problems as emerging through the efforts of claimsmakers who bring issues to public attention By typifying a problem and characterizing it as a particular sort claimsmakers can shape policymaking and public response to the problem Th is new edition of Images of Issues addresses claimsmaking in the 1990s featuring such issues as fathers rights stalking sexual abuse by the clergy hate crimes multicultural education factory farming and concluding with an expanded discussion of the theoretical debate over constructionism **Images of Issues** Joel Best, Constructionist theory describes and analyzes social problems as emerging

through the efforts of claimsmakers who bring issues to public attention By typifying a problem and characterizing it as a particular sort claimsmakers can shape policymaking and public response to the problem Th is new edition of Images of Issues addresses claimsmaking in the 1990s featuring such issues as fathers rights stalking sexual abuse by the clergy hate crimes multicultural education factory farming and concluding with an expanded discussion of the theoretical debate over constructionism **Handbook of Constructionist Research** James A. Holstein, Jaber F. Gubrium, 2013-10-21

Constructionism has become one of the most popular research approaches in the social sciences But until now little attention has been given to the conceptual and methodological underpinnings of the constructionist stance and the remarkable diversity within the field This cutting edge handbook brings together a dazzling array of scholars to review the foundations of constructionist research how it is put into practice in multiple disciplines and where it may be headed in the future The volume critically examines the analytic frameworks strategies of inquiry and methodological choices that together form the mosaic of contemporary constructionism making it an authoritative reference for anyone interested in conducting research in a constructionist vein **Social Problems** Donileen R. Loseke, Joel Best, 2003 This collection of focused essays is directed at

several levels of students of social problems It is accessible to the uninitiated who are not familiar with the constructionist

literature and aimed at those who are not particularly interested in subtle theoretical and empirical issues of concern to academics studying social problems from constructionist perspectives Some readings focus on the construction of problems by scientists and other professionals others examine the work of social activists mass media and social service personnel Among the topics included are studies of social inequalities and individual deviance a comparison of the images of social problems in the United States with those in other countries and an examination of the importance of politics and power in constructing public images of social problems Constructionist perspectives have become the leading theoretical approach for sociology and allied fields in studying social problems Yet constructionists impact on the teaching of social problems has been far less dramatic Undergraduate courses on social problems are often subject to a theoretical barrage of eclectic perspectives Just as the first social problems textbooks did almost a century ago textbooks continue to present a series of unrelated chapters each devoted to a particular social problem Social Problems is an effort at systematic analysis rather than random thought on the subject Social Problems presents detailed case studies demonstrating how constructionist perspectives can actually be applied to understand particular social problems While these articles can be read alone the editors have organized these selections to correspond with the chapter topics in the second edition of Donileen Loseke's Thinking about Social Problems an accessible introduction to constructionist approaches At the same time some instructors who use this edited collection might wish to provide their own mix to the selection process Many of the contributions make multiple points and so reasonably could be used to illustrate other basic texts or classic studies in the field of social problems Donileen R Loseke is professor of sociology at the University of South Florida Joel Best is professor and chair Department of Sociology and Criminal Justice University of Delaware He has also served as an advisory editor for Aldine in the area of social problems

Images of Issues J. Best, 1989 Thinking About Social Problems Donileen Loseke, 2017-07-05 The new second edition of this distinctive and widely adopted textbook brings into the classroom an overview of how images of social problems can shape not only public policy and social services but also the ways in which we make sense of ourselves and others It introduces two primary changes First some attention is devoted to the new social movements that emphasize social change through identity transformation rather than through structural change Second the text now also looks more closely at the importance of emotions in constructing public consciousness of social problems When the first edition was published Teaching Sociology noted Loseke does a superb job explaining the relationship between sociology and social problems in a text that is very well researched and engaging yet with tremendous attention to detail and accuracy Would provide a solid base for any social problems class Contemporary Sociology wrote that the book is engagingly well written in a personal unpretentious style and well informed by the author's knowledge of the professional literature

The Cambridge Handbook of Social Problems: A. Javier Treviño, 2018-03-22 The introduction of the Affordable Care Act in the United States the increasing use of prescription drugs and the alleged abuse of racial profiling by police are just some of the factors

contributing to twenty first century social problems The Cambridge Handbook of Social Problems offers a wide ranging roster of the social problems currently pressing for attention and amelioration Unlike other works in this area it also gives great consideration to theoretical and methodological discussions This Handbook will benefit both undergraduate and graduate students eager to understand the sociology of social problems It is suitable for classes in social problems current events and social theory Featuring the most current research the Handbook provides an especially useful resource for sociologists and graduate students conducting research

Who Owns Domestic Abuse? Ruth Marie Mann, 2000-01-01 Mann details a community effort to establish a shelter for abused women in a small Ontario municipality She uses personal accounts of abuse to urge activists and intervenors to argue less and listen more

Social Problems in a Free Society Myles J. Kelleher, 2004-09-02 The future of the sociologist's profession is jeopardized by an ongoing trend toward the politicization of sociology and the radicalization of social problems This book calls for the rethinking of the culture of social political and economic liberty to create a resurgence of a sociological agenda Social Problems in a Free Society offers an original perspective on social problems such as violations of the principles of individual rights and the free market This book is a vision for reinvigorating the discipline in a fashion undreamt of within the wearisome strains of today's radical social problems theory

Social Problems, Law, and Society Kathryn A. Stout, Richard A. Dello Buono, William J. Chambliss, 2004-07-14 This collection of articles presents a critical issue oriented approach to law and society emphasizing its important relationship to contemporary social problems By exploring the interstitial area between the sociology of law social problems and social movements the initial chapters trace out a theoretical trajectory which points to the need to move beyond traditional and social constructionist approaches A variety of empirical studies together explore the contradictory dynamics of class as they relate to race and gender in both a national and global context illustrating the dialectical interplay between the state and social movements Employing a wide range of perspectives so as to convey the great diversity found in the contemporary sociology of law and justice studies these authors collectively share a broad consensus concerning the need to explore how social movements and the larger political economy play a pivotal role in shaping state reactions to the challenges presented by contemporary social problems With its integrated presentation of theoretical perspectives and empirical studies this unique anthology will be useful in a variety of sociology criminology and justice studies course offerings such as Law and Society Social Problems Crime and Social Justice Social Movements Law and Social Control Social Change Law and Public Policy Introduction to Legal Studies and others Undergraduate and graduate students alike will appreciate that these articles selected for their academic rigor are highly readable and strongly oriented towards high profile social issues including those of class race and gender inequalities as well as social movement and legal struggles in community national and global settings

Making Hate A Crime Valerie Jenness, Ryken Grattet, 2001-08-15 Violence motivated by racism anti-Semitism misogyny and homophobia weaves a tragic pattern throughout American history Fueled

by recent high profile cases hate crimes have achieved an unprecedented visibility Only in the past twenty years however has this kind of violence itself as old as humankind been specifically categorized and labeled as hate crime Making Hate a Crime is the first book to trace the emergence and development of hate crime as a concept illustrating how it has become institutionalized as a social fact and analyzing its policy implications In Making Hate a Crime Valerie Jenness and Ryken Grattet show how the concept of hate crime emerged and evolved over time as it traversed the arenas of American politics legislatures courts and law enforcement In the process violence against people of color immigrants Jews gays and lesbians women and persons with disabilities has come to be understood as hate crime while violence against other vulnerable victims octogenarians union members the elderly and police officers for example has not The authors reveal the crucial role social movements played in the early formulation of hate crime policy as well as the way state and federal politicians defined the content of hate crime statutes how judges determined the constitutional validity of those statutes and how law enforcement has begun to distinguish between hate crime and other crime Hate crime took on different meanings as it moved from social movement concept to law enforcement practice As a result it not only acquired a deeper jurisprudential foundation but its scope of application has been restricted in some ways and broadened in others Making Hate a Crime reveals how our current understanding of hate crime is a mix of political and legal interpretations at work in the American policymaking process Jenness and Grattet provide an insightful examination of the birth of a new category in criminal justice hate crime Their findings have implications for emerging social problems such as school violence television induced violence elder abuse as well as older ones like drunk driving stalking and sexual harassment Making Hate a Crime presents a fresh perspective on how social problems and the policies devised in response develop over time A Volume in the American Sociological Association's Rose Series in Sociology

Seasons Such As These Cynthia J. Bogard, 2003 Homelessness had become a social problem that was primarily not about solving the nation's housing crisis The pressing question becomes How and why did homelessness become the social problem in its own right one that was only tangentially related to the problem of inappropriate or insufficient housing Why when people demanded that something be done about homelessness did they get specific policies and unintended outcomes Cynthia Bogard is not content with the shorthand answers that rested on bias and ideology such as conservative politics bred conservative policies or American individualism precludes government investment in housing This did not explain homelessness sufficiently especially given all the advocacy and research that had occurred in the 1980s and 1990s Examining these claimsmaking activities as constructionists call them however is a daunting task because the activities engaged in by people in the attempt to persuade others are fluid subtle and complicated as are the responses to these social actions This raised a second set of issues that the author is concerned with How can we adequately represent and sociologically examine this very complicated human activity of social problems construction Who does the construction and to what effect Bogard's answer to these questions is a book that can be read in two ways and on multiple

levels For those who are interested in the story of the career of homelessness as a social problem in America's two national cities the book should be read from the beginning through the conclusion as a straight narrative The technical matter in the appendix can be ignored But for those readers with an interest in social problems constructionism however this book is meant as a cook book of sorts Each chapter emphasizes a feature of constructionism such as an important group of claims makers or an important aspect of the claims making process The work highlights a major feature in advanced societies the intersection of interests and claims Social constructions may be real but they are comprised of no less real social interests The work marks a real departure and advance over the original formulations of construction theory in social research Cynthia

J Bogard is associate professor of sociology at Hofstra University **The Social Science Encyclopedia** Adam Kuper, 2003-12-16 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on the key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society **Drug Courts** James L. Nolan, Drug courts offer offenders an intensive court based

treatment program as an alternative to the normal adjudication process Begun in 1989 they have since spread dramatically throughout the United States In this interdisciplinary examination of the expanding movement a distinguished panel of legal practitioners and academics offers theoretical assessments and on site empirical analyses of the workings of various courts in the United States along with detailed comparisons and contrasts with related developments in Britain Practitioners politicians and academics alike acknowledge the profound impact drug courts have had on the American criminal justice system From a range of disciplinary perspectives contributors to this volume seek to make sense of this important judicial innovation While addressing a range of questions Drug Courts also aims to achieve a careful balance between focused empirical studies and broader theoretical analyses of the same phenomenon The volume maintains an analytical concentration on drug courts and on the important practical philosophical and jurisprudential consequences of this unique form of therapeutic jurisprudence Drug courts depart from the practices and procedures of typical criminal courts Prosecutors and defense counsel play much reduced roles Often lawyers are not even present during regular drug court sessions Instead the main courtroom drama is between the judge and client both of whom speak openly and freely in the drug

court setting Often accompanying the client is a treatment provider who advises the judge and reviews the client's progress in treatment Court sessions are characterized by expressive and sometimes tearful testimonies about the recovery process and are often punctuated with applause from those in attendance Taken together the chapters provide a variety of perspectives on drug courts and extend our knowledge of the birth and evolution of a new movement Drug Courts is an essential reference for courses in criminology the sociology of drugs and deviance and the philosophy of law and punishment

Qualitative Methods and Health Policy Research Elizabeth Murphy, 2017-07-05 Qualitative researchers have traditionally been cautious about claiming that their work was scientific The right on schools have exaggerated this caution into an outright rejection of science as a model for their work Science is for them outmoded an archaic form of consciousness surviving for a while yet in a degraded form Tyler 1986 200 Scientists assertions that they are in pursuit of truth simply camouflage their own lust for power There is no essential difference between truth and propaganda The authors acknowledge that the boundary between science and propaganda has often been breached and some distrust of scientific claims may be healthy They also question the claim that science creates disinterested and objective knowledge of an observer independent world without concluding that science is impossible The skeptics reservations about qualitative research are based on the deep rooted assumption among natural scientists and some social scientists that there is a world out there prior to and independent of their observations This world can be known objectively in the sense that all observers will if identically placed see it in exactly the same way If a suitable language were available they would also all produce identical descriptions From these observations they can work out the laws governing the world's operations The authors try to resolve these contrary claims by asserting that science is a procedural commitment It consists of openness to refutation a conscientious and systematic search for contradictory evidence and a readiness to subject one's preconceptions to critical examination The devotion to truth as a regulative ideal is an essential difference between science and propaganda This work is a unique and innovative defense of scientific method

The Fight Against Big Tobacco Mark Wolfson, How has the tobacco control movement become such a significant force in shaping contemporary public policy social norms and the habits of millions of Americans This text develops two central arguments to answer this question *Creating Fear* David L. Altheide, The creative use of fear by news media and social control organizations has produced a discourse of fear The awareness and expectation that danger and risk are lurking everywhere Case studies illustrates how certain organizations and social institutions benefit from the exploitation of such fear construction One social impact is a manipulated public empathy We now have more victims than at any time in our prior history Another more troubling result is the role we have ceded to law enforcement and punishment we turn ever more readily to the state and formal control to protect us from what we fear This book attempts through the marshalling of significant data to interrupt that vicious cycle of fear discourse David Altheide employs a method which he calls tracking discourse to map how the nature and the extent of the use of the word fear has

changed since the 1980s how the topics associated with fear the topics of media discourse have also changed over the same period for example the emphasis moves over time across AIDS crime immigrants race sexuality schools and children and how certain news sources prevail over others thus protectively insulating themselves from criticism of the premises of their discourse frames

Interpreting Weight Jeffery Sobal Donna Maurer, Sociologists psychologists and nutritionists explore how people construct fatness and thinness They examine different strategies used to interpret body weight such as negotiating weight identities reinterpreting weight and becoming involved in weight related organizations Annotation copyrighted by Book News Inc Portland OR

Baring Our Souls Kathleen S. Lowney, After framing the genre in this way Dr Lowney s book raises the essential question conversion to what The faith preached on talk shows is based on the principles of the Recovery Movement among whose tenets are that care for one s self is the highest virtue and that psychological wounds that endure from childhood into adulthood create troublesome and addictive behaviors or codependency The only cure is to join a therapeutic 12 step group

BOOK JACKET Baring Our Souls probes the roots of the genre in the religion of recovery and holds both up to the scrutiny of sociological inquiry This will be a welcome supplementary text in courses in social problems media and civil religion

BOOK JACKET
