

The background of the slide features a blurred image of laboratory glassware. In the foreground, several test tubes are visible, each containing a different colored liquid: yellow, red, green, and blue. Behind them, there are larger Erlenmeyer flasks and beakers, some containing orange or red liquids. The overall scene suggests a chemistry or science laboratory setting.

**Aesthetic Experience in Science Education** Per-Olof Wickman, 2006-04-21 This book examines the role of aesthetic experience in learning science and in science education from the perspective of knowledge as action and language use The theoretical underpinnings are based on the writings of John Dewey and Ludwig Wittgenstein In their spirit aesthetics is examined as it appears in the lives of people and how it relates to the activities in which they are involved Centered around an empirical analysis of how students and their teachers use aesthetic language and acts during laboratory and field work the book demonstrates that aesthetics is something that is constantly talked about in science class and that these aesthetic experiences are intimately involved in learning science These empirical findings are related to current debates about the relation between aesthetics and science and about motivation participation learning and socio cultural issues in science education This book features an empirical demonstration of the importance and specific roles of aesthetic experiences in learning science a novel contribution to the current debate on how to understand motivation participation and learning and a new methodology of studying learning in action Part I sketches out the theoretical concepts of Wickman s practical epistemology analysis of the fundamental role of aesthetics in science and science education Part II develops these concepts through an analysis of the use of aesthetic judgments when students and teachers are talking in university science classes Part III sums up the general implications of the theoretical underpinnings and empirical findings for teaching and learning science Here Wickman expands the findings of his study beyond the university setting to K 8 school science and explicates what it would mean to make science education more aesthetically meaningful Wickman s conclusions deal to a large extent with aesthetic experience as individual transformation and with people s prospects for participation in an activity such as science education These conclusions have significance beyond science teaching and learning that should be of concern to educators generally This book is intended for educational researchers graduate students and teacher educators in science education internationally as well as those interested in aesthetics philosophy of education discourse analysis socio cultural issues motivation learning and meaning making more generally

**Science And Faith** William H. Chalker, 2006 In this introduction to religion and science William Chalker outlines the nature of knowledge involved in claims about science and about religion and delineates a compatible relationship between these two fields of understanding According to Chalker both science and theology have their proper realms and while they are different in several crucial respects they are not incompatible Publisher s website

**Women's Experiences in Leadership in K-16 Science Education Communities, Becoming and Being** Katherine C.

Wieseman, Molly Weinburgh, 2009-06-18 A discourse on women's leadership within science education has until now been largely invisible in book form. This therefore is the first book to address women's leadership within science education. The book embraces relational ways of knowing as a foundation for leadership and takes courageous steps by exposing our innermost tensions, dilemmas, and feelings about leadership, making them available to others. The power promise of feminine approaches to transform traditional leadership cultures is also addressed. The authors believe that anyone can lead regardless of position, title, years of experience, or age. They also believe that each of us has a responsibility to provide some leadership and direction for the shared endeavours of which we are part. The purpose of the book is to inspire and guide educators and academics in K-16 science education as well as individuals in other professions as their leadership skills develop. The leadership activities provided offer guidance and/or concrete ways to delve into issues of leadership.

**The Experiences and Challenges of Science and Ethics**, 2003-01-01 In April 2002 the U.S. National Academies hosted an interacademy workshop involving participants from the United States and Iran on the topic of Science and Ethics. The explicit purposes of the workshop were a) to engage important members of the American and Iranian scientific communities in meaningful discussions of the topic of science and ethics and particularly differences in the approaches in the west and in Islamic countries in general and Iran in particular; b) to encourage greater participation by Iranian scientists in international scientific discussions by exposing them to seasoned veterans in international meetings; and c) to identify specific topics and approaches that could be carried out by the Academies in the two countries to contribute to international understanding of the importance of considering the ethical dimensions of scientific research and related activities. This report includes documents prepared by four breakout groups and a statement on priority areas for future interacademy cooperation developed at the final plenary session. Also included are background papers prepared by some participants prior to the workshop that were not previously published.

**Investigating Social Problems** A. Javier Trevino, 2014-08-08 Each chapter in this innovative social problems text is written by a specialist or pair of specialists from appropriate subfields within sociology. The typical single author approach is limiting given the complexity of the contemporary issues surrounding each social problem discussed. Involving many content experts ensures that the theories, research, and examples used in each chapter will be as current and relevant as possible. Chapters open with personal statements from the contributing authors discussing how they got involved with studying the problem they are writing about. Javier Trevino serves as the general editor, making sure that each author follows the chapter template and maintains a consistency in level and style.
