Kilmer,2018-01-18 The sections in this handbook series reflect the input of different editors and advisory boards and as a consequence there is considerable variation in both the depth and coverage offered within a given area However an attempt has been made throughout to bring together pertinent information that will serve the needs of nonspecialists provide a quick reference to material that might otherwise be difficult to locate and furnish a starting point for further study The project was undertaken with the realization that the initial volumes in the series could have some obvious deficiencies that will necessitate subsequent revisions In the meantime it is felt that the primary objectives of the Sections Editors and their Advisory Boards has been met in this first Edition Handbook of Soil Science Mishra S. All soil scientists should then classify soils using the WRB as well as their national systems The book is a definitive and essential reference work for all students studying soils as part of life earth or environmental sciences as well as professional soil scientists Published with International Union of Soil Sciences
