this knowledge alive and relevant **Law and Development in Asia** Gerald Paul McAlinn,Caslav Pejovic,2012-03-15 This book fills a gap in the literature by presenting a comprehensive overview of the key issues relating to law and development in Asia Over recent decades experts in law and development have produced multiple theories on law and development none of which were derived from close study of Asian countries and none of which fit very well with the existing evidence of how law actually functioned in these countries during periods of rapid economic development The book discusses the different models of law and development including both the developmental state model of the 1960s and the neo liberal model of the 1980s and shows how development has worked out in practice in relation to these models in a range of Asian countries including Japan Korea China Thailand Singapore India and Mongolia Particular themes examined include constitutionalism judicial and legal reform labour law the growing importance of private rights foreign investment and the international law of development Reflecting the complexity of Asian law and society both those who believe in an Asian Way which is radically different from law and development in other parts of the world as well as those who believe the arc of law and development is essentially universal will find support in this book **Rethinking Law and Development** Guanghua Yu,2013-03-12 This book is the result of the collective effort of some of the foremost experts and scholars of Chinese law Asian law and Chinese economics and carefully examines the relationship between law and China s economic development Serious inquiries and candid opinions of the contributors have made for stimulating discussion and debate in many controversial areas This book is likely to result in further research into factors affecting China s economic development political change and China s interaction with the international community The book explores the development of the Chinese legal system from both China s historical perspective taking into account the specific political and socioeconomic factors that are shaping Chinese law and from a comparative perspective exploring the interaction between China and the rest of the world The book brings together key international scholars of Chinese law and economics including Hualing Fu Roda Mushkat Randall Peerenboom Zhigang Tao and Frank Upham The first part of the book focuses on the linkages between the formal law and China s economic development looking at Chinese courts economic institutions and firm behaviour as well as contract enforcement and property rights Part two deals with issues of law human rights and social justice as they relate to economic and human development Taken as a whole the book offers a unique discourse on the interaction between law and economic and human development in China Competition Law and Development D. Daniel Sokol,Thomas K. Cheng,Ioannis Lianos,2013-09-11 The vast majority of the countries in the world are developing countries there are only thirty four OECD Organisation for Economic Co operation and Development countries and yet there is a serious dearth of attention to developing countries in the international and comparative law scholarship which has been preoccupied with the United States and the European Union Competition Law and Development investigates whether or not the competition law and policy transplanted from Europe and the United States can be successfully implemented in the developing world or whether the developing world

experience suggests a need for a different analytical framework The political and economic environment of developing countries often differs significantly from that of developed countries in ways that may have serious implications for competition law enforcement The need to devote greater attention to developing countries is also justified by the changing global economic reality in which developing countries especially China India and Brazil have emerged as economic powerhouses Together with Russia the so called BRIC countries have accounted for thirty percent of global economic growth since the term was coined in 2001 In this sense developing countries deserve more attention not because of any justifiable differences from developed countries in competition law enforcement either in theoretical or practical terms but because of their sheer economic heft This book the second in the Global Competition Law and Economics series provides a number of viewpoints of what competition law and policy mean both in theory and practice in a development context

International Law and Development Erik M G Denters, Paul Peters, de Waart, 1988-07

Beyond Law and Development Sam Adelman, Abdul Paliwala, 2022-04-27 The book highlights new imaginaries required to transcend traditional approaches to law and development The authors focus on injustices and harms to people and the environment and confront global injustices involving impoverishment patriarchy forced migration global pandemics and intellectual rights in traditional medicine resulting from maldevelopment bad governance and aftermaths of colonialism New imaginaries emphasise deconstruction of fashionable myths of law development human rights governance and post coloniality to focus on communal and feminist relationality non western legal systems personal responsibility for justice and forms of resistance to injustices The book will be of interest to students and scholars of development law and development feminism international law environmental law governance politics international relations social justice and activism

Law and Development in East and South-East Asia Christoph Antons, 2005-10-05 During the 1980s and 1990s Asian developmental states attracted much attention in political science and economics literature but the role of law in the economic development was neglected It was only after the Asian crisis of 1997 that many analysts began to focus on a lack of regulation and transparency as a major factor triggering the crisis The crucial questions now are how successful the current reforms will be and which features of the Asian approach to commercial law will be resistant to reform pressures This book examines the prospects for commercial law reform in Asia giving particular attention to Japan and Singapore as frequently cited role models for Asian developmentalism and also examining development related business laws in countries such as China Korea Indonesia Malaysia Vietnam and the Philippines

Law and Development Frank Stephen, 2018 This chapter sets the scene for the analysis contained in the author's book Law and Development An Institutional Critique Edward Elgar Publishing 2018 It discusses the reasons for the interest in the relationship between the law and economic development beginning with a review of different theories of development and the role which the law plays within each This is followed by a discussion of the US law school based Law and Development Movement of the 1960s and 70s There are lessons to be learned for our understanding of the role which

law and the legal system plays in the process of economic development by examining the rapid rise and demise of the Law and Development Movement The final section of the chapter sets out the objectives of the book and outlines how these are to be achieved It draws lessons from the failure of the Law and Development Movement in particular its lack of a theory explaining the role of law in the process of development which has been seen as a major weakness of that movement We argue that New Institutional Economics provides such a theory It is suggested that an important feature in understanding the role of markets in development is paying attention to the role of institutions and the role of culture in constraining how institutions operate
