**Enhancing Building Performance** Shauna Mallory-Hill, Wolfgang F. E. Preiser, Christopher G. Watson, 2012-03-05. Building Performance Evaluation (BPE) informs and enhances the usability and sustainability of building designs with lessons learned from evaluation of building performance throughout the building life cycle from initial planning through occupancy to adaptive re-use. A key feature of BPE is that it examines design and technical performance of buildings alongside human performance criteria. That is, it seeks to examine facilities in order to determine whether they will work for the people that will use and occupy them. Rigorous BPE helps to improve design practice by providing feedback on the effectiveness of the choices made about the building to ensure that its design is optimised for stakeholders. The overarching theme for *Enhancing Building Performance* is to present the next generation of BPE work. The book provides an

updated systematic approach for BPE as well as chapters written by experts from around the world who demonstrate how to apply BPE to enhance building design Topics covered include evidence based and integrative design processes evaluation methods and tools and education and knowledge transfer In addition case studies provide specific examples of how BPE has been used to study such things as the impact of workplace design on human productivity and innovation Written primarily for design professionals and facility managers who wish to use BPE to deliver improved building performance that is responsive to the needs of stakeholders Enhancing Building Performance will also be of great value to researchers and students across a range of architecture and construction disciplines

quality and work that has to be redone Building new structures is a fragmented adversarial process that commonly results in dissatisfied customers and frequently ends in disappointment bitterness and even litigation The industry must change for its own good and that of its customers But while the industry has tried to reform itself it can't do it alone Real change can only come from business owners and executives who refuse to continue paying for a dysfunctional system and demand a new way of doing business The Commercial Real Estate Revolution is a bold manifesto for change from the Mindshift consortium a group of top commercial real estate industry leaders who are fed up with a system that simply doesn't work The book explains how business leaders can implement nine principles for any project that will dramatically cut costs end delays create better buildings and force the industry into real reform The Commercial Real Estate Revolution offers a radically new way of doing business a beginning to end trust based methodology that transforms the building process from top to bottom Based on unifying principles and a common framework that meets the needs of all stakeholders this new system can reform and remake commercial construction into an industry we're proud to be a part of If you're one of the millions of hardcore cynics who work in commercial construction you probably think this sounds like pie in the sky But this is no magic bullet it's a call for real reform If you're an industry professional who's sick of letting down clients or an owner who's sick of cost overruns and endless delays The Commercial Real Estate Revolution offers a blueprint for fixing a broken industry **Job and Work**
