Laughing At Gravity Conversations With Isaac Newton:

Laughing at Gravity Elizabeth Socolow, 1988-01 Poems deal with the life and accomplishments of the British physicist Isaac Newton James Gleick, 2007-12-18 Isaac Newton was born in a stone farmhouse in 1642 fatherless and unwanted by his mother When he died in London in 1727 he was so renowned he was given a state funeral an unheard of honor for a subject whose achievements were in the realm of the intellect During the years he was an irascible presence at Trinity College Cambridge Newton imagined properties of nature and gave them names mass gravity velocity things our science now takes for granted Inspired by Aristotle spurred on by Galileo's discoveries and the philosophy of Descartes Newton grasped the intangible and dared to take its measure a leap of the mind unparalleled in his generation James Gleick the author of Chaos and Genius and one of the most acclaimed science writers of his generation brings the reader into Newton's reclusive life and provides startlingly clear explanations of the concepts that changed forever our perception of bodies rest and motion ideas so basic to the twenty first century it can truly be said We are all Newtonians Laughing at Gravity Elizabeth Emilie du Châtelet between Leibniz and Newton Ruth Hagengruber, 2011-10-29 Emilie du Ch telet was Socolow, 1988 one of the most influential woman philosophers of the Enlightenment Her writings on natural philosophy physics and mechanics had a decisive impact on important scientific debates of the 18th century Particularly she took an innovative and outstanding position in the controversy between Newton and Leibniz one of the fundamental scientific discourses of that time The contributions in this volume focus on this Leibnitian turn They analyze the nature and motivation of Emilie du Ch telet s synthesis of Newtonian and Leibnitian philosophy Apart from the Institutions Physiques they deal with Emilie du Ch telet s annotated translation of Isaac Newton's Principia The chapters presented here collectively demonstrate that her work was an essential contribution to the mediation between empiricist and rationalist positions in the history of science The Horse as Cultural Icon Peter Edwards, Karl A. E., Enenkel, Elspeth Graham, 2011-10-14 In spite of the importance of horses to Western society until comparatively recent times scholars have paid very little attention to them This volume helps to redress the balance emphasizing their iconic appeal as well as their utilitarian functions A Heart of Wisdom Susan Berrin, 1999-05 We all are growing older A Heart of Wisdom shows us how to understand and meet the challenges of our own process of aging and the aging of those we care about from a Jewish perspective from midlife through the elder years How does Jewish tradition influence our own aging What are the tasks and the meaning of aging How does being Jewish inform our relationships with the elderly How does living thinking and worshipping as a Jew affect us as we age How can Jewish tradition help us retain our dignity as we age Over 40 contributors people who themselves are dealing with the unique life passages that aging brings their loved ones and the rabbis social workers and other professionals who assist them offer their insights about the changes and new perspectives that come with aging retiring growing learning caring for elderly parents living and dying By sharing experiences in direct and personal narratives poems ceremonies and stories they help us explore

Light as Experience and Imagination from Medieval to Modern Times David S. Herrstrom, 2022-11-21 In Light as Experience and Imagination from Medieval to Modern Times David S Herrstrom synthesizes and interprets the experience of light as revealed in a wide range of art and literature from medieval to modern times. The true subject of the book is making sense of the individual s relationship with light rather than the investigation of light s essential nature while telling the story of light seducing individuals from the Middle Ages to our modern times Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions as reflected in art architecture and literature Instead of its evolution this book celebrates the complexity of our relation to light s character No individual experience of light being truer than any other That Kind of Danger Donna Masini, 1994-04-30 With a driving music and often startling power these poems are about the way lives are broken and rebuilt the layers of history we are often oblivious to the redemptive and transforming power of memory and imagination Urgent unwavering this provocative debut volume ultimately celebrates the tentative yet joyful moments of transcendence and grace that seeing and naming render possible All of the Above Dorothy Barresi, Leonard E.
