**Soldiers and Civil Power** Thijs Brocades

Zaalberg, 2006 Since the Cold War peace operations have become the core focus of many Western armed forces In these operations the division between civil and military responsibilities often rapidly blurs Among policy makers and in military

circles a debate has erupted regarding the scope of the military in stabilizing and reconstructing war torn societies Should soldiers who primarily prepare for combat duties observe a strict segregation between the military sphere and the civilian sphere or become involved in nation building Should soldiers be allowed to venture into the murky arena of public security civil administration humanitarian relief and political and social reconstruction In *Soldiers and Civil Power* Thijs Brocades Zaalberg draws on military records and in depth interviews with key players to examine international operations in the 1990 s in Cambodia Somalia Bosnia and Kosovo Focusing his historical analysis on the experiences of various battalions in the field he reveals large gaps between this tactical level of operations political strategic decision making and military doctrine By comparing peace operations to examples of counterinsurgency operations in the colonial era and military governance in World War II he exposes the controversial but inescapable role of the Western military in supporting and even substituting civil authorities during military interventions At a time when US forces and its allies struggle to restore order in Iraq and Afghanistan Brocades Zaalberg s in depth study is an invaluable resource not only for military historians but anyone interested in the evolving global mission of armed forces in the twenty first century Western Intervention in the Balkans Roger D. Petersen, 2011-09-30 Conflicts involve powerful experiences The residue of these experiences is captured by the concept and language of emotion Indiscriminate killing creates fear targeted violence produces anger and a desire for vengeance political status reversals spawn resentment cultural prejudices sustain ethnic contempt These emotions can become resources for political entrepreneurs A broad range of Western interventions are based on a view of human nature as narrowly rational Correspondingly intervention policy generally aims to alter material incentives sticks and carrots to influence behavior In response poorer and weaker actors who wish to block or change this Western implemented game use emotions as resources This book examines the strategic use of emotion in the conflicts and interventions occurring in the Western Balkans over a twenty year period The book concentrates on the conflicts among Albanian and Slavic populations Kosovo Montenegro Macedonia South Serbia along with some comparisons to Bosnia **Military-Civilian Interactions** Thomas G. Weiss, 2005 Updated to include discussion of Afghanistan Iraq this text explores the recent history of military civilian interaction in the context of international military intervention develops a framework for assessing military costs against civilian benefits Politics of Ethnic Cleansing Kledja Mulaj, 2008-01-01 This book examines the causes and consequences of ethnic cleansing in the twentieth century Balkans The analysis offers a top down interpretation of the expulsion of ethno national minorities as a means of state building and questions the argument for forced homogenization as a conflict resolution strategy In providing a thorough and consistent analysis of large scale episodes of ethnic cleansing the book fills an important gap in existing conflict and peace studies literature Applied Afro-Communitarian Ethics and Foreign Armed Intervention Danny Singh, 2024-10-10 Just war theory concerns the morality of engaging in warfare the conduct in war and justice including democratization and reconstruction in the aftermath to end war The morality of war can

be measured from a variety of military and philosophical ethics that include theological consequentialist and realist schools of thought. Various military interventions such as Bosnia, Afghanistan, and Iraq have been analyzed and evaluated and criticized from a Western and especially liberal point of view. In this book, Danny Singh addresses foreign interventions from a different normative paradigm. Namely, he addresses the morality of foreign military interventions in light of Afro communitarianism, a dominant philosophical approach in sub-Saharan Africa. According to Afro communitarianism, positive communal relationships, social harmony, and the greatest good that can be achieved to form friendship, which can be understood as the combination of shared identity and goodwill, are the greatest good. Even though Afro communitarianism prioritizes peaceful communal relations, enmity, behavior, and violence are morally permissible if it either leads to a less disharmonious state of affairs or to a harmonious state of affairs, or there are no friendly alternatives to achieve any of both desired outcomes, but the initiator of conflict desires to promote them. Moreover, Afro communitarianism prescribes dialogue as a guiding action to avoid military conflict. The book provides an alternative and non-Western approach to the morality of war and efforts to promote sustainable peace in the aftermath of conflict between warring belligerent parties.

*Oppenheim's International Law: United Nations* Rosalyn Higgins, Philippa Webb, Dapo Akande, Sandesh Sivakumaran, James Sloan, 2018-12-13. The United Nations, whose specialized agencies were the subject of an Appendix to the 1958 edition of Oppenheim's *International Law*, has expanded beyond all recognition since its founding in 1945. This volume represents a study that is entirely new but prepared in the way that has become so familiar over succeeding editions of Oppenheim. An authoritative and comprehensive study of the United Nations legal practice, this volume covers the formal structures of the UN as it has expanded over the years and all that this complex organization does. All substantive issues are addressed in separate sections, including among others the responsibilities of the UN, financing, immunities, human rights, preventing armed conflicts, and peacekeeping and judicial matters. In examining the evolving structures and ever-expanding work of the United Nations, this volume follows the long-held tradition of Oppenheim by presenting facts uncoloured by personal opinion in a succinct text that also offers in the footnotes a wealth of information and ideas to be explored. It is a book that while making all necessary reference to the Charter, the Statute of the International Court of Justice, and other legal instruments, tells of the realities of the legal issues as they arise in the day-to-day practice of the United Nations. Missions to the UN, Ministries of Foreign Affairs, practitioners of international law, academics, and students will all find this book to be vital in their understanding of the workings of the legal practice of the UN. Research for this publication was made possible by The Balzan Prize, which was awarded to Rosalyn Higgins in 2007 by the International Balzan Foundation.

*Bugsplat* Bruce Cronin, 2018-03-07. Why do states who are committed to the principle of civilian immunity and the protection of non-combatants end up killing and injuring large numbers of civilians during their military operations? *Bugsplat* explains this paradox through an in-depth examination of five conflicts fought by Western powers since 1989. It argues that despite the efforts of Western military organizations to comply

with the laws of armed conflict the level of collateral damage produced by Western military operations is the inevitable outcome of the strategies and methods through which their military organizations fight wars Drawing on their superior technology and the strategic advantage of not having to fight on their own territory such states employ highly concentrated and overwhelming military force against a wide variety of political economic and military targets under conditions likely to produce high civilian casualties As a result collateral damage in western fought wars is largely both foreseeable and preventable The book title is derived from the name of a computer program that had been used by the Pentagon to calculate probable civilian casualties prior to launching air attacks

*The Use of Force in International Law* Tom Ruys, Olivier Corten, Alexandra Hofer, 2018-04-26 The international law on the use of force is one of the oldest branches of international law It is an area twinned with the emergence of international law as a concept in itself and which sees law and politics collide The number of armed conflicts is equal only to the number of methodological approaches used to describe them Many violent encounters are well known The Kosovo Crisis in 1999 and the US led invasion of Iraq in 2003 spring easily to the minds of most scholars and academics and gain extensive coverage in this text Other conflicts including the Belgian operation in Stanleyville and the Ethiopian Intervention in Somalia are often overlooked to our peril Ruys and Corten s expert written text compares over sixty different instances of the use of cross border force since the adoption of the UN Charter in 1945 from all out warfare to hostile encounters between individual units targeted killings and hostage rescue operations to ask a complex question How much authority does the power of precedent really have in the law of the use of force

Rudolph Jr., 2015-12-07 An indispensable reference that will help students understand the major ethnic conflicts that dominate the headlines and shape the modern world Since World War II significant conflicts have most often taken the form of acts of violence between ethnic or national communities inside individual states This two volume work uses case studies to explore some four dozen of those conflicts making it an ideal first stop reference for students and others who wish to quickly gain an understanding of ethnic struggles Content from the first edition is updated and new entries on recent conflicts have been added The set s geographical range which encompasses nearly every continent is matched by the diversity of the conflicts explored These include internal

Siobhán Wills, 2009-02-26. This book examines the obligations of troops to prevent serious abuses of human rights towards civilians under international humanitarian law and international human rights law. It analyses the duty to intervene to stop the commission of serious abuses of human rights by analysing the meaning and practical consequences for troops in terms of civilian protection of the Article 1 duty to respect and ensure respect for the Geneva Conventions of the duty to secure human rights found in most international human rights treaties and of the duty to restore law and order in an occupation. The book also analyzes the extent of troops obligations to provide protection in light of various different operational and legal contexts in and discusses grey areas and lacuna of coverage. A discussion of whether new approaches are needed for example where operations are undertaken explicitly to protect people from serious violations of their human rights follows and the book concludes by offering some guidelines for troops faced with such violations. UNMIK as an International Governance in Post-war Kosovo Blerim Reka, 2003. Global Governance, Human Rights and International Law Errol P.

Mendes, 2014-02-05. This book offers a stimulating introduction to the links between areas of global governance, human rights, global economy and international law. By drawing on a range of diverse subject areas, Errol P. Mendes argues that the foundations of global governance, human rights and international law are undermined by a conflict or tragic flaw where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self interest for both the state and the global community. The book explores how human rights and international law are applied in some of the critical institutions of global governance and in the operations of the global private sector and how States institutions and global civil society struggle to fight this tragic flaw. The book is brought up to date by considering developments in the role of the IMF, the World Bank, bilateral investment treaties, the likely failure of the Doha round of WTO negotiations, the legacy of the 2008 financial crisis and the role of the International Criminal Court and the evolving Responsibility to Protect doctrine in international peace and security crises in the Middle East, Central and West Africa among other regions of the world. With its intensely interdisciplinary approach, this book motivates new thinking in the realm of global governance and international law and promotes the development of new strategies for negotiating between conflicting leadership and organisational values within global institutions. The book will be of great interest and use to students and researchers of public international law, international relations and political science, business and human rights, global governance and international trade and economic law. **History of Military Occupation from 1792 to**
