

Exercise and exercise based cardiac rehabilitation in patients with cardiac diseases

Exercise And The Coronary Patient

**David R. Thompson, Rosemary A.
Webster**

Exercise And The Coronary Patient:

Exercise Prescription for the High-risk Cardiac Patient Ray White Squires, 1998 Exercise Prescription for the High Risk Cardiac Patient is the first book to provide comprehensive coverage of exercise prescription for chronic heart failure and myocardial ischemia Dr Ray W Squires director of the Cardiovascular Health Clinic at the Mayo Clinic reviews the disease processes basic treatment exercise physiology and outpatient exercise rehabilitation of patients with chronic left ventricular dysfunction myocardial ischemia or both Specific case examples are included to illustrate the practical aspects of assessment and formulation of rehabilitation plans Exercise training provides critical benefits for most cardiac patients Exercise Prescription for the High Risk Cardiac Patient offers in depth information to help high risk patients see improvement in areas such as aerobic exercise capacity symptoms and morbidity and mortality Exercise Prescription for the High Risk Cardiac Patient is organized into five chapters defining the high risk patient pathophysiology and treatment options responses to acute exercise and exercise testing benefits of exercise training and suggestions for exercise programming Complete with dozens of helpful figures and tables this book is specifically designed for cardiac rehabilitation specialists MDs nurses physical therapists and exercise physiologists

Exercise Cardiopulmonary Function in Cardiac Patients Michael S. Sagiv, 2012-05-08 The textbook will describe the relationship between human cardiopulmonary system and exercise in a format that is related to the mode of exercise health status and aging It will include data regarding exercise training principles and the adaptations of the cardiopulmonary following anaerobic resistance and aerobic training A more in depth presentation of the cardiopulmonary system adaptations in pressing environments such as warm cold and altitude Therefore students will experience a depth and extent of content balanced with unique and effective learning features It will help students find the way by both the text and subject matter Knowing cardiopulmonary exercise function in health and disease will allow understand new research and findings relevant to cardiovascular status as assessed by cardiopulmonary exercise indices It will bring together investigational exercise physiologists cardiologists and scientists who share a wealth of experience needed to judge the cardiovascular status and function and the impairments of patients with a variety of cardiac dysfunction This book will provide a comprehensive updated presentation of the information of the cardiovascular system as a whole and its individual components

Exercise-Based Cardiac Rehabilitation in Patients with Coronary Artery Disease Sabina Borg, 2021-08-16 Background Coronary artery disease CAD is the leading global cause of death After an index event related to CAD exercise based cardiac rehabilitation exCR is strongly recommended as part of the secondary prevention Despite the well established beneficial effects of exCR in patients with CAD attendance at and adherence to the programme are low and remain a matter of major concern One strategy that may increase adherence and rehabilitation outcomes in patients with CAD is to add a behavioural medicine intervention to routine exCR care The added value of such interventions needs to be further explored Although several factors associated with non attendance at exCR appear to be similar between

different countries patterns of attendance may differ due to differences in contextual aspects The factors that affect attendance at exCR in a Swedish context remain to be explored Overall aim To investigate barriers for exCR attendance and to evaluate the added value of a behavioural medicine intervention in physiotherapy on exercise adherence and rehabilitation outcomes in patients with CAD Methods The three papers in this thesis are based on two studies of patients with CAD one registrybased cohort study of 31 297 patients included from the SWEDEHEART registry Paper I and one randomised controlled trial of 170 patients included at a Swedish university hospital Papers II and III In the first paper several individual and structural variables were compared for attenders and nonattenders using multivariable analysis in a logistic regression model In Papers II and III patients were randomised 1:1 either to a behavioural medicine intervention in physiotherapy in addition to routine exCR care or to routine exCR care alone for four months The behaviour change techniques used in the behavioural medicine intervention specific goal setting re evaluation of the goals and selfmonitoring and feedback were based on control theory Outcome assessment took place at baseline four and 12 months and included physical fitness psychological outcomes and health related quality of life Exercise adherence was evaluated at the end of the four month intervention An intention to treat and a per protocol analysis were performed Results Individual and structural factors associated with non attendance at exCR in a Swedish context were identified as having a distance greater than 16 km to the hospital belonging to a county hospital having a higher burden of comorbidities being male and being retired Exercise adherence was higher for patients who received the behavioural medicine intervention in physiotherapy together with routine exCR 31% than it was for those who received routine exCR care alone 19% Rehabilitation outcomes did not differ significantly between the two groups either between baseline and four months or between four and 12 months Both groups improved significantly in all measures of physical fitness and in several measures of health related quality of life and anxiety at the four month follow up Sufficient enablement remained for patients in both groups at the 12 months follow up Conclusions Distance to the hospital was the strongest predictor for non attendance at exCR in a Swedish context The individual factors associated with non attendance at exCR identified in this thesis confirm previous results with the exception that female gender was associated with a higher attendance at exCR The results of this thesis confirm what others have pointed out it is challenging to achieve behavioural change in patients with the aim to improve rehabilitation outcomes Even though adherence was higher when a behavioural medicine intervention was added it was low in both groups The current behavioural medicine intervention in physiotherapy did not give any improvements over routine exCR care alone in physical fitness psychological outcomes or health related quality of life As such there is still room for further development and evaluation of behavioural medicine interventions within the context of exCR A greater tailoring of these interventions to individual needs in a broader population of patients with CAD is suggested Bakgrund Kransk rlsjukdom r den ledande d dsorsaken i v rlden Efter en hj rth ndelse till f ljd av kransk rlsjukdom r tr ningsbaserad hj rtrehabilitering h gt

rekommenderad som en del av sekundärpreventionen. Trots att träning baserad på hjärtrehabilitering har visat på positiva effekter hos patienter med kranskärlssjukdom som deltagande och följksamhet till behandlingen låg och ett fortsatt stort bekymmer. En beteendemedicinsk intervention i tillägg till sedvanlig träning baserad på hjärtrehabilitering kan vara en strategi för att öka följksamheten och förbättra rehabiliteringsutfallet hos patienter med kranskärlssjukdom. Betydelsen av sådana interventioner behöver dock undersökas ytterligare. En annan fråga är om det finns faktorer associerade med icke deltagande i träning baserad på hjärtrehabilitering som är likartade mellan olika länder. Kan man identifiera faktorer för deltagande och också skilja sig till grund av skillnader i kontextuella aspekter? Faktorer som påverkar deltagande i träning baserad på hjärtrehabilitering i en svensk kontext har understuderat övergripande syfte. Att undersöka barriärer för deltagande i träning baserad på hjärtrehabilitering samt utvärdera mervärdet av en beteendemedicinsk intervention inom träning baserad på hjärtrehabilitering avseende följksamhet samt rehabiliteringsutfall hos patienter med kranskärlssjukdom. Metod: De tre delarbeten som ingår i den här avhandlingen baseras på två studier innefattande patienter med kranskärlssjukdom: en registerbaserad kohortstudie med 31 297 patienter inkluderade från SWEDEHEART registret, delarbete I, och en randomiserad kontrollerad studie med 170 patienter inkluderade på ett svenskt universitetssjukhus, delarbete II och III. I det första delarbetet jämfördes deltagare och icke deltagare i träning baserad på hjärtrehabilitering avseende samtliga inkluderade individuella och strukturella variabler och en multivariabel analys med logistisk regressionsmodell utfördes i delarbete II och III. Randomiserades patienterna 1:1 till en beteendemedicinsk intervention i tillägg till sedvanlig träning baserad på hjärtrehabilitering eller till enbart sedvanlig träning baserad på hjärtrehabilitering under fyra månader. De beteendeförändringstekniker som användes i den beteendemedicinska interventionen innefattade specifik målställning, omvärdering av målen, självmonitorering och feedback och baserades på kontrollteorin. Test av utfallsmått gjordes vid baslinjen och efter fyra och 12 månader och inkluderade fysisk kapacitet, psykologiska utfallsmått samt hälsorelaterad livskvalitet. Följksamhet till det träningsbaserade hjärtrehabiliteringsprogrammet utvärderades efter avslutad intervention vid fyra månader. En intention to treat och en per-protokoll analys utfördes. Resultat: Individuella och strukturella faktorer associerade med icke deltagande i träning baserad på hjärtrehabilitering i en svensk kontext var ett avstånd längre än 16 km till sjukhuset, att tillhöra ett lässjukhus, ha en högre grad av komorbiditet, vara av manligt kön samt att vara pensionär. Följksamheten till träningsprogrammet var betydligt högre för de patienter som erhölet en beteendemedicinsk intervention i tillägg till sedvanlig träning baserad på hjärtrehabilitering (31%) jämfört med de som enbart erhölet sedvanlig träning baserad på hjärtrehabilitering (19%). Utfallsmått skilde sig inte signifikant mellan de två grupperna varken mellan baslinjen och fyra månader eller mellan fyra och 12 månader. Båda grupperna förbättrades dock signifikant i samtliga utfallsmått för fysisk kapacitet, näst samt i flera mått av hälsorelaterad livskvalitet mellan baslinjen och fyra månader. Patienterna i båda grupperna uppvisade en kvarstående förmåga att förstå och hantera sin sjukdom, enbart vid 12 månaders uppföljningen. Konklusion: Avstånd till sjukhuset var den starkaste prediktorn för icke deltagande i träning baserad på hjärtrehabilitering. Individuella faktorer som

associerades med icke deltagande i en svensk kontext var i linje med resultat från tidigare studier med undantaget att kvinnligt kön var associerat med högre deltagande i träning baserad hjärterehabitering Resultaten av denna avhandling bekräftar tidigare rapporterade utmaningar med att lyckas uppnå beteendeförändringar hos patienter i syfte att förbättra rehabiliteringsutfall Trots att följksamheten var bättre med ett tillgång av en beteendemedicinsk intervention så var den långt från alla grupperna Den aktuella beteendemedicinska interventionen gav inget mervärde avseende effekter av fysisk kapacitet psykologiska utfallsmått och hölsorelaterad livskvalitet jämfört med enbart sedvanlig träning baserad hjärterehabitering Således finns det fortfarande utrymme för vidareutveckling och utvärdering av beteendemedicinska interventioner inom ramen för träning baserad hjärterehabitering En större anpassning av dessa interventioner utifrån individuella behov i en bredare population av patienter med kranskärlssjukdom föreslås

Exercise in Rehabilitation Medicine Walter R. Frontera, David M. Slovik, David Michael Dawson, 2006 In this book recognised experts Walter Frontera David Slovik and David Dawson discuss the latest research in exercise rehabilitation medicine

Physical Activity and Cardiovascular Health Arthur S. Leon, 1997 This reference presents the Consensus Statement from the 1995 Conference on Physical Activity and Cardiovascular Health and the supporting papers presented by the experts assembled there

Rehabilitation of the Coronary Patient Nanette Kass Wenger, Herman K. Hellerstein, 1984

Exercise And The Coronary Patient Introduction

Exercise And The Coronary Patient Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Exercise And The Coronary Patient Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Exercise And The Coronary Patient : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Exercise And The Coronary Patient : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Exercise And The Coronary Patient Offers a diverse range of free eBooks across various genres. Exercise And The Coronary Patient Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Exercise And The Coronary Patient Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Exercise And The Coronary Patient, especially related to Exercise And The Coronary Patient, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Exercise And The Coronary Patient, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Exercise And The Coronary Patient books or magazines might include. Look for these in online stores or libraries. Remember that while Exercise And The Coronary Patient, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Exercise And The Coronary Patient eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short

stories for free on their websites. While this might not be the Exercise And The Coronary Patient full book, it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Exercise And The Coronary Patient eBooks, including some popular titles.

FAQs About Exercise And The Coronary Patient Books

1. Where can I buy Exercise And The Coronary Patient books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Exercise And The Coronary Patient book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Exercise And The Coronary Patient books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Exercise And The Coronary Patient audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.

9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Exercise And The Coronary Patient books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
