Lazarus,2023-02-15 An updated and passionate second edition of a foundational book How did environmental law first emerge in the United States Why has it evolved in the ways that it has And what are the unique challenges inherent to environmental lawmaking in general and in the United States in particular Since its first edition The Making of Environmental Law has been foundational to our understanding of these questions For the second edition Richard J Lazarus returns to his landmark book and takes stock of developments over the last two decades Drawing on many years of experience on the frontlines of legal and policy battles Lazarus provides a theoretical overview of the challenges that environmental protection poses for lawmaking related to both the distinctive features of US lawmaking institutions and the spatial and temporal dimensions of ecological change The book explains why environmental law emerged in the manner and form that it did in the 1970s and traces how it developed over sequent decades through key laws and controversies New chapters composing more than half of the second edition examine a host of recent developments These include how Congress dropped out of environmental lawmaking in the early twenty first century the shifting role of the judiciary long overdue efforts to provide environmental justice to disadvantaged communities and the destabilization of environmental law that has resulted from the election of Presidents with dramatically clashing environmental policies As the nation s partisan divide has grown deeper and the challenge of climate change has dramatically raised the perceived stakes for opposing interests environmental law is facing its greatest challenges yet This book is essential reading for understanding where we have been and what challenges and opportunities lie ahead Corporate Environmentalism and Public Policy Thomas P. Lyon,John W. Maxwell,2004-12-13 This is the first book to provide a hard headed economic view of the voluntary approaches to environmental issues especially toxic chemicals waste disposal and global warming that have become prominent in recent

years Corporate environmental initiatives are seen as a tool for influencing the behaviour of environmental activists legislators and regulators though they may have ancillary benefits such as attracting green consumers or reducing costs Equally government voluntary programs are seen as a way to achieve modest environmental results when political resistance to mandatory policies is high Rigorous analysis is illustrated with numerous case studies drawn from the US Europe and Japan while technical details are relegated to appendices and each chapter highlights implications for corporate strategy and public policy Although rooted in economic theory this book will appeal to business strategists and policy practitioners as well as scholars and researchers *Stratospheric Ozone Damage and Legal Liability* Lisa Elges,2016-12-19 While government enforcement of laws and regulations to control the production of chlorofluorocarbons in 1987 has been hailed as exemplifying the precautionary principle for almost two decades US companies failed to take precautionary measures to prevent chemical emissions despite the probable risk of stratospheric ozone loss As a result human harms in the form of skin cancer have reached epidemic proportions globally and in the United States where today one person dies every hour from skin cancer This book reviews U S laws regulations and policies as well as case law regarding similar toxic tort cases to consider whether companies can and should be held legally liable under tort common law theories and related tort justice theories for having contributed to increased risks of skin cancer A Comparative Examination of Multi-Party Actions Joanne

Blennerhassett,2016-10-20 This monograph addresses the phenomenon of mass harm and how it may be resolved through collective redress It examines particularly how such redress may be achieved through mechanisms such as multi party actions MPAs In order to do this an analytical framework is created against which to evaluate various multi party procedures This is illustrated through the experience of a selection of common law jurisdictions in dealing with mass harm namely that of England and Wales Canada Australia and the United States as well as that of EU collective redress It examines multi party action laws benchmarked against the objectives identified in the analytical framework The phenomenon of environmental mass harm in particular is explored as a case study as it illustrates some of the difficulties that may arise in mass harm litigation Also this work explores where the best solutions for mass harm redress may lie in the future perhaps in collective actions or through alternatives such as regulation and alternative dispute resolution or a combination of these Finally the experience of mass harm litigation in Ireland is examined as currently this jurisdiction does not have an effective mechanism for dealing with mass harm This title is included in Bloomsbury Professional s International Arbitration online service
