OECD Economic Surveys: United States 2024 OECD,2024-06-25 The United States economy has continued to expand at a solid pace and price pressures have eased somewhat However a sustained fiscal deficit has contributed to raising public debt as a share of GDP to its highest level since World War II with a further substantial increase in prospect over coming decades as the population ages To put the public finances on a more sustainable path a multi year fiscal adjustment should be enacted that achieves savings on pensions and healthcare and raises taxation including on capital incomes A more medium term oriented and less complicated federal budgeting process would support this At the same time economic growth would benefit from productivity enhancing reforms that promote competition including through maintaining international trade openness and reinforcing relevant skills in the workforce Efforts to reduce greenhouse gas emissions have accelerated but further policy measures will be needed to achieve emission reduction targets Policy options include a package of broad based carbon pricing taxes and sectoral policies As the climate transition further progresses additional measures will be needed to support displaced workers from fossil fuel
